ABSTRAC

Indonesia, a country which is rich for resources, both of human and natural resources. These abundant natural resources use for Indonesian's prosperity and the authority is under government as it arranged in article 33 subsection 3 UUD 1945 "earth, and water and resources that contains on it controled over by government and used to increase citizen's prosperity". In mining, the authority is under the country and government as the representative. Government carries out the authority independently whether delegate it to other for the management. There has been a lot of changes on mining tenure arrangements, from contract to permit. In required setting clearer that the interests of investor and other parties can be protected.
