RANCANG BANGUN ALAT BANTU TUNANETRA
BERJALAN DI MEDAN KONTUR BERBASIS
MIKROKONTROLER ATMega16
(BAGIAN I)

TUGAS AKHIR
ASYHAR MUFAYYADL ROZAQ

PROGRAM STUDI D3 OTOMASI SISTEM INSTRUMENTASI

DEPARTEMEN TEKNIK

FAKULTAS VOKASI

UNIVERSITAS Airlangga

SURABAYA

2015
RANCANG BANGUN ALAT BANTU TUNANETRA
BERJALAN DI MEDAN KONTUR BERBASIS
MIKROKONTROLER ATMega16
(BAGIAN I)

PROYEK AKHIR
Sebagai Syarat Untuk Memperoleh Gelar Ahli Madya Bidang
Otomasi Sistem Instrumentasi Pada Departemen Fisika
Fakultas Vokasi
Universitas Airlangga

LEMBAR PENGESAHAN NASKAH PROYEK AKHIR

Judul : Rancang Bangun Alat Bantu Tunanetra Berjalan Di Medan Kontur Berbasis Mikrokontroler ATMega16

Penyusun : ASYHAR MUFAYADL ROZAQ
NIM : 081102011
TanggalUjian : 13 Juli 2015
Pembimbing : Imam Sapuan, S.Si, M.Si
Konsultan : Franky Chandra S, S.T,M.T.

Disetujuioleh :

DAFTAR GAMBAR ............................................................................................................. viii
DAFTAR TABEL ..................................................................................................................... ix

BAB I PENDAHULUAN ............................................................................................................ 1
  1.1 Latar Belakang Masalah .......................................................................................... 1
  1.2 Rumusan Masalah ................................................................................................... 2
  1.3 Batasan Masalah ..................................................................................................... 3
  1.4 Tujuan .................................................................................................................... 3
  1.5 Manfaat Proyek Akhir .......................................................................................... 4

BAB II TINJAUAN PUSTAKA ................................................................................................ 5
  2.1 Gelombang Ultrasonik ............................................................................................ 6
  2.2 Sensor Ultrasonik ................................................................................................... 7
    2.2.1 Osilator PIC12C508 .................................................................................... 10
    2.2.2 IC IT 232CD ............................................................................................... 11
    2.2.3 Komprator IC LP311 .................................................................................. 12
  2.3 Buzzer .................................................................................................................. 12
  2.4 ATMEGA16 ......................................................................................................... 13
    2.4.1 Konfigurasi Pin ATMega16 ........................................................................ 15
    2.4.2 Deskripsi Mikrokontroller ATMega16 ....................................................... 16
  2.5 LCD M163 ............................................................................................................. 19
  2.6 Vibrator ................................................................................................................. 24

BAB III METODE PENELITIAN ......................................................................................... 28
  3.1 Waktu Dan Tempat Penelitian ............................................................................. 28
  3.2 Alat dan Bahan ...................................................................................................... 28
    3.2.1 Bahan Penelitian .......................................................................................... 28
3.2.2 Alat Penelitian .......................................................... 28
3.3 Prosedur Penelitian .......................................................... 29
3.4 Blok Diagram Alat .......................................................... 31
3.5 Tahap Pembuatan Alat ...................................................... 31
3.5.1 Perancangan dan Pembuatan Perangkat Keras ............. 32
3.5.1.1 Sensor SRF04 .......................................................... 34
3.5.1.2 Mikrokontroller ......................................................... 35
3.5.1.3 Power Supply .......................................................... 37
3.5.1.4 LCD ................................................................. 37
3.5.2 Perancangan Mekanik .................................................. 38
3.6 Tahap Perwujudan Alat ..................................................... 39
3.7 Pengujian Hardware dan Software (Alat) ......................... 39

BAB IV HASIL DAN PEMBAHASAN ................................................. 41
4.1 Hasil Pembuatan Mekanik .............................................. 41
4.1.1 Hasil Rancang Bangun Mekanik .................................. 41
4.1.2 Hasil Casing Alat ....................................................... 41
4.1.3 Hasil Supitan Vibrator ............................................... 42
4.1.4 Pembuatan Perangkat Kerasa (Hardware) .................. 43
4.1.5 Hardware Pengontrol ............................................... 43
4.1.6 Pengalaman PORT Mikrokontrolr ATmega16 ............ 44
4.2 Data Hasil Pengujian dan Pembahasan ......................... 45
4.2.1 Pengujian Sensor Terhadap Obyek (keadaan diam) ...... 45
4.2.2 Pengujian Sensor Terhadap Obyek (sensor dalamkeadaan… berjalan) ................................................................. 48
4.2.3 Pengujian Sensor Terhadap Objek Pada Sudut Miring ...... 50
4.2.4 Keberhasilan Kerja Alat .............................................. 57

BAB V KESIMPILAN DAN SARAN .................................................. 60
5.1 Kesimpulan ................................................................. 60
5.2 Saran ........................................................................... 60

DAFTAR TABEL

Tabel 2.1 Deskripsi PIN PIC 12C508 ................................................................. 10
Tabel 2.2 Fungsi PIN IC ST 232SD ................................................................. 11
Tabel 2.3 Deskripsi PIN ATMega16 ................................................................. 17
Tabel 2.4 Konfigurasi LCD ........................................................................... 20
Tabel 2.5 Deskripsi PIN LCD ........................................................................ 20
Tabel 2.6 Konfigurasi Pengiriman Data LCD .................................................. 21
Tabel 2.7 Spesifikasi Motor DC RF-300FA01420 ......................................... 26
Tabel 2.8 Spesifikasi Torsi Motor DC RF-300FA01420 ................................ 26
Tabel 3.1 Bahan yang diperlukan ................................................................. 28
Tabel 3.2 Peralatan yang diperlukan ............................................................. 29
Tabel 3.3 Port Input pada Mikrokontroller .................................................... 35
Tabel 3.4 Konfigurasi LCD ......................................................................... 37
Tabel 4.1 Inisialisasi Mynsis ....................................................................... 44
Tabel 4.2 Pengujian Sensor 1 dalam keadaan diam ..................................... 46
Tabel 4.3 Pengujian Sensor 2 dalam keadaan diam ..................................... 46
Tabel 4.4 Pengujian Sensor 1 dalam keadaan berjalan ............................... 48
Tabel 4.5 Pengujian Sensor 2 dalam keadaan berjalan ............................... 48
Tabel 4.6 Pengukuran karakter hadap sudut .................................................. 50
Tabel 4.7 Keberhasilan Output 1 pada Sensor 1 (keadaan diam) ............. 57
Tabel 4.8 Keberhasilan Output 2 pada Sensor 2 (keadaan diam) ............. 57
Tabel 4.9 Keberhasilan Output 1 pada sensor 1 (keadaan berjalan) ......... 58
Tabel 4.10 Keberhasilan Output 2 pada sensor 2 (keadaan berjalan) ...... 59
