# PENDAHULUAN

1.1 Latar Belakang Permasalahan ............................................. 1

1.2 Rumusan Masalah .......................................................... 6

1.3 Asumsi Penelitian ........................................................... 7

1.4 Hipotesis Penelitian .......................................................... 7

1.4.1 Hipotesis kerja ........................................................... 7

1.4.2 Hipotesis statistik ......................................................... 8

1.5 Tujuan Penelitian ............................................................. 8

1.6 Manfaat Penelitian ............................................................ 8

# METODE PENELITIAN

3.1 Tempat dan Waktu Penelitian ........................................... 27

3.2 Bahan dan Alat Penelitian ................................................ 27

3.2.1 Bahan penelitian ....................................................... 27

3.2.1 Alat penelitian .......................................................... 28

3.3 Rancangan Penelitian ...................................................... 28

3.4 Variabel Penelitian ......................................................... 29
BAB IV HASIL DAN PEMBAHASAN ................................................. 36
4.1 Hasil Penelitian .................................................................. 36
  4.1.1 Pengaruh zat pengatur tumbuh terhadap ukuran Antera ................................................................. 36
  4.1.2 Pengaruh zat pengatur tumbuh terhadap persentase antera yang pecah .............................................. 39
4.2 Pembahasan ......................................................................... 49
  4.2.1 Pengaruh zat pengatur tumbuh terhadap ukuran Antera ................................................................. 43
  4.2.2 Pengaruh zat pengatur tumbuh terhadap persentase antera yang pecah .............................................. 46

BAB V KESIMPULAN DAN SARAN ............................................... 49
5.1 Kesimpulan ......................................................................... 49
5.2 Saran .................................................................................. 49

DAFTAR PUSTAKA ........................................................................ 50
