ACKNOWLEDGEMENTS

Alhamdulillahirabbil’alamin, praise be to Allah SWT. My first deep gratitude is always addressed to Allah SWT for His endless blessings, mercies, and to the beloved Prophet Muhammad SAW, peace be upon him, as the most virtuous act for all Muslims. They both always lit me up wherever and whenever I felt down until I could accomplish this thesis.

I realize that this thesis would not be finished without the guidance, advices, and courage from my thesis advisor. Therefore, I would like to thank Ms. Masitha A. S., M. Hum. for her patience in guiding me to finish this thesis. To my mother, Dra. Tri Astutik, who never stopped encouraging me to finish this thesis, thank you very much for everything. I would also like to thank these people: my father, Susanto, my brothers, Sigit Susanto Putro, Singgih Susanto Putro, and Septian Hakim Susanto Putro. Thank you for never stopping to believe that I would finish this thesis.

To my best friends (Nabilah, Putri, Dani, Ariel, Desi), thank you for all the push and I hope we will continue our friendship even after we all are graduated. And also thank to my second family, UKTK, for the chance that you have given to me. Last but not least, I address my gratefulness to all my 2K11 friends from Linguistics, Literature, and Cultural Studies class who cannot be mentioned one by one. Thank you for the colorful days we went through these past four years. I wish you all the best of luck. See you on top!

**Estadha, Kartika Dianpuspa.** Slips of the Tongue Produced by Interviewees during Job Interview at PT. Bimasakti Multi Sinergi

**ABSTRACT**

Slips of the tongue happen when the speaker produces a wrong utterance they did not mean to occur. Slips of the tongue naturally happen because of unintentional processes when we produce a speech. This present study aims to analyze the types of slips of the tongue which occur in the utterances produced by interviewees during job interview using combined theory proposed by Fromkin (1973) Harley (2001). The data were collected from job interview held by PT. Bimasakti Multi Sinergi. The participant of this study is 15 interviewees which follow job interview in March until May 2015. The findings showed that there are 54 slips of the tongue produced by interviewees during job interview. Thirty four slips belong to Fromkin (1973) and Harley (2001). Of 13 types of slips of the tongue, only 6 types were found in this study (phoneme anticipation, word exchange, word substitution, haplologies, affix deletion, and phoneme deletion). The most frequent type of slips of the tongue is word exchange with 14 slips of the tongue out of 34 slips or 41.20%. The rest 20 slips are other types than Fromkin (1973) and Harley (2001). They are considered as phoneme substitution, phoneme insertion, and syllable insertion.

**Keywords:** interviewees; job interview; slips of the tongue; speech production
