## Aims and Scope

*International Journal of Engineering and Technology* (IJET) is a scholarly open access, peer-reviewed, interdisciplinary, quarterly and fully refereed journal focusing on theories, methods and applications in Engineering and Technology. IJET covers all areas of Engineering and Technology, publishing refereed original research articles and technical notes. IJET reviews papers **approximately two to four months** of submission date and publishes accepted articles on the forthcoming issue upon receiving the final versions.

IJET Cover

All submitted articles should report original, previously unpublished research results, experimental or theoretical, and will be peer-reviewed. Articles submitted to the journal should meet these criteria and must not be under consideration for publication elsewhere. Manuscripts should follow the style of the journal and are subject to both review and editing.

All the papers in the journal are also available freely with online full-text content and permanent worldwide web link. The abstracts will be indexed and available at major academic databases.

IJET welcomes author submission of papers concerning any branch of the Engineering and Technology and their applications in business, industry and other subjects. The subjects covered by the journal includes but not limited to:

Aeronautical/ Aerospace Engineering, Agricultural Engineering, Automation Engineering, Automobile Engineering, Ceramic Engineering, Chemical Engineering, Civil Engineering, Collaborative Engineering,

Communication Engineering, Complexity in Applied Science and Engineering, Computational Science and Engineering, Computer Aided Engineering and Technology, Computer Applications in Technology, Computer Engineering, Continuing Engineering Education and Life-Long Learning, Control Theory, Data Mining and Bioinformatics, Design Engineering, Electrical Engineering, Electronic and Electrical Engineering, Embedded Systems, Engineering Management and Economics, Environmental Engineering, Forensic Engineering, Industrial Engineering, Information Systems and Management, Information Technology, Instrumentation Engineering, Intelligent Engineering Informatics, Knowledge Engineering and Data Mining, Manufacturing Engineering, Marine Engineering, Materials Engineering, Mechanical Engineering, Mechatronics, Metallurgical Engineering, Microengineering, Mining Engineering, Nuclear Engineering, Petroleum Engineering, Process Systems Engineering, Production Engineering, Remote Monitoring, Sensor Network, Soft-computing and Engineering Education, Software Engineering, Strategic Engineering Asset Management, Structural Engineering, Textile Engineering, Transportation.

**Frequency: 6 issues per year**

**e-ISSN: 0975-4024 (online Version)**

**p-ISSN: 2319-8613 (Print Version)**

**Subject Category: Engineering and Technology**

**Published by: Engg Journals Publications**

### VOLUME 8 Issue 2

ISSN: 0975-4024

Vol. 8, No.2

Search the Article

Article #	Article Title & Authors (Volume 8 Issue 2 Apr-May 2016)	Page
1.	Recent trends in eLearning environment for effective content dissemination to online learners V.R. Raghuvver, S.Murali <a href="#">Abstract</a>   <a href="#">PDF</a>	536-546
2.	INFLUENCE OF PERSONALITY SHORT FALL ON THE EFFECTIVENESS OF DEFECT DENSITY IN PAIR PROGRAMMING Mrs. K.S.Sunitha, Dr. K. Nirmala <a href="#">Abstract</a>   <a href="#">PDF</a>	547-554
3.	A Robust Ad hoc Reactive Energyconstraint Multi Path routing protocol for High Mobility Networks Minesh Thaker, Dr.S.B.Sharma <a href="#">Abstract</a>   <a href="#">PDF</a>	555-565
4.	Mapping Model of Groundwater Catchment Area based on Geological Fault: Case Study in Semarang City Qudus, N., Kusumawardani,R. <a href="#">Abstract</a>   <a href="#">PDF</a>	566-572
5.	A Modified Image Processing Algorithm for Error Reduction in Line-of-Sight Vector Between a Spacecraft and Target Celestial Body. G.K.Rajini, Shaik Naseera, P. Mahalakshmi, Jasmine Pemeena Priyadharshini <a href="#">Abstract</a>   <a href="#">PDF</a>	573-579
6.	A Pattern Matching Algorithm for Reducing False Positive in Signature Based Intrusion Detection System T. Sree Kala, Dr. A. Christy <a href="#">Abstract</a>   <a href="#">PDF</a>	580-586
7.	'CHATGAURD'-A system that ensures safe posting in social networking sites Surya Prabha. K, Harini. N <a href="#">Abstract</a>   <a href="#">PDF</a>	587-595
8.	Development of Wind Power Generation Model with DFIG for Varying Wind Speed and Frequency Control for Wind Diesel Power Plant Naresh Kumari, A. N. Jha, Nitin Malik <a href="#">Abstract</a>   <a href="#">PDF</a>	596-603
9.	Analysis of Network Security Spasms and Circumvention Sangamithra A, M.P.Vani <a href="#">Abstract</a>   <a href="#">PDF</a>	604-608
10.	A Study of MRI Segmentation Methods in Automatic Brain Tumor Detection Shijin Kumar P.S, Dharun V.S <a href="#">Abstract</a>   <a href="#">PDF</a>	609-614
11.	Artificial Neural Network Approach with Back Propagations for Modelling SSremoval in GMF SA'AD ABU-ALHAIL AL-KHALIL <a href="#">Abstract</a>   <a href="#">PDF</a>	615-624
12.	Performance evaluation of filters VDF and VMF against impulsive noise in video sequences Mohamed Ben Amor, Anis Boudabous, Fahmi Kammoun, Nouri Masmoudi <a href="#">Abstract</a>   <a href="#">PDF</a>	625-634
13.	Lagrange interpolation based Asymmetric Group Key Agreement Cryptosystem Dr. R. Siva Ranjani <a href="#">Abstract</a>   <a href="#">PDF</a>	635-646
14.	Most Favorable Control Routing Technique Dr.M.B. Mukesh Krishnan, T.Balachander, P.Rajasekar <a href="#">Abstract</a>   <a href="#">PDF</a>	647-652
15.	ZigBee Based Wireless Data Transmission with LDPC codes using FPGA M.Ushaswini Chowdary, B.Murali Krishna, K.S.N.Murthy, G.L.Madhumati, Habibulla Khan <a href="#">Abstract</a>   <a href="#">PDF</a>	653-659
16.	Efficient ECG Signal Conditioning Techniques using Variable Step Size Least Mean Fourth Algorithms	660-668

	BurraVenkataSrikanth, Md Zia Ur Rahman	
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
17.	A Review on Feature Selection Methods for High Dimensional Data Senthil Kumar P., Daphne Lopez	669-672
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
18.	Pan-sharpening WorldView-2: IHS, Brovey and Zhang methods in comparison Pasquale Maglione, Claudio Parente, Andrea Vallario	673-679
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
19.	Low power high speed 40-bit Tag comparator using Domino logic for modern power efficient processors Deepak Agarwal, Ankit Singhal, R Ravikumar, Sriadibhatla Sridevi	680-691
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
20.	IMPLEMENTATION OF LOW-POWER FLIP-FLOPS USING C-ELEMENT M.V.Supriya, FazalNoorbasha	692-699
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
21.	Retinopathy of Prematurity Detection in Infants using Gamma Transformation and Gabor Wavelet on Tiles of Retinal Images SeyedAliakbar Mousavi, Zahra Hanifeloo, Putra Sumari, Muhammad RafieMohd Arshad	700-706
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
22.	Permutation based speech scrambling for next generation mobile communication Dhanya G, Dr. J. Jayakumari	707-713
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
23.	Predictive analysis using Big data Analytics for Sensors used in Fleet Truck Monitoring System Preethi Varsha. V, Sasi Rekha Sankar, Rohit Jacob Mathew	714-719
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
24.	The Optimized data path ANN for Low power and Embedded applications. S N Prasad, S.Y.Kulkarni	720-725
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
25.	Performance of an Indirect Field-Oriented Control for Asynchronous Machine Zineb Mekrini, Seddik Bri	726-733
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
26.	Design and Verification of AMBA AHBLite protocol using Verilog HDL Sravya Kante, Hari KishoreKakarla, Avinash Yadlapati	734-741
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
27.	Design and simulation of Low Power Successive Approximation Register for A/D Converters using 0.18um CMOS Technology Kalmeshwar N. Hosur, Girish V. Attimarad, Harish M. Kittur, S. S. Kerur	742-750
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
28.	Robust MRI Brain Image Segmentation Method: A Hybrid Approach using Level Set and Fuzzy C-Means Clustering P Sudharshan Duth, Vimal Viswanath, Pankaj Sreekumar	751-758
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
29.	Low Power TPC using BSLFSR K Jamal, Dr. P.Srihari	759-767
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
30.	Integration of Big Data & Cloud Computing To Detect Black Money Rotation with Range - Aggregate Queries K. Kedharewari, V. Maria Anu, V. Rajalakshmi	768-773
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
31.	Auction Model Using RR Approach for SLA Based Resource Provisioning in Multi- Cloud Environment Naela Rizvi, Prashant Pranav, Bibhav Raj, Sanchita Paul	774-784
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
32.	SHORTEST PATH ARC LENGTH NETWORK USING TRIANGULAR INTUITIONISTIC FUZZY NUMBER A.D.CHANDRASEKARAN, K.GANESAN, S.BALAMURALITHARAN	785-790
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
33.	Modern Estimation technique for Undersea Active Target tracking K.Lakshmi Prasanna, S.Koteswara Rao, A.Jawahar, Sk.B.Karishma	791-803
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
34.	DTN ROUTING BY AVOIDING BATTERY CRITICAL CONDITIONS AND DATA LOSS AT AN INTERMEDIATE NODE Sreejith S Ambady, R Ganesan	804-811
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
35.	Tool for Measuring Coupling in Object-Oriented Java Software Mr. V. S. Bidve, Dr. P. Sarasu	812-820
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
36.	Implementation of Multi channel-Multi mode Wireless Digital SDR receiver based on Integrated Six Port Technology	821-828

	SK.MASTHANBASHA, Dr. HABIBULLAKHAN	
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
37.	Studies on the Material Removal Rate of Al-SiC Composites Machined by Powder-Mixed EDM Technique G P Anuraag, M Vijay Kumar Reddy	829-836
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
38.	Analysis of Keyword Searchable Methodologies in Encrypted Cloud Data Sk.Yakoob, Dr. V Krishna Reddy, C. Dastagiriah	837-844
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
39.	Evaluation of Various VM Based Load Balancing Procedures in Cloud Environment C. Dastagiriah, Dr. V Krishna Reddy, K.V.Pandurangarao	845-851
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
40.	Analysis of Deduplication in Secure Cloud Storage K V Pandu Ranga Rao, Dr. V Krishna Reddy, SK Yakoob	852-858
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
41.	Review of Asymmetric Key Cryptography in Wireless Sensor Networks U.SenthilKumaran, M.K.Nallakaruppan, M.SenthilKumar	859-862
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
42.	Low Power RAM-Based Hierarchical CAM on FPGA Ravvarapu Chiranjeevi komal, Musala Venkateswara Rao	863-869
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
43.	Multi-Objective Outsourcing Strategies for Functional and Fast Fashion Products in Textile Supply Chain ShaheenSardar, Young Hae Lee, Muhammad Saad Memon	870-886
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
44.	Application Method Algorithm Genetic Optimal To Reduce Losses In Transmission System I Ketut Wijaya	887-892
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
45.	Equivalence Analysis on Design and Modelling Of Capacitive Pressure Sensors with Different Structure of Diaphragm N.Nagendra Reddy, K.Spandana, N.Siddaiah, B.Manju Sree	893-898
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
46.	Co-Simulation of BLDC Motor Commutation by using MATLAB Simulink and Xilinx System generator Suneeta, R. Srinivasan, Ram Sagar	899-905
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
47.	Factors Affecting Driver Yielding Behavior at a Mid-Block Zebra Crossing Wirach Hirun	906-912
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
48.	A Study of Slip Position on Improving the Hydrodynamic Lubrication Performance of Single-Textured Bearing using a Mass Conserving Numerical Approach M. Tauviquirrahman, W. K. Ajie, E. Yohana, M. Muchammad, J. Jamari	913-921
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
49.	Optimal Tuning of Fractional Order PID Controller for Automatic Voltage Regulator System through Genetic Algorithm N.Ramesh Raju, Dr.P.Linga Reddy	922-927
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
50.	Study on the concept design process for the crashworthiness improvement of an automotive body structure using a knowledge-based database W. Y. Ki, S. J. Heo	928-937
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
51.	A Comparative Study on Sentiment Analysis and Opinion Mining Praveen Kumar, Umesh Chandra Jaiswal	938-943
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
52.	A Novel Method for Direct Extraction of Base and Collector Delay Times in HBT Salim Kerai	944-952
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
53.	DNA Sequence Alignment Using Matching Algorithm to Identify the Rare Genetic Mutation in Various Proteins Bipin Nair B J	953-957
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
54.	Image compression through high value digital components analysis and non-uniform storage of pixel bits Reza Askari Moghadam, Parviz Gharehbagheri	958-965
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
55.	Characterization and Production of Conductive Filler from Oil Palm Ash and its Performance in Epoxy Matrix Othman Mamat, Raphael Joshua Mailabari	966-973
	<a href="#">Abstract</a>   <a href="#">PDF</a>	
56.		974-981

	Dynamic Modeling of a Synchronous Generator Using T-S Fuzzy Approach Hee-Jin Lee <a href="#">Abstract</a>   <a href="#">PDF</a>	
57.	An Investigation into Cultural Dimensions of Construction Professionals Working for International Projects in Oman Byung Gyoo Kang, Cheng Zhang <a href="#">Abstract</a>   <a href="#">PDF</a>	982-987
58.	Bearing Stresses in Bolted Composite Joints with Different Contact Interactions Hilton Ahmad <a href="#">Abstract</a>   <a href="#">PDF</a>	988-994
59.	Designing Dispersion Compensating Microstructure Optical Fiber Feroza Begum, AbulKalam Azad, Saifullah Abu Bakar, Iskander Petra, Kazuya Miyagi, Yoshinori Namihira <a href="#">Abstract</a>   <a href="#">PDF</a>	995-1002
60.	Surveillance System for Early Detection of Influenza-Like Illness (ILI) Outbreaks Based on Participatory Report of Student Absences Lizda Iswari, Maftuhah Nurbeti, Firdaus <a href="#">Abstract</a>   <a href="#">PDF</a>	1003-1009
61.	Study of a silica gel-water based dual mode adsorption chiller Khairul Habib, Ahmed Askalany <a href="#">Abstract</a>   <a href="#">PDF</a>	1010-1017
62.	Thermal output analysis of a designed parabolic trough solar field for moderate temperature industrial load Rizwan Masood, Syed Ihtsham Ul-Haq Gilani, Hussain H. Al-Kayiem <a href="#">Abstract</a>   <a href="#">PDF</a>	1018-1024
63.	Easy Solar Photovoltaic Panel as Renewable Energy System Device Kalaivani D/O Ramachandran, Nur Farahdiba Binti Zulkefle, Muhammad Syafiq Bin MohdKamal <a href="#">Abstract</a>   <a href="#">PDF</a>	1025-1031
64.	Electrochemical Behaviors of Graphite in an Ethylene Carbonate-Based Electrolyte Containing Two Different Types of Film-Forming Additive Sa Rang Yoon, Soon-Ki Jeong <a href="#">Abstract</a>   <a href="#">PDF</a>	1032-1038
65.	Implementation of Green Building Incentives for Construction Key Players in Malaysia SITI ZUBAIDAH HASHIM, INTAN BAYANI ZAKARIA, NADIRA AHZAHAR, MOHD FADZIL YASIN, ABDUL HAKIM AZIZ <a href="#">Abstract</a>   <a href="#">PDF</a>	1039-1044
66.	A Literature Survey on Web Service Discovery G.Senthil Kumar, Dr.C.Lakshmi <a href="#">Abstract</a>   <a href="#">PDF</a>	1045-1052
67.	Investigations on Effect of Fuel Injection Pressure on Performance and Emissions of Linseed Blendsin a Diesel Engine AkkarajuH. Kiran Theja, Y.V.Hanumantha Rao <a href="#">Abstract</a>   <a href="#">PDF</a>	1053-1068
68.	Design and Analysis of Vertical Axis Savonius Wind Turbine S. Jagadish Venkata Sai, T. Venkateswara Rao <a href="#">Abstract</a>   <a href="#">PDF</a>	1069-1076
69.	Enhanced energy harvesting and analysis of a High Concentration Photovoltaic / Thermal System with support of Cooling fluid and Increased Mass Flow Rates A S R Murty, Chava Y P D Phani Rajanish <a href="#">Abstract</a>   <a href="#">PDF</a>	1077-1085
70.	Robust Text Extraction for Automated Processing of Multi-Lingual Personal Identity Documents Pushpa B R, Ashwin M, Vivek K R <a href="#">Abstract</a>   <a href="#">PDF</a>	1086-1094
71.	Context Aware Similarity Measure Selection: Mining of Wearable Implantable Body Sensor Network Data with Logical Reasoning Y Indu, V.Uma Maheswari <a href="#">Abstract</a>   <a href="#">PDF</a>	1095-1101
72.	Thunderstorm Algorithm for Assessing Thermal Power Plants of the Integrated Power System Operation with an Environmental Requirement A.N. Afandi <a href="#">Abstract</a>   <a href="#">PDF</a>	1102-1111
73.	An Intrusion Detection System Against UDP Flood Attack and Ping of Death Attack (DDOS) in MANET Ankur Ashok Acharya, Arpitha K.M, Santhosh Kumar B.J <a href="#">Abstract</a>   <a href="#">PDF</a>	1112-1115
74.	A Hybrid Technique for Real Time License Plate Localization with the aid of FFBPNAPSO Reji PI, Dr. Dharun V.S <a href="#">Abstract</a>   <a href="#">PDF</a>	1116-1126

75.	Fraud Detection in Banking Institutions Sruthi T.V, Dr. Prasanna <a href="#">Abstract</a>   <a href="#">PDF</a>	1127-1130
76.	Design Of Monopole Antenna With U Slot In Patch And Ground Plane Ideally Suited For Wireless Applications Diptanuprasad Chakraborty <a href="#">Abstract</a>   <a href="#">PDF</a>	1131-1137
77.	Performance and Durability Evaluation of Bamboo Reinforced Cement Concrete Beams Ankit Singh Mehra, Rajiv Ganguly, Ashok Kumar Gupta, Lav Singh, Abhilash Shukla <a href="#">Abstract</a>   <a href="#">PDF</a>	1138-1161
78.	Improved Multiple Object Detection and Tracking Using KF-OF Method Akshay S, Sajin Thomas, Ram Prashanth A <a href="#">Abstract</a>   <a href="#">PDF</a>	1162-1168
79.	Polynumeric cipher for encryption and decryption Santhosh Kumar B.J <a href="#">Abstract</a>   <a href="#">PDF</a>	1169-1171
80.	Effects of Copper Slag as Sand Replacement in Concrete M. V. Patil, Y.D.Patil <a href="#">Abstract</a>   <a href="#">PDF</a>	1172-1181
81.	Dynamic Allocation of Neighborhood Search in the Bees Algorithm Hasan Al-Jabbouli, Jean-Claude Ngatchou <a href="#">Abstract</a>   <a href="#">PDF</a>	1182-1186
82.	A Novel Process Mining for Teleclaim Insurance Process Ganesha K, Gagana J, Namratha A C <a href="#">Abstract</a>   <a href="#">PDF</a>	1187-1199
83.	Enhancement in ECODE Protocol to improve Network Life Using Single Hop Communication Nahita Pathania, Rohit Sethi, Neha <a href="#">Abstract</a>   <a href="#">PDF</a>	1200-1204
84.	Cloud Package Selection for Academic Requirements using Multi Criteria Decision Making based Modified Ant Colony Optimization Technique C.Madhumathi, Gopinath Ganapathy <a href="#">Abstract</a>   <a href="#">PDF</a>	1205-1211
85.	Unmasking Outliers in Large Distributed Databases Using Cluster Based Approach: CluBSOLD A. Rama Satish, P. Bala Krishna Prasad, D. Naga Raju, Ravi Kumar Saidala <a href="#">Abstract</a>   <a href="#">PDF</a>	1212-1222
86.	Prediction of Surface Roughness Based on Machining Condition and Tool Condition in Boring EN31 Steel P. Mohanaraman, G. Balamurugamohanraj, K. Vijaiyendiran, V.Sugumaran <a href="#">Abstract</a>   <a href="#">PDF</a>	1223-1228
87.	Fast and Effective Spatial Clustering Using Multi-Start Particle Swarm Optimization Technique K. Nafees Ahmed, T. Abdul Razak <a href="#">Abstract</a>   <a href="#">PDF</a>	1229-1237
88.	A Typical Framework for Forecasting and Trading Time Series Data Using Functional Link Artificial Neural Network Dwiti Krishna Bebartha, Ajit Kumar Rout <a href="#">Abstract</a>   <a href="#">PDF</a>	1238-1244
89.	Scalable and Trustworthy Load Balancing Technique for Cloud Environment Anurag Jain, Rajneesh Kumar <a href="#">Abstract</a>   <a href="#">PDF</a>	1245-1251
90.	Design And Development Of Medical Image Processing Techniques and to Study their Applications Using Graphical System Design in Ovarian Cancer Thangamma.N.G., Dr.S.Prasanna <a href="#">Abstract</a>   <a href="#">PDF</a>	1252-1255
91.	Adiabatic Logic Circuits Using FinFETs and CMOS - A Review Bhuvana B P, Manohar B R, KanchanaBhaaskaran V S <a href="#">Abstract</a>   <a href="#">PDF</a>	1256-1270
92.	Mining Social Networks for Analyzing Students Learning Experience and their Problems Blessy Geo.V.M, Dr. S.Prasanna <a href="#">Abstract</a>   <a href="#">PDF</a>	1271-1274
93.	BER Analysis of DFE-LMS Algorithm for Smart Antenna System Debendra Kumar Panda, SaimaShaikh <a href="#">Abstract</a>   <a href="#">PDF</a>	1275-1279
94.	KANTARA: a Framework to Reduce ETL Cost and Complexity Ahmed Kabiri, Dalila Chiadmi <a href="#">Abstract</a>   <a href="#">PDF</a>	1280-1284
95.	Modeling of Wireless Energy Transfer Circuit and Implementation of Wi-tricity System Control using Infrared and PIC Microcontroller	1285-1294

	N. R. Mohamad, A. Salleh, N. M. Z Hashim, M. Z. A Abd. Aziz, Z. Zakaria <a href="#">Abstract</a>   <a href="#">PDF</a>	
96.	Effect of Grinding Process Parameters on Surface Area Roughness of Glass fibre Reinforced Composite Laminate under Dry and Coolant Environment P. Chockalingam, Kok Chee Kuang <a href="#">Abstract</a>   <a href="#">PDF</a>	1295-1301
97.	Vulnerable Node Detection and Route Recovery in Dynamic Complex Networks with the Ant Colony Optimization ReisaDewi, Tae-Hyong Kim <a href="#">Abstract</a>   <a href="#">PDF</a>	1302-1313
98.	New Batch Mode Scheduling Strategy for Grid Computing System J.Y Maipan-uku, J. Kok Konjaang, Ayannor Issaka Baba <a href="#">Abstract</a>   <a href="#">PDF</a>	1314-1323
99.	Volatile Fatty Acids and Ammonia Levels in Local Sheep's Rumen Fluid Fed with Fermented Rice Straw Sri Hidanah, Dady Soegianto Nazar, Kusnoto Supranianondo, Romziah Sidik, Sarwoko Mangkoedihardjo <a href="#">Abstract</a>   <a href="#">PDF</a>	1324-1328
100.	Probabilistic approach for the selection of the shallow foundation's safety factor M. Mounji, A. Lahmli, L. Ouadif, K. Baba, L. Bahi <a href="#">Abstract</a>   <a href="#">PDF</a>	1329-1334
101.	Compression of EMG Signals by Super imposing Methods: Case of WPT and DCT Aimé Joseph Oyobé-Okassa, Dieudonné Abessolo Assoumou, Pierre Elé <a href="#">Abstract</a>   <a href="#">PDF</a>	1335-1343
102.	Generic Opinion Mining System for Decision Support Dr.P.G.Naik, S.S. Jamsandekar, K.S.Mahajan <a href="#">Abstract</a>   <a href="#">PDF</a>	1344-1359
103.	Aerator Performance Effectiveness to Prevent Cavitation in Steep Channel Yeri Sutopo, Budi S, Wignyosukarto, Istiarto <a href="#">Abstract</a>   <a href="#">PDF</a>	1360-1370
104.	Quality of Service based packet scheduling to support video streaming service for Next Generation Wireless Mobile Network T. A. Chavan, Dr. P. Sarasu <a href="#">Abstract</a>   <a href="#">PDF</a>	1371-1378
105.	Performance Evaluation of D-LAR Protocol in VANET Jyoti Sanyal, Sandeep Kumar Arora <a href="#">Abstract</a>   <a href="#">PDF</a>	1379-1385
106.	Determination of Loading Capacity of a Direct Solar Boiler Dryer I.A. Ikem, D. Osim-Asu, O.E. Nyong, S.A. Takim <a href="#">Abstract</a>   <a href="#">PDF</a>	1386-1396
107.	Characterization of Recycled Polypropylene Composite Material Reinforced with Wood Flour using SEPS-g-MAH as Coupling Agent M. Acevedo, A. Tapia, J. Correa, R. Ricardo, A. Realpe <a href="#">Abstract</a>   <a href="#">PDF</a>	1397-1405

**Abstract-** This study aims to determine the effects of providing suspension of *Acetobacter liquefaciens* bacterial isolate and *Geotrichum sp.* fungi isolate, as well as a mix between *Acetobacter liquefaciens* and *Geotrichum sp.* isolates extracted from the faeces of girrafes feeding on rice straw on pH value and Volatile Fatty Acids (VFA) and ammonia levels in Local sheep's rumen fluid. This experiment utilized twenty Local sheep randomly divided into four treatments where each treatment consisted of five repetitions, thus Completely Randomized Design method was applied (four treatments by five repetitions). The four treatments were T0: 60% (rice straw fermented without isolates+ 3% of urea + 3% of molasses) + 40% of concentrates, T1: 60% (rice straw fermented with *Acetobacter liquefaciens* bacteria + 3% urea + 3% molasses) + 40% of concentrates, T2: 60% (rice straw fermented with *Geotrichum sp.* fungi isolates + 3% of urea + 3% of molasses) + 40% concentrates, and T3: 60% (fermented rice straw with *Acetobacter liquefaciens* and *Geotrichum sp.* isolates + 3% of urea + 3% of molasses) + 40% of concentrates. The isolates of *Acetobacter liquefaciens* bacteria and *Geotrichum sp.* fungi were extracted from giraffes' faeces kept in Safari Park, Pandaan, East Java. At the end of this three months study, the rumen fluid was collected using a vacuum pump. The variables were then measured including pH value and the levels of VFA and ammonia. The result of the research shows that local sheep fed with rice straw fermented with suspension of *Acetobacter liquefaciens* bacteria, *Geotrichum sp.* fungi, as well as a mixture of *Acetobacter liquefaciens* and *Geotrichum sp.* experienced an increase on their pH level as well as the VFA and ammonia levels in their rumen fluid. The provision of the suspension of cellulolytic bacteria isolate mixture of *Acetobacter liquefaciens* and *Geotrichum sp.* fungi in the fermentation of rice straw yields the highest levels of acetic, propionic, butyric acids and total of Volatile Fatty Acids in Local sheep's rumen fluid.

**Keyword-** rice straw, cellulolytic bacteria, fungi, VFA, ammonia, rumen fluid.

## I. INTRODUCTION

The provision of forage plays an important role in the production of ruminants. The need for forage for ruminants is increasingly rising along with the increase in livestock population. In addition, during the dry season, forage becomes scarce to obtain and even if it does exist, it is often of poor quality. As a result, agricultural waste such as sugarcane tops, rice straw and corn straw are often used as alternative fodders by cattle breeders.

Agricultural waste such as rice straw is very abundant at harvest time although, as fodder, rice straw has numerous drawbacks due to the low levels of protein and high coarse fiber. According to the FAO-Indonesia[1], rice straw contains 28.8% crude fiber and 3.9% crude protein, making it least expected to meet cattles' basic needs. Cattle feed ingredients containing crude protein less than 7% may cause obstruction on rumen microbial activity due to the lack of nitrogen, causing less maximum carbohydrate utilization by rumen microbes, according to Crowder and Chedda[2].

Cellulolytic microbes are capable of producing 1.4  $\beta$ -glucanase endo enzyme, 1.4  $\beta$ -glucanase and  $\beta$ -glucosidase exo enzymes that can decompose raw fibers into soluble carbohydrates. Changes in the types of microbes in rumen may affect the feed's digestibility consumed by cattles and thus may affect feed intake, weight gain and milk production according to Beauchemin *et. al.* [3]. Meanwhile, a synergy between fungi and bacteria may be explained as a process in the digestion system where fungi can physically detach the surface

layer of cell walls and lignin (e.g. those on trunks or branches), making it penetrable by bacteria for further cell wall degradation according to Wang and Mc Allister [4]. Krehbiel, *et. al.* [5] that the provision of these microbes in ruminants may lower rumen acidosis, increase propionate concentration, the number of protozoa and immune response Omed, *et. al.* [6] that faeces is suspected to contain microbes derived from rumen, therefore allowing it to be an alternative source of microbial provider.

Fermentation in rumen is the result of physical and microbiological activities that transform the feed components into useful products (VFA, microbial protein, vitamin B); useless products (CH<sub>4</sub>, CO<sub>2</sub>) or harmful products (ammonia, nitrate) for host animals, according to Owen and Goetsh [7]. After a widely-spread fermentation process by microbes, the fermentation products, especially VFA and microbial protein, may be consumed by cattles, according to Bannink and Tamminga [8]. Microbial fermentation end products, especially in the forms of VFA including acetic, propionic and butyric acids are the main energy sources for ruminants; while gases such as carbon dioxide and methane are the energy residue, periodically excreted; as well as ammonia which is useful for microbial protein production. More than 80% of the energy needs of ruminant animals can be provided by VFA produced in the rumen, depending on the types of feed consumed, according to Moran [9].

This study aims to determine the effect of providing isolate suspension of *Acetobacter liquefaciens* bacteria and *Geotrichum sp.* fungi as well as a mix between *Acetobacter liquefaciens* and *Geotrichum sp.* isolates extracted from giraffes' faeces feeding on rice straw to the levels of Volatile Fatty Acids (VFA) and ammonia in Local sheep's rumen fluid.

## II. MATERIALS AND METHODS

Experimental materials were twenty heads of male Local sheep (about 12 months age), rice straw fermented with *Acetobacter liquefaciens* bacteria, rice straw fermented with *Geotrichum sp* fungi isolate, urea, molasses, and concentrates.

This research was conducted by permission of animal ethics committee Faculty of Veterinary Medicine, Airlangga University.

The experiment utilized twenty Local sheep randomly divided into 4 treatments where each treatment consisted of 5 repetitions, thus Completely Randomized Design experiment pattern structure was used (4x5 repetitions). The four treatments were T0: 60% (rice straw fermented without isolates + 3% of urea + 3% of molasses) + 40% of concentrates; T1: 60% (rice straw fermented with *Acetobacter liquefaciens* bacteria + 3% of urea + 3% of molasses) + 40% of concentrates; T2: 60% (rice straw fermented with *Geotrichum sp* fungi isolate + 3% of urea + 3% of molasses) + 40% of concentrates; and T3: 60% (rice straw fermented with *Acetobacter liquefaciens* and *Geotrichum sp.* isolates + 3% of urea + 3% of molasses) + 40% of concentrates. The isolates of *Acetobacter liquefaciens* bacteria and *Geotrichum sp.* fungi were extracted from the faeces of giraffes kept at Safari Park, Pandaan, East Java. Each sheep was given drinking water *ad libitum*. At the end of the three months study, the rumen fluid was collected using a vacuum pump. The VFA levels were observed by using *chromatography gas* and the measurement of ammonia levels of rumen fluid was observed using *Conway method*, according to General Laboratory Procedures [24]

The data obtained in this study were then analyzed using Analysis of Variants (ANOVA) statistical method while the average differences between treatments were tested using Duncan Multiple Range Test method, according to stell and Torrie [23].

### III. RESULTS AND DISCUSSION

The average values and standard deviation of pH level, ammonia and concentration in rumen fluid of sheep treated T0, T1, T2, and T3 can be observed in Table I.

TABLE I. The Average Values and Standard Deviation of pH Value, Ammonia Concentration, Acetic, Propionic, and Butyric Acid Values and the total VFA in Local Sheep's Rumen Fluid with the Treatments of Cellulolytic Bacteria and Fungi

Variables	Treatments			
	T0	T1	T2	T3
pH Value	6.80 <sup>a</sup> ± 0.14	6.81 <sup>a</sup> ±0.01	6.92 <sup>b</sup> ±0.05	6.940 <sup>b</sup> ±0.065
Ammonia Concentration N (mg/100ml)	11.55 <sup>a</sup> ±1.021	13.61 <sup>ab</sup> ±1.27	14.99 <sup>b</sup> ±2.72	15.53 <sup>b</sup> ±2.44
Acetic Acid (mmol/100cc)	77.44 <sup>a</sup> ± 2.11	123.84 <sup>b</sup> ±2.35	110.64 <sup>b</sup> ± 2.35	171.78 <sup>c</sup> ±37.87
Propionic Acid (mmol/100cc)	67.68 <sup>a</sup> ±3.61	85.91 <sup>ab</sup> ± 17.28	95.25 <sup>bc</sup> ± 9.66	114.42 <sup>c</sup> ±24.39
Butyric Acid (mmol/100cc)	41.26 <sup>a</sup> ±4.62	43.42 <sup>a</sup> ±1.03	53.71 <sup>b</sup> ±3.32	57.36 <sup>b</sup> ±14.32
Total of VFA (mmol/100cc)	186.38 <sup>a</sup> ±3.86	253.17 <sup>b</sup> ±14.47	259.60 <sup>b</sup> ±21.06	343.50 <sup>c</sup> ±71.51
Ratio of Acetate: Propionate: Butyrate	2.08:1.82:1.12	2.13:1.83 :1.02	2.45:1.69 :0.86	2.49 : 1.67 :0.83

Note: different superscripts in the same row indicate significant differences (P <0.05).

#### **pH Value of Rumen Fluid**

The acidity degree of sheep's rumen fluid (pH) treated T1, T2 and T3 has shown significantly different results. Sheep treated T2 and T3 have higher pH value in their rumen fluid than T0 and T1. The degree of acidity of rumen fluid is influenced by the type of feed consumed and the time of measurement. Feed materials containing non-structural carbohydrates will rapidly decrease the pH of rumen fluid. Low pH values after provision of concentrates is due to the fact that it is more easily fermented so that the Volatile Fatty Acid production per unit is higher than those of forage, according to Orskov and Ryle [10].

However, in this study, there has been an increase in pH value due to the fact that the feed given was in the form of rice straw and concentrates with a high content of crude fiber, resulting in low non-structural carbohydrate. This is in line with Utomo [11] that in cattle fed with rice straw basal, the pH value of rumen fluid reaches the highest at two hours after feeding, then gradually decreases 3 hours after feeding.

The result of pH value measurement in rumen fluid shows normal condition where the pH value ranges from 6.65 to 7.0. Concentrate feed will produce ruminal pH value of about 5.5 to 6.5 while fibrous feed will produce higher pH value of 6.2 to 7.0, according to Owen and Zinn [7]. According to Suharti et al. [12], constant normal rumen pH value is between 6.8 to 7.0 in a temperature of 38<sup>o</sup> C-40<sup>o</sup> C. The degree of acidity of rumen fluid is the main variable of rumen fermentation because the pH value change can alter the type of fermentation Orskov and Ryle [10].

#### **The Ammonia Concentration in Rumen Fluid**

The result of the study shows that the rumen fluid ammonia concentration of the sheep treated T1, T2, and T3 show ammonia levels of 13,612; 14,988 and 15,529mg/100ml of rumen fluid respectively, which are significantly different from T0, reaching 11,545 mg/100ml. Arora [14] that ammonia in rumen fluid is derived from the degradation of feed protein and NPN (Non-Protein Nitrogen) by proteolytic microbes.

The concentration of NH<sub>3</sub> in the hours after feeding increased to a certain level of concentration and then gradually decreased. The increase of NH<sub>3</sub> in rumen fluid was due to the accumulation of NH<sub>3</sub> resulting from feed protein degradation. The decline occurred because some of the NH<sub>3</sub> was utilized by rumen microbes for body protein synthesis and partly for the synthesis of amino acid, nucleic acid and the transportation of amino acid into cells. According to Hidayah [15], the levels of NH<sub>3</sub> in the rumen fluid of sheep fed with hay increased and reached the peak three hours after feeding, reaching 11.38mg/100ml of rumen fluid and then gradually decreasing. Fermentation cassava flour noodle waste using *Aspergillus niger* level 1%, 2% and 3% had no significant effect on VFA and had a significant effect on ammonia by *In Vitro* Indriani *et.al.* [16]

In this study, rumen fluid was collected two hours after feeding, so that the levels of NH<sub>3</sub> was still high. High level of NH<sub>3</sub> in the treatment shows that the provision of suspension of *Acetobacter liquefaciens* bacterial isolate, *Geotrichum sp.* fungi isolate and the mixture bacteria *Acetobacter liquefaciens* bacteria

and *Geotrichum sp.* fungi have caused an increase on the degradation of protein and NPN of the feed. In this study, *Acetobacter liquefaciens* bacteria are capable of altering the color on Broth urea medium from red to pink, meaning that it is able to produce urease enzyme. This is in accordance with Owen and Zinn[7] statement that ammonia in rumen fluid is the result of NPN and feed protein degradation, microbial protein degradation and urea hydrolysis entering the rumen along with saliva and are diffused through the rumen wall.

The rumen fluid ammonia levels remain within normal range which is in accordance with Owen and Zinn [7] stating that for microbial growth, ammonia is required in the level of 0.35 to 29mg/100ml of the rumen fluid while according to McDonald *et.al.* [17], the ammonia concentration of rumen fluid under normal conditions ranges from 8.5 to 30mg/100ml of rumen fluid.

#### **Volatile Fatty Acids in Rumen Fluid**

The result of the study shows that the total Volatile Fatty Acids in rumen fluid is the highest in the sheep group treated T3 while no significant difference occurred in group treated T1 and T2

The synergy between *Acetobacter liquefaciens* bacteria and *Geotrichum sp.* fungi yields fermentation products of the best Volatile Fatty Acids based on the digestibility levels of Crude Fiber (CF), Neutral Detergent Fiber (NDF) and Acid Detergent Fiber (ADF). If the digestibility levels of CF, NDF and ADF are high, the conversion of energy resources into VFA products in the rumen will increase respectively so that the energy formed in the metabolism in the body will produce acetic, propionic and butyric acids in an adequate amount for the sheep to grow.

The rumen fluid was collected two hours after feeding so that the VFA levels were still relatively high. According to Perry [18] , Volatile Fatty Acids are the end product of carbohydrate or protein fermentation and are primary products in the fermentation process of monosaccharides in the rumen making it the main energy sources for ruminants. Furthermore, according to Utomo[11] , in basal hay feeding substituted with 15% of fine bran, the increase in VFA levels in rumen fluid occurs two hours after the supplementation. After two hours, the VFA concentration begins to decrease although at the levels of 25% and 35% of fine bran supplementation, VFA concentrations remain high until four hours afterwards. Supplementation of the protected flaxseed oil increased total VFA and proportion of propionic acid concentration as a potential energy source for the cattle. This result indicated that supplementation of protected fat did not disturb microbial activity in feed fermentation, according to Suharti *et. al.*[12]

The highest acetate acid level is in the sheep group provided T3, followed by the group provided T1 which does not have significant differences from the group provided T2. However the result shows a significant difference from T0. Chen *et.al.* [25] reported that the increasing of concentrate level from 20% to 50 % in the ration decreased the molar proportion ruminal acetic acid from 68.45% to 66.22%.

The highest propionic acid level occurs in the group provided T3 which is not significantly different from the group provided T2. Serment *et. al.* [26] reported that the increasing of concentrate level from 35 up to 705 in the ration increased the ruminal propionic acid from 18.0 to 24.1mol/100 mol during 10 weeks of investigation.

The highest butyric acid level occurs in T0 and is not significantly different from those provided T2 while the lowest level of butyric acid occurs in the group treated T3 which is not significantly different from the group provided T1. Widiyanto *et. al* [27] reported that the feeding field grass in pellet form for male Java Thin Thin sheep, increased the ruminal propionic acid molar proportion and decreased ruminal ratio of acetic acid : propionic acid.

The ratio of VFA acids from the highest to the lowest is acetic acid, propionic acid, and butyric acid respectively. According to Hume [19] , feeding basal feed in the form of hay produces the highest proportion of acetic acid, although the supplementation of granule concentrates reduces the proportion of acetic acid as the higher the level of concentrate provision, the higher the proportion of propionic acid. The high proportion of acetic acid in this study occurred because the feed given was in the form of rice straw and concentrates with high coarse fiber content.

Tillman *et. al* [21] found the main result of carbohydrate hydrolysis in the rumen is glucose that will be fermented into VFA as the main energy source for ruminants. McDonald *et.al.* [17] that VFA are mostly composed of acetic acid (C<sub>2</sub>), followed by propionic acid (C<sub>3</sub>) and butyric acid (C<sub>4</sub>). Acetic acid is used in forming body fat and milk fat, while propionic acid is the source of glucose in blood. Czerkawski [22] that acetic and butyric acids are synthesis precursors of milk fat and body fat whereas propionic acid is the precursor of body fat. Therefore, in the effort of cattle fattening, the latter fermentation orientation is expected. The total and composition of VFA of CRM-treated rumen liquor were significantly different (P<0.05) compared to that of rumen liquor of Control (ie. the total VFA: 85.3 vs 73.5 mM and the percentage of acetic acid: 67.8 vs 60.3%). It is concluded that CRM treatment resulted in positive effects on growth of ruminant fed high fibrous forages such as rice straw and could lower enteric methane production, according to Thalib *et.al.* [20] .

#### IV. CONCLUSION

The provision of the suspension of cellulolytic bacteria isolate mixture of *Acetobacter liquefaciens* and *Geotrichum sp.* Fungi (T3) in the fermentation of rice straw yields the highest levels of acetic, propionic, butyric acids and total of Volatile Fatty Acids in Local sheep's rumen fluid.
