AKSHYA ALVADA, H N GOPLA KRISHNA, RAMYA KATEEL, CHARISHMA P R, MOHANDAS RAI, HARSHA S NAID

ANTHELMINTIC ACTIVITY OF TRACHYSPERMUMAMM(L)EXTRACT

AISHWARA K. APTE, V. S. KHOT, N. S. BIRADAR, S. B. PATIL

STUDIES ON FORMULATION AND EVALUATION OF OSMOTICALLY CONTROLLED DRUG DELIVERY SYSTEM OF CARBAMAZEPINE

PANCHAXARI MALLAPPA DANDAGI, CHIRAG PRAKASHBHAI PATEL, ROHIT SHARMA, ANAND PANCHAKSHARI GADAD, VINAYAK MASTIHOLOMATH PREPARATION AND IN VITRO BIOLOGICALLY SOLUBLE DISPERSOROS TABLETS BY HYDROXY PROPyl BETA CYCLODEXTRIN COMPLEXATION

PANCHAXARI MALLAPPA DANDAGI, SURYASRI LAVANYA ADADI, SEEPARANARI RATH, ANAND PANCHAKSHARI GADAD PREPARATION AND COMPARATIVE EVALUATION OF LIQUISOLID COMPAK AND SOLID DISPERSION OF CANDESTANT CILEXETIL

AHMED A. ABDUL ABBAS, ALAA A. ABDUL RASOOL, NAWAL A. RAJAB EFFECT OF CALCIUM, ALFACALCICOL AND HEMODIALYSIS ON SECONDARY HYPERPARATHYROIDISM

A. SHOPIT, ADNAN AL-ADHL, ABDUL-KARIM SHEIBAN, M. AMOOD AL-KAMARANY

HEPATOPROTECTIVE ACTIVITY OF KIRGANELIA RETICULATA POIR. (BAILL) ROOT AGAINST PARACETAMOL INDUCED HEPATO-TOXICITY IN Wistar Rats

RAJESH KUMAR SONI, RAGHVUVEER ICHRHAIAVI,VIHANGESH DIXIT, ZAHID AHMAD BHA, HILAL AHMAD WANI, ASHIQ HUSSAIN NAJAR

ALLERGIC REACTION OF P-PHENYLENEDIAMINE ON SKIN

ANISHA BRIGIT SHAJAN
SINGLE NUCLEOTIDE POLYMORPHISM (SNPS) ANALYSIS OF MU-OPIOID RECEPTORS (OPRM1) USING DENATURING HIGH PERFORMANCE LIQUID CHROMATOGRAPHY (DHPLC) AMONG THE INTRAVENOUS DRUG USERS  281-287

TEH LK, BANNUR Z, ZAKARIA ZA, FAZLEEN HMH, SALLEH MZ, MOHD ZAKI SALLEH

METABOLOMICS AND PHARMACOGENETICS BASED 5-FLUOROURACIL MONITORING IN COLORECTAL CANCER PATIENTS  288-295

BANNUR Z, SALLEH MZ, HASHIM H, HENNESSY T, AZMI MN, ZAILANI MH, RAMASAMY P, ZAKARIA ZA, S SUNEET, H NGOW, G HENRY, TEH LK

PHYSICAL CHARACTERISTIC AND VIABILITY OF LACTOBACILLUS ACIDOPHILUS MICROPARTICLE USING HPMC K100LV AND HPMC K4M AS MATRIXES  296-298

SUGIARTONO, DIKE BAGUS PAMUJII, AGIL ANTONO, IDHA KUSUMAWATI, ISNAENI

PRELIMINARY PHYTOCHEMICAL SCREENING AND INVITROANGIOTENSION ACTIVITY OF BIOACTIVE COMPOUND - STEROID ISOLATED FROM SARGASSUM ILICIFOLIUM  299-301

S. FAROOK BASHAC. MUTHUKUMAR

DEVELOPMENT AND VALIDATION OF A GC/FID METHOD FOR IDENTIFICATION AND QUANTIFICATION OF MAIN COMPONENTS OF SATUREIA MONTANAL. ESSENTIAL OIL  302-306

ENTELA HALOCI,VLIMA TOSKA, SILVIA VERTUANI, AGRON METO, ENKELEDJA GOCI, ENVER MUSTAFATJ, STEFANO MANFREDINI

METHOD DEVELOPMENT AND VALIDATION FOR THE SIMULTANEOUS QUANTITATIVE ESTIMATION OF CALCIUM DIBESILATE AND TROXERUTIN IN TABLETS BY REVERSE PHASE HPLC  307-311

N.J.R. HEPSEBAY, P. PADMA, A. ASHOK KUMARS

DEVELOPMENT AND VALIDATION OF RP-HPLC AND HPTLC METHOD OF ANALYSIS FOR SIMULTANEOUS ESTIMATION OF AMBROXOL HCL, DEXTROMETHORPHAN HBR AND GUAFENESIN IN PHARMACEUTICAL COUGH COLD PREPARATION AND STATISTICAL COMPARISON OF DEVELOPED METHODS  312-316

KRUNAL SAGATHIYA, HINA BAGADA

AN EPIDEMIOLOGICAL SURVEY ON PREVALENCE OF OBESITY AND DISEASES BURDEN IN COMMON PUBLIC  320-322

G. LAKSHMI DURGA, CH.JHANSI, VRAGHU RAM, RAMA RAO NADENDLA

ANTIOXIDANTANT ANTICANDIDAL ACTIVITY STUDIES ON PHYLLANTHIN COMPOUND FROM PHYLLANTHUS NIRURI  323-326

ANISHA JR, REMYA RV, SASI PREMLA JM, ALBIN T FLEMING

DETERMINATION OF BIOACTIVE COMPONENTS OF THE LEAVES OF COCCULUSHRISUTUS(L.) DIELS USING GC-MS ANALYSIS  327-329

MUKESH KUMAR MEENA, NEELAM SINGH AND VIDYA PATNI

MICROBIOLOGICAL ANALYSIS OF TOPICALS AVAILABLE IN BANGLADESH  330-332

JWEL RANA, TOHURA SULTANA, KAMAL KANTA DAS, RASHED NOOR

CYTOTOXIC AND APOPTOTIC NATURE OF MIGRASATIN, A SECONDARY METABOLITE FROM STREPTOMYCES EVALUATED ON HEPG2 CELL LINE  333-338

VINAVAGAM RAMBABU, S. SIBA, PMA NIKANDAN, SUBURAMANIAM VIJAYAKUMAR

EVALUATION OF ANTULCER AND IN-VITRO ANTIOXIDANT ACTIVITIES OF IXOARACOCINEFLOWERS AND POLYHERBAL EXTRACT IN WISTAR ALBINO RATS  339-344

PATTIBANDLA NAESHI BABU, NAGARAJU B, VINAY KUMARI

TOXICITY PROFILE OF CINNAMON OIL BASED DRUG DELIVERY SYSTEM IN OREOCRISMOMOSAMBUSICUS (TILAPIA)  345-350

M. JOYCE NIRMALA, JOHN THOMAS, ANDREW EBEZIER, SRIVATSAVA VISWANADHA, AMITA V MUKHHERJEE, N. CHANDRASEKARAN

SYNTHESIS, CHARACTERIZATION AND EVALUATION OF ANTI-INFLAMMATORY ACTIVITY OF SOME NOVEL SUBSTITUTED L-ARGININE ANALOGUES  351-354

S. K. ARIFA BEGUM, M. MADHURI, K. BHARATHI, KVS. PRasad, A. RAJANI, K. HEMAMALINI, K. RUPA

ANTIPYRETIC ACTIVITY OF SOME SYNTHESIZED NOVEL L-ARGININE ANALOGUES (PEPTIDES)  355-356

SK. ARIFA BEGUM, M. MADHURI, A. RAJANI, K. HEMAMALINI

ANTIOXIDANT ACTIVITY AND QUANTITATION OF PHENOLIC COMPOUNDS OF EUPHORBIA ECHINUS  357-360

FATIMA AZZAHRA LAHLOU, FOUIZA HMID, MOHAMMED LOFTI, NOUreddine BOURHIM

INHIBITION OF CALCIUM OXALATE (CAOx) CRYSTALLIZATION IN VITRO BY THE EXTRACT OF BEET ROOT (Beta Vulgais L)  361-365

R. SARAVDA, N. GEETHA

FABRICATION OF MACHINERY FOR CONTINUOUS FORMATION OF THIN SHEET OF WOUND DRESSING MATERIAL  366-368

VIJAYAN SUMATHI, THOTAPALLI PARVATHALESWARA SASTRY, RETHINAM SENTHILCHANDRABABU SHANTHI

FORMULATION DEVELOPMENT, STANDARDIZATION AND ANTIMICROBIAL ACTIVITY OF AGERATUMCONYZOIDEZ EXTRACTS AND THEIR FORMULATION  369-374

RAJMANI PRAJAPATI, SUNITA ROY, SUDEEP MISHRA, S.K. RAZA AND L.K. THAKUR

FORMULATION AND EVALUATION OF FLUEBIPROFEN SOLID DISPERSION  375-384

AHMED LAITH DR. SHAIMAA N. ABD AL HAMIDALAA A. ABD ALRAASOOL

PURIFICATION OF STREPTOCOCCUS PNEUMONIAE CAPSULAR POLYSACCHARIDES USING ALUMINIUM PHOSPHATE AND ETHANOL  385-387

CHANDRASHEKAR MACHAARAVINDALAVARAMASWAMY NANNA

EFFECTS OF CENTELLAASIASTICA L., CURCUMA LONGA L., AND STROBLANTHESCRISPSUS L. EXTRACTS ON 3 KIDNEY CELL LINES: IN VITRO CYTOTOXICITY ANALYSIS  388-392

H. HANASH, M.L. MOHDZAMI, M. SUHAILA, M.N.HAKIM

EVALUATION OF DRUG CANDIDATURE OF SOME QUINAZOLINE-4-(3H)-ONES AS INHIBITOR OF HUMAN DIODHYROFOLATE REDUCTASE ENZYME: MOLECULAR DOCKING AND IN SILICO STUDIES  393-400

BIPRANSH KUMAR TIWARY,RAVI KANT PATHAK, KIRAN PRADHAN, ASHIS KUMAR NANDA, ASIM KUMAR BOTHRA, RANADH IR CHAKRABORTY

FORMULATION AND EVALUATION OFRANITIDINE HYDROCHLORIDES FLOATING IN SITU GEL  401-405

MILAD JAWAD HASAN, BALKIS AHMED KAMAL

POTENT VITROCOLLAGEN BIOSYNTHESIS STIMULATING AND ANTIOXIDANT ACTIVITIES OF EDIBLE MUSHROOM VOLVARIELLA VOLVACEA (BULLIARD EX FRIES) SING AQUEOUS EXTRACT  406-412
WARINTORN RUKSIRIWINANCH, JAKKAPAN SIRITHUNYALUG, KORAWINICH BOONPISUTTINANT, PENSAK JANRAWUT
EVALUATION OF IN-VITRO ANTIOXIDANT ACTIVITIES OF PTERIS BAURITA L. 413-421

NISHIKA JAISHEE, USHA CHAKRABORTY
DEVELOPMENT AND VALIDATION OF LC-MS/MS METHOD FOR THE SIMULTANEOUS QUANTITATIVE ANALYSIS OF OXCARBAZEPINE AND ITS METABOLITE 10-HYDROXYCARBAZEPINE IN KZEDTA PLASMA 422-429

KASHIF UL HAQ, NITESH KUMAR
DEVELOPMENT AND VALIDATION OF A ULTRA PERFORMANCE LIQUID CHROMATOGRAPHIC METHOD FOR ASSAY OF CETIRIZINE DIHYDROCHLORIDE 430-432

P. RAVI KUMAR REDDY DR. V. KRISHNA REDDY, E. SASIKIRAN GOUD Y. RAMACHANDRA REDDY
FORMULATION AND EVALUATION OF EXTENDED RELEASE METFORMIN HYDROCHLORIDE BEADS 433-441

MOHAMED M. NAFADY, KHALED M ATALLA, MOHAMED A SAVED
DEVELOPMENT AND VALIDATION OF A ULTRA PERFORMANCE LIQUID CHROMATOGRAPHIC METHOD FOR ASSAY OF MEBEVERINE HYDROCHLORIDE 442-445

PRIAVI KUMAR REDDY, DR. V. KRISHNA REDDY, E. SASIKIRAN GOUD, Y. RAMACHANDRA REDDY
STABILITY INDICATING RP-HPLC METHOD DEVELOPMENT AND VALIDATION FOR THE SIMULTANEOUS ESTIMATION OF EPROSARTAN MESYLATE AND HYDROCHLOROTHIAZIDE IN BULK AND TABLET DOSAGE FORM 446-451

SHARANYA GUMULAPURAM, SRIDHAR THOTA, VENISETTY RAJ KUMAR, VIJAY KUMAR NAGABANDI
COMPARISON OFSSUPPRESSIVE ACTIVITY OF THE CENTRAL NERVOUS SYSTEM FROM THE NEW DERIVATIVES N-BENZOYLPHENYLUREA 452-455

BAMBANGTRI PURWANTO
DEVELOPMENT AND VALIDATION OF STABILITY INDICATING RP-HPLC METHOD FOR THE ESTIMATION OF NEUROLEPTIC DRUG ZOTEPINE IN BULK AND TABLET DOSAGE FORM 456-459

SHRUTHI KOLAGANI, SRIDHAR THOTA, VENISETTY RAJ KUMAR, VENUMADHAV NEERATI
IDENTIFICATION OF MYCOLIC ACIDS OF MYCOBACTERIUMTUBERCULOSISBY GAS CHROMATOGRAPHY-FLAME IONIZATION DETECTOR 460-464

ASRI DARMAWATI, DEBY KUSUMANINGRUM
SYNTHESIS AND BRINE SHRIMP LETHALITY TEST OF SOME BENZOXAZINE AND AMINOMETHYL DERIVATIVES OF EUGENOL 465-467

MARCELLINO RUDYANTO, JUNI EKOWATI, TRI WIJIANDANI AND TOSHIO HONDA
DRUG-EXCIPENTS COMPATIBILITY STUDIES OF NICORANDIL IN CONTROLLED RELEASE FLOATING TABLET 468-475

ABDUL BAAQUE AHMED, LILA KANTA NATH
ANTIOXIDANT ACTIVITY OF PROTEINS FROM FIFTEEN VARIETIES OF LEGUME SEEDS COMMONLY CONSUMED IN INDIA 476-479

C. PETCHIAMMAL, WAHEETA HOPPER
THE DEVELOPMENT AND VALIDATION OF A CHIRAL HIGH PERFORMANCE LIQUID CHROMATOGRAPHY METHOD FOR THE IDENTIFICATION AND QUANTIFICATION OF (R)-ENANTIOMER IN 7-ETHYL-10-HYDROXYCAMPTOTHECIN (SN-38) 480-486

ARALA VENKATESHWARLU1,2, A. V. RAMA RAQ, K. MUKKANTI AND S. V. SUBBA REDDY
TOXICITY OF MAGNESIUM OXIDE NANO PARTICLES IN TWO FRESH WATER FISHES TILAPIA (OREOCROMIS MOSSAMICUS) AND ZEBRA FISH (DANIO RERIO) 487-490

JOHN THOMAS, S. VIJAYAKUMAR, S. THANIGAVEL, AMITAVA MUKHERJEE, NATARAJAN CHANDRASEKARAN
HEPATOPROTECTIVE ACTIVITY OF METHANOL EXTRACT OF STEM BARK OF PROSOPISCRINERARIA LINN AGAINST CARBON TETRACHLORIDE INDUCED HEPATOMERGENCY 491-493

VELMURUGAN V, ARUNACHALAM G
A COMPARATIVE STUDY OF ANTIOXIDANT ACTIVITY OF BACCOPA MONNIERI (L.) PENNELL USING VARIOUS SOLVENT EXTRACTS AND ITS GC-MS ANALYSIS 494-498

B SUBASHRI, Y JUSTIN KOIL PILLAI
FLURBPROFEN FAST DISINTEGRATING TABLETS 499-505

AMAL S. M. ABU EL-ENIN
OPTIMIZATION OF ANTIBIOTIC PRODUCTION BY MARINE ACTINOMYCETES STREPTOMYCES SP. KOD10 506-510

S. FEBINA BERNICE SHARON, RACHEL REGI DANIEL AND R. SHENBAGARATHAI
NEW QUINAZOLIN-2,4-DIONES FROM (2,4-DIOXO-1,4-DIHYDRO-2H-QUINAZOLIN-3-YLAMINO) ACETIC ACID HYDRAZIDE 511-514

MAMDOUH ADLY HASSAN, AHMED MOHAMED MOSALLEM YOUNES, MOHAMED MOBARK TAH,SAVED MOUSTAFA ABOUDYAND ABOU-BAKR HAREDI ABDEL-MONSEF
FORMULATION AND IN VITRO EVALUATION OF DIACERIN LOADED NIOSOMES 515-521

RANDA M. ZAKI, ADEL A. ALI, SHAHIRA F. EL MENSHEWY AND AHMED ABDL BARY
PHARMACOLOGICAL SCREENING AND EVALUATION OF ANTI-PEPTIC ULCER PROPERTY OF LEAVES OF ARTOCARPUISINTEFIFOLIA 522-524

NEHA SHARMA, RAHUL P.K. MISHRA
BACILLUS SP MEDIATED EXTRACELLULAR SYNTHESIS OF SILVER NANOPARTICLES 525-527

K. VITHIYA, RAJENDRAN KUMAR, SHAMPA SEN
IN SILICO SCREENING OF CARDIOPROTECTIVE ACTIVITY OF SOME FLAVONOLS 528-531

MONJUR AHMED LASKAR, MANABENDRA DUTTA CHOUDHURY, PANKAJ CHETIA
FORMULATION DEVELOPMENT AND CHARACTERIZATION OF NISOLDIPINE FAST DISSOLVING TABLET 532-535

ANNA BALAJI, MEER ISMAIL ALI
IDENTIFICATION OF LEAD COMPOUNDS WITH COBRA VENOM NEUTRALISING ACTIVITY IN THREE INDIAN MEDICINAL PLANTS 536-541

N.C. NISHA, S. SREEKUMAR, C.K. BHU, P. P. KRISHNAN
PREPARATION AND CHARACTERIZATION OF PHENTOIN SODIUM NIOSOMES FOR ENHANCED CLOSURE OF SKIN INJURIES 542-546

AHMED M. ABDELHALEEM ALI, HATEM A. SARHAN AND TAREK MAGDY
ANTIHYPERTENSIVE EFFECT OF WHEATGRASS ON ALCOHOL AND ΔPUFA INDUCED LIVER TOXICITY IN MALE ALBINO WISTAR RATS 547-551
VARALAKSHMI DURAIKAJ, GARIMA SHAKYA, RUKKUMANI RAJAGOPALAN
DEVELOPMENT AND CHARACTERIZATION OF CO-GROUND MIXTURES AND SOLID DISPERSIONS OF ARIPIPRAZOLE WITH HYDROPHILIC CARRIERS
552-557

MUNEERA BEGAM, D V GOWDA, VISHNU DATTA M, ARAVINDARAM S, SIDDARAMIAH H
PALLIATIVE EFFECT OF CURCUMIN ON STZ-INDUCED DIABETES IN RATS
558-563

REHABKAMEL, AMEL ABD ALLAH HASHIM, SAHAB AB EL MOHSEN ALI
MEDICATION ADHERENCE TO ANTIDIABETIC THERAPY IN PATIENTS WITH TYPE 2 DIABETES MELLITUS
564-570

MANJUSHA SAJITH, MADHU PANKAJ, ATMATAM PAWAR, AMIT MODI, RONAK SUMARIYA
BALANCING ANTI-AMYLLOID AND ANTI-CHOLESTERASE CAPACITY IN A SINGLE CHEMICAL ENTITY: IN-SILICO/DRUG DESIGN
571-574

PAVPADAI PARASURAMAN, RAMALINGAM SURESH, DHANARAJ PREMNATH
FORMULATION AND EVALUATION OF ANTIBACTERIAL ACTIVITY OF A HERBAL OINTMENT PREPARED FROM CRUDE EXTRACTS OF AEGLE MARMELOS, (BAEL)
575-579

JAYESH MHTARE, SMITA NAGARAL, SHRADDHA KULKARNI
A STUDY ON THE ADVERSE EFFECTS OF ANTICANCER DRUGS IN AN ONCOLOGY CENTER OF A TERTIARY CARE HOSPITAL
580-583

KIRTHI C, AZRA AFZAL, MOINKA REDDY, SYED AAMIR ALI, APRAPA YERRAMILLI, SANJEEV SHARMA
STABILITY INDICATING CHIRAL HPLC METHOD FOR THE ESTIMATION OF ZALToprofen ENANTIOMERS IN PHARMACEUTICAL FORMULATION
584-587

BYRAN GOWRAMMA, SUBRAMANIAM NAINAR MEYyanathan, SUBRAMANIAM GOMATHY, BASAWAN BABU, NAGAPPAN KRISHNAVENI, BHOJRAJ SURESH
PREPARATION, EVALUATION AND COMPARISON OF LIPID BASED DRUG DELIVERY SYSTEMS OF TACROLIMUS
588-591

PRANAV PATEL, TEJAL MEHTA, SHITAL PANCHAL
PREPARATION AND EVALUATION OF NYSTATIN LOADED-SOLID-LIPID NANOPARTICLES FOR TOPICAL DELIVERY
592-597

LAITH HAMZA SAIMIN
COMPARISON OF TOTAL PHENOLIC CONTENT OF SOME SELECTED INDIGENOUS GARCINIA SPECIES FOUND IN ASSAM
598-601

ANTIDIABETIC AND HYPOLIPIDEMIC ACTIVITY IN STEM OF JATROPHA GOSSYPIFOLIA L. (ORIGINAL ARTICLE)

NEHA RAHUJA, AKANSHA MISHRA, RAKESH MAURYA, MAHENDRA NATH SRIVASTAVA, AKHILESH KUMAR TAMRAKAR, SWATANTRA KUMAR JAIN, ARVIND KUMAR SRIVASTAVA
ABSTRACT

Objective: *Lactobacillus Acidophilus* is widely used in food supplement that requires viability in the range of 10^6 – 10^8 CFU/g. This microbe is not stable in acidic conditions and has been reported that the number of their colonies in fermented milk products decreased by 5 logs in acidic solution. In the other side, the probiotic microbe is required to survive GI tract passage and remains viable. In order to maintain their viability and increase their stability in such environments, *Lactobacillus Acidophilus*, were entrapped in HPMC K100LV as a protectant using microencapsulation technique.

Methods: The *Lactobacillus acidophilus* cells were inoculated in MRS broth media at 37 °C for 48 hours. A number of cell (more than 10^8 CFU/ml) was suspended in 10% milk solution. The cultures were then cooled at 20°C for about 12 hours, and subsequently mixed with suspension of HPMC K4M 0%, 0,3%, 0,5%, 0,8% and HPMC K100LV 0%, 0.5%, 1% and 1.5%. The mixtures were then dried using spray drying method. The Physical characteristics of the microparticles and the viability of the microbe in the microparticles were evaluated, including the microparticle morphology, size and moisture content. The viability was measured by Total Plate Count method.

Results: showed that all microparticles exhibited spherical shape with the size in range of 6,0 – 8,0 µm. The moisture content was in range of 8,0 – 10,0 %. The highest viability was obtained by formulation of HPMC K100LV 1% and HPMC K4M 0,3%.

Conclusion: of this study is that HPMC K100LV and HPMC K100M are good matrices for probiotic microcapsule on the basis of the physical characteristics and the microbe viability (probiotic viability > 10^7 CFU/g).

Keywords: *Lactobacillus acidophilus*, HPMC K100LV, HPMC K4M, Physical characteristics, Viability

INTRODUCTION

Most of the comensal bacteria, which are more than 2000 species live in human intestinal area and provides health benefits to the host, because of the improved microbial balance in the intestine. They are from two procaryotic microorganisms, i.e. *lactobacillus* and *bifidobacterium* with their various different species. The intestinal microbial colonization starts at birth and continues during the subsequent phases of life that form an individual intestinal microbiota. Such microorganisms are known as probiotics [1,2,3,4].

It has been generally accepted that the probiotics exerts health benefits if their minimum count is about 10^6 CFU per g of food per consumption [5]. They should survive GI tract passage and adhere to the intestinal mucosa or other target sites in GIT [4]. It has been known that there were significant reduction of the number of living microorganisms in GIT. The reduction process in gastric juice was a pH dependent where the pH of gastric juice is ranging from 1 to 4. It was reported that pH plays an important role in cells death. There were 3,5 and 2,2 log reduction on the viability after *lactobacillus acidophilus* were inoculated for 90' in simulated gastric juice at pH 1,5 and 2,5 respectively [6,7]. Another research reported that *lactobacillus* and *bifidobacterium* sp. lost more than 90% after have been exposed to simulated gastric juice at pH 2 [6,7,8].

*Lactobacillus acidophilus* is widely used regarding to the health benefitting effect. *Lactobacillus* are extensively incorporated into yoghurts, cultured milk drinks, cheese or as dietary supplements in the form of dried dosage forms, [1,0,11]. Entrapment of living cells in a matrix called microencapsulation is a method used for protection of the immobilized materials as well as for a controlled release in intestinal mucosa. The outer layer or the wall of the microcapsule will protect the cell against moisture, heat, strong acidic and other extreme conditions during storage, manufacturing as well as during digestion Microencapsulation method has a lot of advantages, including the protection effect from mixture, heat or other extreme conditions. However, it still causing significant cell death, since most common encapsulapatation method uses spray-drying that involves heating [11,12,13]. The microencapsulation method, allow the incorporation of *Lactobacillus acidophilus* and another probiotic microorganism, in which a polymer acts as outer layer or protectant [12,13]. A number of microencapsulation techniques including: spray drying, inclusion complication, extrusion, co-crystallization and gel entrapment (extrusion, emulsification, coacervation). Spray-drying (dehydration method) has been offered widely used in industries among other cell preservation methods, because it is cheaper, cost effective and suitable for a large-scale production. The cost effectiveness of spray drying was estimated to be six time cheaper per kilogram compared to freeze drying [14]. The disadvantage of this method is that many microorganisms can not tolerate the drying process due to the high heat involved. Other factors that may affect the survival during spray-drying process are the type of the strain, growth phase, protective medium used, outlet temperature of spray-drier and pre- treatment of the culture. [13,14] This study investigated the use of HPMC K100LV (0%, 0,5%, 1% and 1,5%) and HPMC K4M (0%, 0,3%, 0,5% and 0,8%) as protectant. The used of HPMC to enhance probiotic survival through heat treatment has been studied previously. HPMC is safe, nonionic polymer that minimize interaction problems when they are used in acidic, basic, or other electrolytic system. They can be used for preparing formulations with water soluble or insoluble drugs and at high or low doses. [15]. The polymer is therefore useful for the cell because it assist the adaption of microbe to the environment. Furthermore the polymer reduces the osmotic differences between the cellular internal compartment and the environment. In this study, a dried probiotic powder was produced using spray drying methods with temperature of 60°C.

MATERIALS AND METHODS

Materials

*Lactobacillus acidophilus* was obtained from Microbiology Laboratorium-Brawijaya University, Indonesia.

HPMC K4 M and HPMC K100LV (Pharmaceutical Grade) were purchased from PT. Laytim Zecca. *De Man Rogosa Sharpe* (MRS) broth media was purchased from...
Methods

1. Preparation of Spray Dried Milk-Probiotic –HPMC K4M

The Lactobacillus acidophilus cell in amount of 1 ose were inoculated in MRS broth media at 37 °C for 48 hours. The number of cell should be more than 10^6 cfu/ml and suspended in 10% milk solution. The cultures were then cooled at 20°C for about 12 hours, and subsequently mixed with suspension of HPMC K4M 0%, 0.3%, 0.5%, 0.8% and HPMC K100LV 0%, 0.5%, 1% and 1.5%.

The mixture was then dried using spray dryer (Lab-Plant SD-Basic Spray Dryer)

Physical Characterizations

1. pH measurement

The pH of the milk and milk-probiotic was measured using a pH meter SCHOTT glass mainz, CG 842 type.

Table 1: Composition of Probiotic Microparticle with HPMC K4M and PMC K100LV as a matrix

2. Viscosity measurement

The viscosity of the milk and milk probiotic was measured using VT-04 viscometer

3. Moisture content determination

The moisture content of the microparticles was determined using Moisture Analyzer HB43-S Metler Toledo

4. Size and morphology of probiotic microparticles

The size of microparticles was measured using optical microscope. The morphology of the particles was visualized using SEM (FEI-type:inspect S50).

Viability measurement

Viability of lactobacilli in milk (before spray drying) and in microparticle (after spray drying) was assessed using MRS media. 1 ml probiotic milk or 1 gram microparticle was mixed with 9 ml sterile Phosphate Buffer Salin (PBS) solution. A serial dilution of 10^-1 10^-2 10^-3 10^-4 10^-5 10^-6 10^-7 10^-8 and 10^-9 of this suspension was made and then spread on the MARS agar, and incubated at 37 °C for 24 hours. The viability of the probiotic was reported as TTC (cfu/ml or cfu/g) and survivability (N/No x 100%).

Statistical analysis

One Way ANOVA with Honestly Significant Difference (HSD) Tukey was used to analyze the results. Confidence limits of 95% (α = 0.05) were used to determine statistical significance.

RESULT AND DISCUSSION

The results showed that the fermented milk has a lower pH compared to the non-fermented milk (p<0.05) (Table 2). The decrease of pH indicated that there were accumulation of lactic acid and acetic acid as a result of lactose metabolism. Lactobacillus acidophilus has an ability to metabolize lactose to lactic acid, acetic acid and CO2. The viscosity data showed that milk-probiotic had a greater viscosity than normal milk. It indicated that microorganisms in the milk contribute the solid component and resulted in increasing viscosity. Spray dried powders of lactobacillus acidophilus-containing microparticle with HPMC has a mean size higher than microparticle without HPMC, and increasing HPMC concentration resulting in increasing particle mean size.
that rate of evaporation was not proportional to the rate of film formation.

The data obtained in this study showed that all microparticle had moisture content greater than recommended range, i.e. 2.80% – 5.60% [13] and the moisture contents increased with the greater matrix concentration (Table 3). This can be explained that the matrix used (milk and HPMC) exhibited a higrosopic properties. The drying temperature, 60°C was too low and was not necessary in regards to fulfill the recommended moisture content.

The morphology of microparticle (SEM image, Fig. 1) showed that the microparticles was spherical and have a rough surface.

### Fig. 4: Viability (%) of Lactobacillus acidophilus in the microparticle using HPMC K100LV and HPMC K4M as a matrix

Table 4 and 5 showed the viability (cfu) and percentage survival (%) of Lactobacillus acidophilus probiotic. The data indicated that viability of microparticles was lower than probiotic milk (before spray dried). There was a viability reduction by approximately 20%. The viability reduction of microparticle compared with probiotic milk can be explained as a result of heating process during spray drying.

No significant difference (p > 0.05) were obtained between Lactobacillus Acidophilus viability of HPMC K100LV 0% and 0.5%, HPMC K4M 0% and 0.3%. It showed that both polymers have an equal protective effect when using HPMC K100LV 0.5% and HPMC K4M. The profile of Lactobacillus acidophilus viability in HPMC K100LV group was different from HPMC K4M group [Statistically]. In HPMC K4M group, the greater the concentration, the greater the viability. It can be explained: that increasing HPMC concentration will result in increased viscosity and increasing microbe entrapment. During the viability test process, part of the cell still entrapped. However, it was still higher than 10^7 cfu/g (3.30 x 10^7 cfu/g).

### CONCLUSION

1. Lactobacillus Acidophilus microparticle using HPMC K100LV and K4M as a matrices has a spherical and rough, and the particle size ranging from 6.0 to 8.0 µm.
2. Lactobacillus Acidophilus microparticle using HPMC K100LV and K4M as a matrices has moisture content 7.0 – 10.0 %, out of recommended range, 2.80 – 5.60
3. Lactobacillus Acidophilus microparticle using HPMC K100LV and K4M as matrices, result a probiotic viability > 10^7 cfu/g
