DAFTAR LAMPIRAN ......................................................................................... xv
DAFTAR SINGKATAN ..................................................................................... xvi

BAB 1 PENDAHULUAN ...................................................................................... 1
  1.1 Latar Belakang Masalah ............................................................................... 1
  1.2 Rumusan Masalah ....................................................................................... 5
  1.3 Tujuan Penelitian ........................................................................................ 5
     1.3.1 Tujuan Umum ...................................................................................... 5
     1.3.2 Tujuan Khusus .................................................................................... 5
  1.4 Manfaat Penelitian ..................................................................................... 6
     1.4.1 Manfaat Teoritis ............................................................................... 6
     1.4.2 Manfaat Praktis ............................................................................... 6

BAB 2 TINJAUAN PUSTAKA ............................................................................. 7
  2.1 Tanaman Kakao (Theobroma Cacao) ....................................................... 7
     2.1.1 Klasifikasi .......................................................................................... 8
     2.1.2 Morfologi ............................................................................................ 9
     2.1.3 Kulit Buah Kakao ............................................................................. 10
  2.2 Fluor ............................................................................................................ 11
  2.3 Topikal Gel Fluoride .................................................................................. 12
  2.4 Sodium Fluoride ....................................................................................... 12
  2.5 Interaksi Sodium Fluoride dengan Enamel ............................................ 13
2.6 Interaksi Theobromine dengan Enamel ....................................................... 14
2.7 Enamel Gigi .................................................................................................. 15
2.7.1 Kekerasan Permukaan Enamel ................................................................. 17
2.8 Alat Pengukuran Kekerasan Permukaan ..................................................... 18
2.9 Bovine Teeth ............................................................................................... 18
2.10 Demineralisasi ........................................................................................... 18
2.11 Jus Jeruk Kemasan .................................................................................... 19

BAB 3 KERANGKA KONSEPTUAL DAN HIPOTESIS .................................. 21
3.1 Kerangka Konseptual ................................................................................ 21
3.2 Hipotesis ...................................................................................................... 24

BAB 4 METODE PENELITIAN ......................................................................... 25
4.1 Jenis Penelitian ............................................................................................ 25
4.2 Rancangan Penelitian .................................................................................. 25
4.3 Sampel Penelitian ....................................................................................... 25
4.3.1 Kriteria Sampel ..................................................................................... 25
4.3.2 Besar Sampel ........................................................................................ 25
4.3.3 Pembagian Kelompok Sampel .............................................................. 27
4.4 Variabel ....................................................................................................... 27
4.5 Definisi Operasional .................................................................................... 28
4.6 Lokasi dan Waktu Penelitian ....................................................................... 28
4.6.1 Lokasi Penelitian .................................................................................. 28
4.6.2 Waktu Penelitian ................................................................................... 29
4.7 Alat dan Bahan ............................................................................................ 29
4.7.1 Alat ....................................................................................................... 29
4.7.2 Bahan .................................................................................................... 30
4.8 Cara Kerja ................................................................................................... 30
4.8.1 Pembuatan Theobromin Ekstrak Kulit Buah Kakao ............................ 30
4.8.2 Pembuatan Gel NaF 2% dalam CMC 2% 150 mL ............................... 31
4.8.3 Pembuatan Sampel ................................................................................ 32
4.8.4 Perlakuan Sampel ................................................................................ 32
4.8.5 Pengukuran Kekerasan Permukaan ...................................................... 33
4.9 Analisis Data ............................................................................................... 34
4.10 Alur Penelitian........................................................................................................... 36  
BAB 5 HASIL PENELITIAN DAN ANALISIS DATA ............................................. 37  
  5.1 Hasil Penelitian ...................................................................................................... 37  
  5.2 Analisis Data ......................................................................................................... 38  
BAB 6 PEMBAHASAN.................................................................................................. 42  
BAB 7 SIMPULAN DAN SARAN ........................................................................ 49  
  7.1 Kesimpulan ........................................................................................................... 49  
  7.2 Saran ..................................................................................................................... 49  
DAFTAR PUSTAKA ...................................................................................................... 50  
Lampiran
DAFTAR TABEL

Tabel 5.1 Nilai rerata dan standar deviasi kekerasan permukaan enamel gigi pada masing-masing kelompok..................................................................................................................37
Tabel 5.2 Signifikansi perbedaan kekerasan permukaan enamel gigi antar perlakuan.................................................................................................................................................40
Tabel 5.3 Signifikansi perbedaan kekerasan permukaan enamel gigi dalam setiap kelompok.........................................................................................................................................................40
DAFTAR GAMBAR

Gambar 2.1 Buah Kakao (*T. cacao*) .........................................................8
Gambar 2.2 Struktur Theobromine .......................................................11
Gambar 2.3 Reaksi Subtitusi Ion ..........................................................13
Gambar 2.4 Reaksi Interstisial ..............................................................15
Gambar 2.5 Diagram Skematis Komponen Gigi ..............................16
Gambar 2.6 Ilustrasi Skematis Struktur Enamel ...............................17
Gambar 4.1 Alat *Vickers Microhardness Tester* ..................................32
DAFTAR LAMPIRAN

Lampiran 1 Data Hasil Penelitian.................................................................58
Lampiran 2 Hasil Uji Statistik.................................................................60
Lampiran 3 Foto Penelitian.................................................................65
Lampiran 4 Uji Fitokimia.................................................................68
Lampiran 5 Laik Etik.................................................................69
Lampiran 6 Surat Keterangan Penelitian...........................................70
