Dear Kalanjati:

Recently, you agreed to review Manuscript ID AZ-OM-03-2020-0032.R3, entitled "Comparative study about aging effect on retina and cerebellum of Columba livia domestica." The manuscript is located in your Reviewer Center at <https://mc.manuscriptcentral.com/az>.

This e-mail is simply a heads-up that your review is due in one week. I appreciate your help in expediting the reviewing process. Please do not hesitate to contact me if I can be of any assistance.

To access the manuscript and online reviewer scoresheet, you can use this direct link:

[https://mc.manuscriptcentral.com/az?URL\\_MASK=fbccb09534964b15a4762d7c4bedaab2](https://mc.manuscriptcentral.com/az?URL_MASK=fbccb09534964b15a4762d7c4bedaab2)

Yours sincerely,

Professor Lennart Olsson

Associate Editor, Acta Zoologica

Dear Kalanjati:

Thank you for reviewing manuscript # AZ-OM-03-2020-0032.R3 entitled "Comparative study about aging effect on retina and cerebellum of Columba livia domestica" for Acta Zoologica.

On behalf of the Editors of Acta Zoologica, we appreciate the voluntary contribution that each reviewer gives to the Journal. We thank you for your participation in the online review process and hope that we may call upon you again to review future manuscripts.

Yours sincerely,  
Professor Lennart Olsson  
Associate Editor, Acta Zoologica  
[Lennart.Olsson@uni-jena.de](mailto:Lennart.Olsson@uni-jena.de)

Reviewers: Enjoy free online access to Acta Zoologica for 1 year!

For your free access to Acta Zoologica:

Enjoy 12 months free access to Acta Zoologica.

To activate your free online access, follow these simple instructions:

1. Visit [www.onlinelibrary.wiley.com/myprofile/trials](http://www.onlinelibrary.wiley.com/myprofile/trials) and login or register a new account
2. Enter the trial code: AZOREV16 (case sensitive)
3. You now have 12 months access to Acta Zoologica.

To Whom It May Concern:

I am the Editor-in-Chief of *Acta Zoologica*.

By this letter, I wish to confirm that Dr. Viskasari Kalanjati has served as a peer reviewer for the international journal *Acta Zoologica*. The Journal *Acta Zoologica* is published by Wiley for The Royal Swedish Academy of Sciences and The Royal Danish Academy of Sciences and Letters, and it includes papers on animal organization, development, structure and function. The journal also has an extensive International Editorial Board ensuring that only papers of the highest quality are accepted for publication.

At *Acta Zoologica*, manuscripts are examined by the editorial staff and evaluated by expert reviewers assigned by the editors. The reviewers then submit detailed criticisms of the paper along with a recommendation to reject, accept with major revisions, accept with minor revisions, or accept as is. This process ensures the high quality of work published in the journal.

Peer review is integral to scholarly research. It relies on experts in the field to review one another's work and make an informed decision about whether it is legitimate, and whether it is merited for publication. Peer reviewers perform the critical role of vetting articles that have been submitted to the journal and therefore, the peer review process acts as the quality assurance part of the publication process.

Reviewer selection is critical to the publication process, and we base our choice on many factors, including expertise, reputation, specific recommendations and our own previous experience of a reviewer's characteristics. For instance, we select referees who have a robust publication record in prominent journals, have been cited by other researchers, have disseminated their research in conferences and other venues in their field, and are highly regarded by their peers for their contributions to the field.

At *Acta Zoologica*, we utilize the peer review process to guide manuscript selection and publication decisions. We reject over 60 percent of papers submitted to us and depend on the peer review process to maintain our high standards and reputation. As a peer reviewer,

Dr. Viskasari Kalanjati plays a significant role in ensuring that the journal maintains its reputation for publishing articles of high-quality.

Toward the goal of impartiality, *Acta Zoologica* follows a policy in which reviewer identities are never shared unless the reviewer requests to sign their review. For this reason, we cannot provide information regarding the specific articles reviewed by Dr. Viskasari Kalanjati. However, our stringent standards make us one of the leading journals in the field. Published regularly since 1920, *Acta Zoologica* has retained its position as one of the world's leading journals in the field of animal organization, development, structure and function. Each issue publishes original research of interest to zoologists and physiologists worldwide, in the field of animal structure (from the cellular to the organismic level) and development with emphasis on functional, comparative and phylogenetic aspects. Occasional review articles are also published, as well as book reviews.

Dr. Viskasari Kalanjati's role as a peer reviewer is of crucial importance to *Acta Zoologica* and I would not hesitate to engage the services of Dr. Viskasari Kalanjati as a reviewer in the future.

Sincerely,

Prof. Dr. L. Olsson
