ABSTRACT

The aim of this research is to analyze the relationship between market concentration and auditor industry specialization with the audit fee stickiness. This study uses 742 samples of companies listed on the Indonesia Stock Exchange for the period 2014 to 2018. The analysis techniques used in this research is multiple linear regression analysis techniques that are processed with SPSS 22.0 for windows software. Sticky arises because of the asymmetric adjustment in audit fees, the higher the value of the audit fee stickiness means the more sticky audit fees. Hypothesis test results showed that market concentration and auditor industry specialization were positively and significantly related to audit fee stickiness.
