ABSTRACT

This research aims to determine the effect of audit market competition on audit report lag (empirical study in the property, real estate, and building construction sectors). This research is a research using a quantitative approach. The type of data used is secondary data from the financial statements of companies listed on the Indonesia Stock Exchange. The objects studied were property, real estate, and building construction companies listed on the Indonesia Stock Exchange for the period 2015-2018 with a population of 82 companies and a sample of 75 companies. The result of this study indicates that the audit market competition has a significant positive effect on the audit report lag, which means that higher audit market competition results (lower its competition), will make higher audit report lag results, and vice versa.
