TABLE AND FIGURE

Table 1. 1 The number of forest cover loss as projected in 11 regions of deforestation front can be seen from the table below.	15
Table 1. 2 The table below indicates the global forest area change from 1990 – 2015 and annual net change in thousands of ha.	16
Table 1. 3 This table below shows the effects of human activities on the environment which resulted to deforestation and changing climate conditions. These human activities also contribute immensely to land degradation.	17
Table 2. 1 The table below shows the framework of policy capacity which consist of skills and competences and all the three levels of resources and capabilities	49
TABLE 4.1. 1 PRISMA SLR study selection of existing literature used for inclusion and exclusion criteria.	79
TABLE 4.5. 1 The criteria used in extraction of data from the selected articles.	92
Figure 1. 1 The bar chart below is the graphical representation of the decomposition of the change in Total Annual CO ₂ Emission from Fossil Fuel combustion by decade.....	20
Figure 1. 2 The scatter graph below is the graphical representation of Global Land-Ocean Temperature Index and Hemisphere Temperature change in decade.	21
Figure 1. 3 The diagram below shows connectedness of the climate issues to better understand the effects of greenhouse gases on the global climate system.	22
Figure 1. 4 The graph below is the Environmental Kuznets Curve (EKC) showing relationship between environmental degradation and per capita income.	28
Figure 2. 1 The figure below shows policy capacity at individual level.	51
Figure 2. 2 The figure below shows policy capacity at the organisational level	53
