ACKNOWLEDGEMENT

First and foremost, I would like to express my utmost gratitude to my supervisor during this entire process Dr. Hermina Novida, Internal Medicine Specialist for her guidance and patience during this whole process, without her supervision and advice I would not have been able to get to the point I have with the quality of work that is shown. I would also like to thank Dr. Juniastuti for her guidance throughout my research module and for making sure my research is written with quality and accuracy as expected of a medical student and for international publishing. I would also like to thank Dr. Pudji Lestari, dr., M.kes for giving me this opportunity to conduct a research and for all the help she has given me.

I would like to also thank my mother for her support and advice throughout this journey and for guiding me based on her experience. I would also like to thank my friends Lim Shang Ming, Juliana, Almira Maharani and Nadine Amadea for their support both physically and emotionally and for any input and feedback they have given me throughout this process. Lastly I would like to thank all those who I have cited their journal and works of literature from, without their knowledge and data that they have made accessible I would not be able to finish this research.
