

## TABLE OF CONTENTS

	Page
<a href="#">Front cover</a> .....	i
<a href="#">Obligation form</a> .....	ii
<a href="#">Approval form</a> .....	iii
<a href="#">Examiner’s form</a> .....	iv
<a href="#">Acknowledgement</a> .....	v
<a href="#">Abstract</a> .....	vi
<a href="#">Table of content</a> .....	vii
<a href="#">List of tables</a> .....	x
<a href="#">List of figures</a> .....	xi
<a href="#">List of abbreviations</a> .....	xii
CHAPTER 1 <a href="#">INTRODUCTION</a> .....	1
<a href="#">1.1 Background</a> .....	1
<a href="#">1.2 Problem formulation</a> .....	4
<a href="#">1.3 Objectives of research</a> .....	4
<a href="#">1.4 Benefits of research</a> .....	5
CHAPTER 2 <a href="#">LITTERATURE REVIEW</a> .....	6
<a href="#">2.1 Diabetes Mellitus</a> .....	6
<a href="#">2.1.1 Diagnosis</a> .....	6
<a href="#">2.1.2 Classification</a> .....	8
<a href="#">2.1.3 Aetiology</a> .....	10
<a href="#">2.2 Diabetic Foot Ulcer</a> .....	12
<a href="#">2.2.1 Definition</a> .....	12
<a href="#">2.2.2 Epidemiology</a> .....	12
<a href="#">2.2.2 Pathophysiology</a> .....	14
<a href="#">2.2.3 Risk Factor</a> .....	15
<a href="#">2.2.4 Classification</a> .....	17
<a href="#">2.2.5 Microbiology</a> .....	19
<a href="#">2.2.6 Treatment</a> .....	20
<a href="#">2.2.7 Antibiotic Resistance</a> .....	26

CHAPTER 3 <a href="#">CONCEPTUAL FRAMEWORK</a> .....	28
3.1 <a href="#">Conceptual Framework</a> .....	28
3.2 <a href="#">Explanation of Conceptual Framework</a> .....	29
CHAPTER 4 <a href="#">METHODOLOGY</a>	
4.1 <a href="#">Research design</a> .....	30
4.2 <a href="#">Population and sample</a> .....	30
<a href="#">Sample size</a> .....	30
<a href="#">Sampling technique</a> .....	30
4.3 <a href="#">Criteria sample</a> .....	31
<a href="#">Inclusion Criteria</a> .....	31
<a href="#">Exclusion Criteria</a> .....	31
4.4 <a href="#">Variables</a> .....	31
4.5 <a href="#">Operational definition</a> .....	32
4.6 <a href="#">Research instrument</a> .....	34
4.7 <a href="#">Time and location</a> .....	34
4.8 <a href="#">Research procedure/ Data collection</a> .....	35
4.9 <a href="#">Data processing</a> .....	35
4.10 <a href="#">Research Flow</a> .....	36
4.11 <a href="#">Research framework plan</a> .....	37
<a href="#">CHAPTER 5 RESULTS</a>	
5.1 <a href="#">Overview of research sample and location</a> .....	38
5.2 <a href="#">Sample characteristic</a> .....	38
5.3 <a href="#">Identification of type of bacteria</a> .....	41
<a href="#">Identification of bacterial gram staining</a> .....	41
<a href="#">Identification of bacterial species</a> .....	42
<a href="#">Identification of polymicrobial and monomicrobial infection</a> .....	43
5.4 <a href="#">Identification of bacterial resistance</a> .....	44
<a href="#">Profile between antibiotic resistance and bacterial species</a> .....	46
5.5 <a href="#">Identification of duration of hospitalisation</a> .....	54

CHAPTER 6 DISCUSSION

6.1 <u>Age, Gender, Duration of hospitalisation. And Wagner grading</u> .....	57
6.2 <u>Type of bacteria</u> .....	59
6.3 <u>Bacterial resistance</u> .....	62
6.4 <u>Association between antibiotic resistance and bacterial species</u> .....	64
6.5 <u>Limitations</u> .....	66

CHAPTER 7 CONCLUSION

7.1 <u>Conclusion</u> .....	67
7.2 <u>Suggestions</u> .....	68

<u>REFERENCES</u> .....	69
-------------------------	----

<u>ATTACHEMENTS</u> .....	76
---------------------------	----

LIST OF TABLES

Table 2.1 Criteria for the diagnosis of diabetes.....	10
Table 2.2 The Meggitt-Wagner classification.....	17
Table 2.3 Potential empirical antibiotic regimen based on the clinical severity of the infections.....	22
Table 5.1 Profile of Age, Gender, Mortality and Wagner grading.....	39
Table 5.2 Distribution of 153 bacterial isolates.....	42
Table 5.3 Profile of poly-microbial and mono-microbial infection.....	43
Table 5.4 Antibiotic profile.....	44
Table 5.5 Profile between Antibiotic resistance and Gram positive bacterial species.....	48
Table 5.6 Profile between Antibiotic resistance and Gram negative bacterial species.....	50
Table 5.7 Association between antibiotic resistance and duration of hospitalisation.....	55
Table 5.8 Association between Antibiotic resistance, duration of hospitalization and Severity of foot ulcer.....	56

LIST OF FIGURES

Fig 5.1 Distribution of gram staining.....	41
Fig.5.2 Distribution of duration of hospitalisation.....	54

LIST OF ABBREVIATION

1. DFI – Diabetic foot Infection
2. DFU – Diabetic foot ulcer
3. ESBL – Extended Spectrum  $\beta$ -Lactamase
4. MDR – Multi-drug Resistant
5. MRSA – Methicillin Resistant *Staphylococcus aureus*
