Thank you very much for the very nice papers. Please ensure that Model Submission Letteres are duly signed by all of the authors and sent to us, Authors Contribution Forms are filled and sent to us for our record. Moreover, to cut the publishing time short, please correct the references according to Vancouver style. We need names of first six [6] authors names if six or more than six authors are there in any reference, Also please do a favour; hyperlink the references. I have attached the relevant documents.

My best wishes and kind regards to your family and friends,
