	Page
APPROVAL PAGE.....	ii
DECLARATION STATEMENT.....	iii
ACKNOWLEDGEMENT	iv
DEDICATION	vi
TABLE OF CONTENTS.....	vii
LIST OF TABLES	x
LIST OF FIGURES	xi
APPENDICES	xii
ABSTRACT.....	xiii
CHAPTER I INTRODUCTION.....	1
1.1 Background of the Study.....	1
1.2 Formulation of the Problem	7
1.3 The Objective of the Study.....	8
1.4 Significance of the Study	9
1.4.1 Theoretical significance	9
1.4.2 Practical significance	9
CHAPTER II LITERATURE REVIEW.....	10
2.1 Sodium Nitrite	10
2.2 Free Radicals and Oxidative Stress	16
2.2.1 Overview of the free radicals and oxidative stress	16
2.2.2 The role of hypoxia in oxidative stress	21
2.2.3 Superoxide acts as a source of other free radicals	22
1.1.1 Mitochondria as sources of free radicals	24
2.2.4 The antioxidant system	26
2.3 The Liver	27
2.4 Superoxide Dismutase.....	29
2.5 Catalase	30

2.6 Aspartate Aminotransferase	31
2.7 Alanine Aminotransferase	31
2.8 Alkaline Phosphatase	32
2.9 Total Serum Protein.....	33
2.10 Okra (<i>Abelmoschus esculentus</i> (L.) Moench)	34
2.11 Flavonoids as Antioxidants	38
CHAPTER III CONCEPTUAL FRAMEWORK AND HYPOTHESIS	42
3.1 Conceptual Framework	42
3.2 Theory of the Conceptual Framework.....	43
3.3 Hypothesis	46
3.3.1 The working hypothesis	46
3.3.2 Statistical hypothesis.....	46
CHAPTER IV RESEARCH METHOD	48
4.1 Place and Time of the Research	48
4.2 Ethical Clearance and Red Okra Identification	48
4.3 Research Materials	48
4.4 Research Tools	49
4.5 Research Design	50
4.6 Research Procedures.....	50
4.6.1 Tools sterilization.....	50
4.6.2 Treatments to the experimental animals	51
4.6.3 Extraction of the phytochemicals from red okra pods ..	51
4.6.4 Blood collection and isolation of serum	53
4.6.5 Preparation of liver homogenates	53
4.6.6 Determination of the total-SOD (t-SOD) activity.....	54
4.6.7 Determination of catalase activity	55
4.6.8 Determination of alanine transferase	56
4.6.9 Determination of aspartate transferase.....	56
4.6.10 Determination of alkaline phosphatase.....	57

4.6.11	Determination of TSP	57
4.6.12	Histopathological examination	58
4.7	Definitions of Operational Variables	60
4.7.1	Research variables	60
4.7.2	Operational variables and definitions	61
4.8	Data Analysis	62
CHAPTER V	RESULTS AND DISCUSSION	64
5.1	Results	64
5.1.1	Effect of ethanol extract of red okra pods on SOD activity.....	64
5.1.2	Effect of ethanol extract of red okra pods on CAT activity	65
5.1.3	Effect of ethanol extract of red okra pods on ALT activity.....	66
5.1.4	Effect of ethanol extract of red okra pods on AST activity.....	67
5.1.5	Effect of ethanol extract of red okra pods on ALP activity.....	68
5.1.6	Effect of ethanol extract of red okra pods on TSP activity.....	69
5.1.7	Effect of ethanol extract of red okra pods on the histological examination of the liver.....	69
5.1.8	Effect of ethanol extract of red okra pods on the hepatocytes.....	71
5.1.9	Path analysis and relationships between research variables	74
5.2	Discussion	75
5.2.1	Effect of NaNO ₂ on SOD, CAT, ALT, AST, ALP, TSP and histology parameters	77
5.2.2	Effect of ethanol extract of red okra pods on SOD, CAT, ALT, AST, ALP, TSP and histology parameters.....	82
CHAPTER VI	CONCLUSION AND SUGGESTION.....	87
6.1	Conclusion.....	87
6.2	Suggestion	88
REFERENCES	89

LIST OF TABLES

	Page
Table 2.1.Composition per 100 g of the edible portion of okra pod	37
Table 5.1. Inflammation pathological scores	70

LIST OF FIGURES

	Page
Figure 2.1 Hepatic tissue image of a mouse liver given 20 mg/kg/day NaNO ₂ for 8 weeks (H and E).	16
Figure 2.2 Sources of ROS and RNS in the cell	17
Figure 2.3 Reactions that form hydroxyl radicals	24
Figure 2.4 Summary of all reactions and mechanisms of forming free radicals and the antioxidant enzymes	25
Figure 2.5 Mechanisms of electron transport in the mitochondria and free radicals formation in the complexes of the mitochondria	26
Figure 2.6 Effect of NaNO ₂ on liver tissue showing the steatosis, fibrosis, mild steatosis and severe hepatocellular cirrhosis	29
Figure 2.7 Red okra plant with okra pod, and white flower with red spots.	36
Figure 2.8 Structure of flavonoid showing the main three rings A, B, and C.....	39
Figure 2.9 Mechanisms of flavonoids as an antioxidant.....	40
Figure 3.1 Conceptual framework of the research	42
Figure 4.1 Research operational framework	52
Figure 4.2 Liver Hematoxylin & Eosin Female Harlan Sprague-Dawley rats showing single-cell necrosis and focus inflammation	60
Figure 4.3 H&E stained section of liver tissue showing swollen hepatocytes..	62
Figure 5.1 Effect of ethanol extract from red okra pods on the SOD activity	66
Figure 5.2 Photomicrographs of the liver	72
Figure 5.3 Effect of ethanol extract from red okra pods on the percentage of necrotic, normal and swollen hepatocytes.....	73
Figure 5.4 Path analysis of the linear regression indicating the effect and relationship between variables.	75

APPENDICES

	Page
Appendix 1 Summary of the Thesis	L-1
Appendix 2 The standard curve of H ₂ O ₂ for the determination of catalase activity	L-13
Appendix 3 The standard curve of BSA for the determination of TSP.....	L-13
Appendix 4 Photomicrograph representation of the hepatic tissue of 100x H and E viewed under a light microscope (Used to determine inflammation pathological scores)	L-14
Appendix 5 SPSS Results.....	L-15
Appendix 6 Raw data of the hepatocyte counts per one microscopic photo observe under 400x magnification	L-21
Appendix 7 Raw data of the inflammation pathological scores	L-22
Appendix 8 Letter from LIPI for identification of red okra	L-23
Appendix 9 Ethical Clearance	L-24
