xv+188 halaman, 4 lampiran

Penyelenggaraan *home-schooling* masih menjadi topik perdebatan untuk dilihat pengaruhnya pada siswa yaitu terkait dengan kemampuan siswa *home-schooling* dalam menghadapi tantangan hidup, kemampuan sosialisasi dan prestasi akademik siswa, semuanya memiliki relevansi dengan konsep *psychological well-being*. Namun dari berbagai penelitian yang telah dilakukan tentang *home-schooling*, masih sedikit yang secara langsung membahas keterkaitannya dengan *well-being*. Penelitian-penelitian tersebut masih terbatas membahas tentang isu-isu terpisah yang masing-masing dapat menyumbang terhadap kondisi *well-being* seseorang. Oleh karena itu, penelitian ini bertujuan untuk melengkapi penelitian-penelitian sebelumnya, yaitu untuk melihat gambaran *psychological well-being* remaja secara langsung dengan menggunakan perspektif teori *psychological wellbeing* dari Carol Ryff yang berasal dari dasar filsafat *eudaimonic*. Dalam penelitian ini, peneliti menggunakan enam dimensi *well-being* dari Ryff (1989) yaitu: *autonomy, personal growth, self-acceptance, purpose in life, environmental mastery* dan *positive relationship with others*.

Penelitian dilakukan pada 2 siswa perempuan dan 2 siswa laki-laki berusia antara 14-17 tahun yang mengikuti *home-schooling* tipe komunitas di Surabaya. Informasi mengenai gambaran *psychological well-being* diungkap melalui metode wawancara mendalam sebagai teknik pengumpulan data. Penelitian ini menggunakan metode penelitian kualitatif studi kasus. Teknik analisis data yang digunakan dalam penelitian ini adalah analisis tematik dengan melakukan koding terhadap hasil transkrip wawancara yang kemudian di analisis. Hasil penelitian ini menunjukkan keempat partisipan memiliki *psychological well-being* yang menonjol dalam dimensi *positive relationship with others* dan *environmental mastery*. Kemudian faktor-faktor yang paling berkontribusi pada pembentukan *psychological well-being* remaja yang mengikuti pendidikan *home-schooling*, yaitu: sarana dan prasarana di *home-schooling*, faktor kuantitas mata pelajaran, faktor kedekatan dengan tutor, kedekatan dengan teman di *home-schooling*, dan kedekatan dengan orang tua mereka masing-masing.

Kata Kunci : Remaja, *Psychological wellbeing, Home-schooling*

ABSTRACT

Dimas Masunga Raditya, 110810170, *Psychological wellbeing pada in home-schooling education.*, Thesis, Faculty of Psychology, University of Airlangga, 2013.

xv+188 pages, 4 appendixes

The implementation of home-schooling still became the topic of the debate to be seen by his influence to the student that is related to the home-schooling student's capacity in living challenge, the socialization capacity and academic achievement of the student, all of them had the relevance with the concept psychological wellbeing. However from various researches were carried out about home-schooling, still a little that directly discussed his connection with wellbeing. This researches were still limited discussed about rumours was separated that was respective could contribute towards the condition of well-being. Therefore, this research aimed at equipping researches beforehand, that is to see the picture of psychological wellbeing to the adolescent directly by using perspective of the theory psychological wellbeing from Carol Ryff that came from the foundation of eudaimonic philosophy. In this study, researcher used six dimensions of wellbeing from Ryff (1989), namely: autonomy, personal growth, self-acceptance, life purpose, environmentally mastery and positive relationship with others.

The study was conducted at 2 females and 2 males students aged between 14-17 years old who follow the home-schooling community types in Surabaya. The psychological wellbeing picture revealed through in-depth interviews as the method of data collection techniques. This study used qualitative case study method. Data analysis techniques in this research is thematic analysis of the results of coding transcript from the interview analysis. The result of this study showed the four participants have psychological wellbeing are prominent in the positive relationship with others and environmental mastery dimension. Then the factors that most contribute to the formation of adolescent psychological wellbeing in the home-schooling education is: facilities and infrastructure in home-schooling, subjects quantity, closeness with the tutors, closeness with friends at home-schooling, and closeness with their parents.

Keywords: Adolescent, Psychological wellbeing, Home-schooling
