

## ABSTRAK

**Hikmania Ayu Febrianti, 11111048, Hubungan antara *Locus of Control* Internal dengan *Self-Perceived Employability*, Skripsi, Fakultas Psikologi Universitas Airlangga, 2015, xvii + 119 halaman, 14 lampiran**

*Penelitian ini bertujuan untuk mengetahui hubungan antara locus of control internal dengan self-perceived employability pada siswa kelas XII di SMK Negeri 1 Cerme. Locus of control menurut Levenson adalah keyakinan individu mengenai sumber penyebab dari peristiwa-peristiwa yang dialami dalam kehidupannya, faktor internal atau faktor eksternal (April, dkk., 2012). Self-perceived employability adalah persepsi individu terkait bagaimana dia memiliki nilai tawar berupa kemampuan dan potensi yang dimiliki untuk dapat dipekerjakan dengan tepat (Rothwell, dkk., 2008).*

*Penelitian ini dilakukan pada siswa kelas XII di SMK Negeri 1 Cerme, dengan jumlah sampel 194 responden. Alat pengumpul data yang digunakan berupa skala IPC-Levenson locus of control (24 item) dikembangkan oleh Levenson (1981) dan skala self-perceived employability (16 item) yang dikembangkan oleh Rothwell, dkk (2008). Reliabilitas masing-masing skala adalah internality 0,617, powerful others 0,562 dan chance 0,623 untuk skala IPC-Levenson locus of control dan 0,838 untuk skala self-perceived employability. Analisis data dalam penelitian ini adalah statistik non-parametrik dengan menggunakan teknik korelasi Spearman Rank ( $\rho$ ) dengan bantuan program SPSS 20 for Windows. Hasil analisis data penelitian ini diperoleh koefisien korelasi sebesar 0,475 pada internality dengan taraf signifikansi 0,000 ( $p < 0,05$ ). Berdasarkan hasil analisis data penelitian ini menunjukkan bahwa terdapat hubungan antara locus of control internal dengan self-perceived employability pada siswa kelas XII di SMK Negeri 1 Cerme.*

**Kata kunci:** *Locus of control, Self-Perceived Employability*

## ABSTRACT

**Hikmania Ayu Febrianti, 111111048, The Relationship between Internal Locus of Control and Self-Perceived Employability of 3<sup>rd</sup> Grade Students in SMK Negeri 1 Cerme, Undergraduate Thesis, Faculty of Psychology, Airlangga University, 2015, xvii + 119 pages, 14 appendix**

*This research is conducted to determine the correlation between internal locus of control and self-perceived employability of 3<sup>rd</sup> grade students in SMK Negeri 1 Cerme. According to Levenson, Locus of control is an individual belief related to the cause of his live events, either internal or external factor (April, dkk., 2012). Self-perceived employability is individual perception related to how skill he has as the bargaining power and potential owned in order to be employed correctly (Rothwell, dkk., 2008).*

*The participants of this research were 3<sup>rd</sup> grade students in SMK Negeri 1 Cerme specifically 194 repondents. Data collection tools used in this research were locus of control IPC-Levenson scale (24 items) developed by Levenson (1981) and self-perceived employability scale developed by Rothwell, et al (2008). The reliability of each scale is internality 0,617, powerful others 0,562 and chance 0,623 for locus of control IPC-Levenson scale and 0,838 for self-perceived employability. Data analysis in this research is non parametric statistics using Spearman Rank ( $\rho$ ) correlation technique supported by SPSS 20 for Windows program. The result of this research shows the correlation coefficient in 0,475 for internality with significant level of 0,000 ( $p < 0,05$ ). Regarding to the result of data analysis, there is a correlation between internal locus of control and self-perceived employability of 3<sup>rd</sup> grade students in SMK Negeri 1 Cerme*

**Keywords:** *Locus of control, Self-Perceived Employability*
