SSEKALEMBE GEOFREY

KATA PENGATAR

First and foremost, I praise the mercy of the Almighty God for His Grace to all of us that has enabled the preparation of this thesis titled "**Factors Influencing Tuberculosis Treatment Outcomes in HIV Positive and HIV Negative Patients in Surabaya, Indonesia**" till now when it has been completed. This thesis discusses the factors that influence tuberculosis treatment outcomes (Treatment success versus Treatment failure) in HIV-TB patients in Surabaya. The results of these findings are expected to help the future researchers, implemeting partners, community based organisations as a reference in further health studies, health promotion, health policy and improving global health.

The author conveys his sincere thanks to Dr. Muhammad Atoillah Isfandiari, dr., M.Kes and Dr. Santi Martini, dr., M.Kes who his main supervisor and second supervisor respectively, who with patience and keen attention provided support, guidance, encouragement, and suggestions for the perfection of this thesis. With the completion of this thesis, the author would like to thank profusely the following persons and Institutions:

1. Prof. Dr. Moh. Nasih, S.E., M.T., Ak., CMS., C.A, the Chancellor of Airlangga University.
2. Prof. Dr. Tri Martiana, dr., M.S, the Dean Faculty of Public Health, Airlangga University.
3. Prof. Dr. Chatarina U.W, dr., M.S., M.PH, the Coordinator Epidemiology Study Program, Masters of Epidemiology Program at the Faculty of Public Health Airlangga University.
4. Dr. Fariani Syahrul, S.KM, M.Kes, the Secretary of Epidemiology Masters Program at Airlangga University.
5. Dr. Hari Basuki N., dr., M.Kes, Prof. Dr. Chatarina U.W., dr., MS., M.PH, and Dr.dr. Musofa Rusli, SpPD, FINASIM; the examining committee members for their willingness to test, examine, improve, guide and assess this thesis.
6. In a special way, the author would like to thank the management team at Dinas Kesehatan Kota Surabaya (Surabaya Public Health office) that accepted and allowd the author to do his research from their organisation. Special thanks to Rosita Dwi Yuliandari for the support, guidance and knowledge shared throughout this research proces.
7. All the lectures at the Faculty of Public Health and guest lecturers that have shared their fruitful knowledge and experience for the two years of my study program.

8. In a special way, the author would like to thank the Government of Indonesia for the offer of the KNB scholarship through which the author was able to attain his Masters degree in Epidemiology at the Faculty of Public Health Airlangga University.
9. Airlangga Global Engagement (AGE) for its support through welfare, hospitality and guidance to the author where they have always been like the parental home for the student.
10. Ugandan community in Indonesia more so my fellow Ugandans with whom I came with from Uganda to Indonesia in 2017 for the same mission (Robert, Philimon, John Baptist, Denis, Isma and Rehemah).
11. Fellow international students at Universtas Airlangga that have really been so supportive to the author while in Indonesia more especially Astelia and Obed.
12. Pak Ahmad and Pak Erik Dwi Yulianto who have highly supported the author on all academic matters at the Epidemiology Department that maybe the lecturers were to busy to guide me through my course.
13. Class of 2017 batch that have greatly guided me throughout from the start towards the end of my studies while in Indonesia most especially Novita.
14. Classmates of the 2018 batch more especially those majoring in Epidemilogy program (Annisa, Anggi, Deni, Tyo, Irfan & Icha) with whom I have weathered towards the very end.
15. Finally, I would like to extend my sincere thanks to my parents, brothers and sisters for their support throughout my stay away from home.

The author also accepts all criticism and suggestions from all parties for the sake of the perfection of this thesis. Hopefully this thesis can provide benefits to anyone who uses it.
