

TABLE OF CONTENT

Front Cover	i
Inside Cover	ii
Degree Requirements Page	iii
Validity Sheet.....	iv
Thesis Examiner Assessment.....	v
Statement of Plagiarism	vi
Acknowledgements	vii
Summary	ix
Abstract	xiii
Table of Content.....	xiv
List of Figures	xx
List of Tables	xxiii
List of Abbreviations and Glossaries	xxiv
CHAPTER 1 INTRODUCTION	1
1.1 Background	1
1.2 Problem Formulation.....	3
1.3 Research Purposes	3
1.3.1 General Purpose	3
1.3.2 Specific Purpose.....	4
1.4 Benefits.....	4
1.4.1 Theoretical Benefits	4
1.4.2 Practical Benefits	4

CHAPTER 2 LITERATURE REVIEW	5
2.1 B Cell and T Cell Immune Responses.....	5
2.1.1 B Cells and T Cells Recognize Specific Antigens.....	5
2.1.2 Antigen-antibody Interaction	6
2.1.3 Immunoglobulins	9
2.1.3.1 IgM.....	10
2.1.3.2 IgG	11
2.1.3.3 IgA	12
2.1.3.4 IgD	13
2.1.3.5 IgE.....	13
2.1.4 Secretory IgA and IgG	13
2.1.5 Certain Viruses Infect Immune Cells.....	14
2.2. Nasopharyngeal Carcinoma (NPC).....	15
2.3 Incidence and Epidemiologic	17
2.4 Etiology of NPC	19
2.5 Clinical Presentation and Differential Diagnosis	21
2.6 NPC and EBV-Based Diagnostic Approaches.....	21
2.7 Epstein-Barr Virus (EBV).....	24
2.7.1 General Features and History of EBV	24
2.7.2 Structure of the EBV	27
2.7.3 Immediate-Early Genes.....	30
2.7.3.1 ZEBRA Protein (N, P 125, and P 130 Domains).....	31
2.7.4 EBV Early Genes	32

2.7.5 EBV in B cells and Epithelial Cells	34
2.7.6 Reactivation of EBV	39
2.7.7 Infectious Mononucleosis	39
CHAPTER 3 CONCEPTUAL FRAMEWORK AND RESEARCH	
HYPOTHESIS	41
3.1 Conceptual Research Framework.....	41
3.2 Conceptual Research Framework Explanation	42
3.3 Hypothesis	43
CHAPTER 4 MATERIAL AND RESEARCH METHODS	
44	
4.1 Type of Research.....	44
4.2 Object of Research	44
4.3 Research Variables and Operational Variables Definition.....	46
4.3.1 Research Variables.....	46
4.3.2 Operational Variables Definition.	46
4.4 Research Materials	48
4.5 Research Tools	48
4.6 Location and Time of Research.....	49
4.6.1 Location of Research	49
4.6.2 Time of Research	49
4.7 Data Collection and Procedures	51
4.7.1 Samples	51
4.7.2 Sampling	51
4.7.3 Specimen Handling	53

4.7.4	Methods of Examination	54
4.7.4.1	SDS-PAGE and Immunoblot Analysis	54
4.7.4.2	ELISA	55
4.7.5	Statistical Analysis	57
4.7.5.1	T-test	57
4.7.5.2	R-squared	58
4.7.5.3	Scatter Plots	59
4.8	Research Operational Framework	60
CHAPTER 5 RESULTS		61
5.1	IMMUNOBLOT	61
5.2	ELISA	63
5.2.1	ELISA Analysis for Indonesian Healthy People	63
5.2.2	ELISA Analysis for Indonesian NPC Patients	65
5.2.3	ELISA Analysis for The Netherlands NPC Patients	68
5.2.4	ELISA Analysis for The Netherlands IM Patients	70
5.2.5	ELISA Correlations Between IgG and IgA Reactivity to Zebra Proteins	72
5.2.6	ELISA Correlations Between IgG and IgA Reactivity to VCA P18 and EBNA 1	74
5.3	Ethnicities in The Netherlands NPC Samples	75
CHAPTER 6 DISCUSSION		76
6.1	IMMUNOBLOT	77
6.2	ELISA	77

6.2.1 ELISA for The Netherlands IM Patients.....	80
6.2.2 ELISA Correlations Between IgG and IgA Reactivity to Zebra Proteins	80
6.2.3 ELISA Correlations Between IgG and IgA Reactivity to VCA P18 and EBNA 1	81
6.3 Ethnicities in The Netherlands Samples.....	81
CHAPTER 7 CONCLUSION.....	83
7.1 Conclusion.....	83
7.2 Future Perspective	85
List of References	86
Appendix – A. The Research Code of the VU University Medical Center (Helsinki Code of Ethics) Chapter 1,3,5	95
Appendix – B. Research Procedures (SDS-Page, Immunoblot, ELISA).....	111
Appendix – C. Immunoblot Analysis of IgG and IgA Responses on Indonesian Patients with Nasopharyngeal Carcinoma (NPC) and Normal Controls	117
Appendix – D. ELISA Analysis for Indonesian Healthy People	118
Appendix – E. ELISA Analysis for Indonesian NPC Patients.....	119
Appendix – F. ELISA Analysis for The Netherlands NPC Patients.....	120
Appendix – G. ELISA Analysis for The Netherlands IM Patients	121
Appendix – H. Correlations Between IgG and IgA Reactivity to Zebra Proteins in ELISA	122
Appendix – I. Correlations Between IgG and IgA VCA P18 and EBNA 1 in a Population	123

Appendix – J. A General Statement for All KWF and AsiaLink Activities Signed by UGM Officials	124
Appendix – K. MoU Faculty of Medicine Universitas Indonesia with Vrije Universiteit Medisch Centrum (VUmc).....	125

LIST OF FIGURES

Figure 2.1a Upper Respiratory Tract	15
Figure 2.1b Anatomy of The Pharynx	16
Figure 2.2 Etiology of NPC	19
Figure 2.3 NPC and EBV-based diagnostic approaches molecular diagnostics such as EBV DNA load and/or EBV RNA profile	22
Figure 2.4 Timeline showing the major milestones in EBV research.....	25
Figure 2.4 Timeline showing the major milestones in EBV research (continued)	26
Figure 2.5 Location and transcription of Epstein–Barr virus (EBV) latent genes on a linear genome	28
Figure 2.6 Function of EBV latent genes.....	28
Figure 2.6 Function of EBV latent genes (continued)	29
Figure 2.7 Epstein–Barr virus (EBV) infection in normal healthy virus carriers.....	35
Figure 2.8 EBV in B cells and epithelial cells	37
Figure 2.9 Schematic presentation of the initial events leading to EBV-induced transformation of human B-cells.....	38
Figure 3.1 Conceptual Research Framework	41
Figure 4.1 Research Plan	45
Figure 4.2 Research Operational Framework	60
Figure 5.1 Immunoblot analysis of IgG and IgA responses on Indonesian patients with nasopharyngeal carcinoma (NPC) and normal controls	61

Figure 5.2a ELISA scattered diagram result of 50 Indonesian healthy people for different epitopes, such as Zebra N, Zebra P125, Zebra P130, Recombinant Zebra, VCA P18 and EBNA 1 with IgA and IgG responses.....	63
Figure 5.2b VCA P18 and EBNA 1 ELISA result of Indonesian healthy people with IgG and IgA responses	64
Figure 5.3a ELISA scattered diagram result of Indonesian NPC patients for different epitopes, such as Zebra N, Zebra P125, Zebra P130, Recombinant Zebra, VCA P18 and EBNA 1 with IgA and IgG responses.....	66
Figure 5.3b VCA P18 and EBNA 1 ELISA result of Indonesian NPC patients with IgG and IgA responses.....	67
Figure 5.4a ELISA scattered diagram result of The Netherlands NPC patients for different epitopes, such as Zebra N, Zebra P125, Zebra P130, Recombinant Zebra, VCA P18 and EBNA 1 with IgA and IgG responses.....	69
Figure 5.4b VCA P18 and EBNA 1 ELISA result of The Netherlands NPC patients with IgG and IgA responses	70
Figure 5.5a VCA P18 ELISA result of The Netherlands IM patients with IgM, IgG and IgA responses	71
Figure 5.5b EBNA 1 ELISA result of The Netherlands IM patients with IgG and IgA responses.....	72
Figure 5.6. Correlations between IgG and IgA reactivity to ZEBRA proteins in ELISA	73
Figure 5.7 Correlations between IgG and IgA VCA P18 and EBNA 1 in a population.....	74

Figure 5.8 The sample of The Netherlands NPC consist of many ethnics 75

LIST OF TABLES

Tabel 4.1 Time Allocation of Research Activities.....	50
Table 6.1 Summary of ELISA analysis.....	78

LIST OF ABBREVIATIONS AND GLOSSARIES

BALT	: <i>Bronchus-Associated Lymphoid Tissue</i>
BARF1	: BamHI-A fragment rightward reading frame 1
Bcl-2	: <i>B-cell lymphoma 2</i>
BCR	: B-Cell Receptor
BHRF1	: BamHI fragment H rightward open reading frame 1
BL	: Burkitt's Lymphoma
BRLF1	: (human herpesvirus 4 type 1)
BZLF1	: (human herpesvirus 4 type 1)
C3d	: Complement 3d
CD21	: Cluster of Differentiation 21
CD40	: <i>Cluster of Differentiation 40</i>
CDRs	: Complementarity-Determining Regions
CR2	: Complement Receptor 2
CSF-1	: <i>Colony Stimulating Factor 1</i>
CT-scan	: Computed Tomography-scan
D	: Diversity
DNA	: <i>Deoxyribonucleic Acid</i>
E genes	: Early genes
EAd	: <i>Early Antigen diffuse</i>
EBER-RISH	: <i>Epstein-Barr Encoded RNA-RNA In-Situ Hybridization</i>
EBNA	: <i>Epstein-Barr Nuclear Antigen</i>
EBV	: Epstein-Barr Virus
ELISA	: Enzyme-Linked Immunosorbent Assay
GALT	: <i>Gut-Associated Lymphoid Tissue</i>
gL	: glycoproteins
H	: Heavy
HH514	: cancer cell line for Epstein-Barr virus-related Burkitt lymphoma disease
HHV 4	: Human Herpes Virus 4
HIV	: <i>Human Immunodeficiency Virus</i>
IB	: Immunoblot
IE genes	: Immediate Early genes
IFA	: Immunofluorescence Assay
IF	: Immunofluorescence
IgA	: Immunoglobulin A
IgD	: Immunoglobulin D
IgE	: Immunoglobulin E
IgG	: Immunoglobulin G
IgM	: Immunoglobulin M
IM	: <i>Infectious Mononucleosis</i>
J	: Joining
L	: Light
L genes	: Late genes

LMP	: Latent Membrane Proteins
mAbs	: monoclonal Antibody
MALT	: <i>Mucosa-Associated Lymphoid Tissue</i>
MHC	: Major Histocompatibility Complex
MRI	: Magnetic Resonance Imaging
NALT	: <i>Nasal- or Nasopharynx- Associated Lymphoid Tissue</i>
N _{het}	: Heterogeneity
NK cells	: Natural Killer cells
NPC	: Nasopharyngeal Carcinoma
OD 450	: Optical Density 450
OriP	: Origin of plasmid Replication
PCR	: Polymerase-Chain Reaction
pIgR	: Polymeric Ig Receptor
rDNA	: recombinant DNA
RNA	: <i>Ribonucleic Acid</i>
SC	: Secretory Component
SHM	: Somatic Hypermutation
SIgA	: Secretory IgA
T cells	: T-lymphocyte cells
TCR	: T-Cell Receptor
Tfh cell	: <i>T Follicular helper cell</i>
TR	: Terminal Repeats
UICC	: International Cancer Control
USG	: Ultrasonography
V	: Variable
VCA	: <i>Viral Capsid Antigen</i>
ZRE's	: ZEBRA-Responsive Elements
CpGs	: <i>shorthand for 5'—C—phosphate—G—3'</i> ,
SF9	: The lepidopteran <i>Spodoptera frugiperda</i> 9 (Cell lines)
