## ACKNOWLEDGMENT

First and foremost, I would like to express my gratitude to Allah SWT. It is for his His blessings that I am able to stand and complete this research entitled “Patient-Controlled Epidural Analgesia (PCEA) Versus Intravenous Patient-Controlled Analgesia (IV PCA) for Acute Postoperative Pain Relief in Minimally Invasive Abdominal Surgeries: A Systematic Review” as my thesis.

Surely it has not been easy to juggle multiple responsibilities at once. It has been an intense couple of months for me, especially with the pandemic taking place. Having to change my research title also greatly hindered my progress. However, in the end, I was able to pull through due to the support of my family and close friends. I would like to express my deepest gratitude to the following people:

1. My parents, Dr. Drs. Hendar Soetarna, SH. and Rakhmi Oktovilan, for always encouraging me to be the best version of myself, providing me with more than I need, and accepting my many flaws with unconditional love.
2. My brother, Junjungan Manggalacakti, for encouraging me with his unusual mix of humour, sarcasm, warmth, and most importantly, food.
3. Bambang Pujo Semedi, dr. SpAn. KIC and Dr. Ahmad Yudianto, dr., SpF(K)., SH., M.Kes as my supervisors for the input and constant guidance throughout the formation of this thesis.
4. Dr. Christijogo Soemartono Waloejodr, dr., Sp.An., KAR. as my thesis examiner for the input and advice for this thesis.
5. Prof. Dr. Mohammad Nasih, SE., Mt., Ak., CMA as the Dean of Universitas Airlangga.
6. Prof. Dr. Soetojo, dr., Sp.U(K) as the Dean of Faculty of Medicine Universitas Airlangga.
7. Dr. Maftuchah Rochmanti, dr., M.Kes as the Coordinator of the Medical Study Program of Faculty of Medicine Universitas Airlangga.
8. Dr. Pudji Lestari, dr., M.Kes. as the Coordinator of the Research Block.
9. My best friends: Assyadilla Kirana, Danise Febiola, and Muhammad Kahlil Gibran RP , for giving me reminders, motivation, help, and for putting up with my nonsense.
10. Dokusen: Kevin, Amek, Jason, Yoris, Chandra, Nanda, Acal, Tina, Evan, Sharon, Kenny. 11 of my strongest mates, who are each fighting their own battles but always achieving impressive milestones nonetheless.

11. Besmalane and Bikini Bottom, my 24/7 during my pre-clinical years, for giving colour (laughter, gossip, precious memories) to my medical student life.

12. Brioche: Felicia Diparahardja, Kenny Wang, and Theresa Levina Gunawan, my childhood best friends who are now living their own paths. I long for the day we reunite in person and spend our days like we used to before.

13. All my friends in Astrocytes 2017 whom I cannot mention one by one. I am proud of all of you and I hope to see us becoming amazing doctors together.

Hopefully, this systematic review will be beneficial both theoretically and clinically. I am very open to any constructive criticism that can be of help to improve this research.
