xvi+ 73 Halaman, 11 Lampiran.

Penelitian ini bertujuan untuk mengetahui apakah terdapat pengaruh persepsi harapan orang tua terhadap fear of failure pada pencari kerja fresh graduate. Penelitian ini juga menguji apakah persepsi pemenuhan harapan orang tua memoderasi kedua variabel tersebut. Penelitian ini menggunakan metode kuantitatif dengan model penelitian cross-section. Data dikumpulkan dengan survei yang dibagikan di berbagai media sosial. Sebanyak 122 orang berpartisipasi pada pengisian survei yang terdiri dari 25 aitem Perception of Parental Expectation Inventory (Sasikala & Karunanidhi, 2011) dan 23 aitem Performance Failure Appraisal Inventory (Conroy, 2001). Teknik analisis data yang digunakan adalah uji regresi linier sederhana dan uji moderated regression analysis dengan bantuan macro PROCESS v3.5 milik Andrew Hayes yang dipasang pada software IBM SPSS Statistics 22 for Windows.

Hasil penelitian menunjukkan bahwa terdapat pengaruh persepsi harapan orang tua terhadap fear of failure ($\beta = 2,275$, $R^2 = 0,041$, $p < 0,05$). Selain itu didapatkan pula hasil bahwa hubungan antara persepsi harapan orang tua dan fear of failure tidak dipengaruhi oleh persepsi pemenuhan harapan orang tua ($\beta = -0,0068$, $p > 0,05$). Hal ini mengimplikasikan bahwa seberapapun tingginya keberhasilan anak dalam memenuhi harapan orang tua tidak mampu menurunkan ketakutan akan kegagalan.

ABSTRACT

Bingar Cahyaning Marhaenayu, 111611133020, The Effect of Perception of Parents Expectation on *Fear of Failure* on *Fresh Graduated Jobseeker Moderated by Perception of Fulfillment of Parents Expectation*, Thesis, Fakultas Psikologi Universitas Airlangga, Surabaya, 2020.

xix+ 73 Pages, 11 Appendices.

This study aims to determine whether there is an influence between the perceptions of parents' expectations against fear of failure on fresh graduated jobseeker. In addition, this study also test whether the perceptions of fulfilling parents' expectations moderate both variables. This study used a quantitative method with a cross-section research model. The data was collected a survey distributed on various social media. A total of 122 people participated in filling out the survey which consist of 25 items of Perception of Parental Expectation Inventory (Sasikala & Karunanidhi, 2011) and 23 items of Performance Failure Appraisal Inventory (Conroy, 2001). The data analysis technique used is simple linear regression test and moderated regression analysis test performed by Andrew Hayes' macro PROCESS v3.5 installed on the IBM SPSS Statistics 22 for Windows software.

The results showed that there is an influence of parental expectations perception on fear of failure ($\beta = 2.275$, $R^2 = 0.041$, $p < 0.05$). In addition, it was also found that the relationship between perceptions of parents' expectations and fear of failure was not influenced by perceptions of fulfilling parental expectations ($\beta = -0.0068$, $p > 0.05$). This implies that no matter how high a child's success is in fulfilling parents' expectations, it is not able to reduce the fear of failure.

Keywords: Perceptions of Parents' Expectations, Fear of Failure, Perceptions of Fulfilling Parental Expectations, Fresh Graduate
