

## BAB 7

### PENUTUP

#### 7.1 Kesimpulan

Berdasarkan hasil penelitian yang telah dilakukan dapat disimpulkan bahwa terdapat perbedaan kecepatan adsorpsi darah golongan O pada *carbonate apatite-collagen scaffold* tanpa rehidrasi dan dengan rehidrasi saline.

#### 7.2 Saran

- a. Perlu dilakukan penelitian lebih lanjut mengenai karakteristik dari *carbonate apatite-collagen scaffold* untuk menyempurnakan penelitian ini.
- b. Perlu dilakukan perbaikan dari teknik untuk penelitian, seperti menyempurnakan alat penyangga rangkaian pipa ukur dan pembacaan pipa ukur.
