

**PENGARUH MIGRASI BERMOTIF *RISK-COPING*
TERHADAP PENGELUARAN KONSUMSI RUMAH TANGGA
PER KAPITA DI INDONESIA**

ABSTRAK

Penelitian ini bertujuan untuk mengetahui pengaruh migrasi *risk-coping motive* terhadap pengeluaran konsumsi per kapita riil rumah tangga migran di Indonesia. Variabel pengeluaran konsumsi rumah tangga per kapita digunakan sebagai indikator kesejahteraan rumah tangga, selain itu penelitian menggunakan karakteristik rumah tangga dan karakteristik wilayah pada variabel kontrol sebagai penunjang pengelompokkan rumah tangga migran. Penelitian menggunakan data panel yang berasal dari *Indonesia Family Life Survey* (IFLS) pada dua gelombang yaitu tahun 2007 dan 2014, dengan metode evaluasi dampak menggabungkan *Propensity Score Matching* (PSM) dan *Difference in Difference* (DID). Hasil penelitian menunjukkan bahwa migrasi dengan strategi pengurangan risiko memiliki dampak yang positif terhadap peningkatan pengeluaran konsumsi per kapita riil rumah tangga migran di Indonesia.

THE EFFECTS OF *RISK-COPING MOTIVE* MIGRATION ON HOUSEHOLD CONSUMPTION EXPENDITURE PER CAPITA IN INDONESIA

ABSTRACT

This research aims to determine the effects of migration with *risk-coping motive* on per capita consumption expenditure of migrant households in Indonesia. Household consumption expenditure per capita is used as an indicator for the welfare of the household, in addition this research also used the characteristics of household and regional as control variables. The research also used panel data from Indonesia Family Life Survey (IFLS) on two separate waves, first in 2007 and 2014, with impact evaluation method combining Propensity Score Matching (PSM) and Difference in Difference (DID). The output of the research shows that migration with minimize risk strategies have positive impacts in the increase of household consumption expenditure per capita of migrant households in Indonesia.
