Dear Author,

Greetings from JCDP

Kindly go through each of these points and make the applicable changes to your manuscript

1. Kindly prepare a Title page with individual author details (full names) and provide contact details of corresponding author.
  2. Prepare a **short running title** for your manuscript to be used as header for each page. (Length: not more than 10 words).
  3. **Keywords:** Keywords should be arranged in alphabetical order.
  4. cementoamel junction (CEJ, resulting- close the bracket
  5. This conditions can be occurred as a result of mechanical compression so that cell become hypoxia - correct the sentence
  6. The goals of the surgical for gingival recession - correct the sentence
  7. Mucogingival surgery may covering the root up to the- correct the sentence
  8. Afterward, partial-thickness supraperiosteal envelope by sharp dissection extending 3 to 5 mm laterally and apically to areas of recession, undermining intermediate papillae.<sup>7,8</sup> - reframe the sentence
  9. In this context, this article aims to introduce and evaluate clinically outcomes- correct the sentence
  10. Access from gingival culcus is very sensitive because - correct the spelling
  11. The anatomical structure like these, lead to difficult to separate - correct the sentence
12. Kindly run a **spell check in MS word**, article requires major revisions in Grammar, many words have been misspelt. This would render the article unpublishable.
13. Discussion: Compare and contrast this study with similar other studies. Add a note on limitations of this study
14. Please provide any relevant clinical pictures/tables/graphs
