

COVER LETTER

Date May, 1st 2022

To,
Editor-in-Chief,
World Journal of Advanced Research and Reviews

Subject: submission of new manuscript for evaluation

Dear Sir/Madam,

I am enclosing herewith a manuscript entitled “**Salivary sIgA as A Predictor of Caries Risk in Stunting Children**” for possible evaluation as a **Review article** in World Journal of Advanced Research and Reviews.

According to various research, sIgA is a risk factor for the severity of dental caries. It is uncertain, however, whether stunting in children has an effect on dental caries. The purpose of this review is to identify whether sIgA can be utilized as a predictor of caries risk in stunting children. This is related to the high prevalence of stunting, particularly in Asia, and the high prevalence of caries, particularly in Indonesia.

Therefore, the authors aim to explore further and provide benefits, especially in the field of pediatric dentistry.

All of the authors declare that they have all participated in the design, execution, and analysis of the paper, and that they have approved the final version. Additionally, there are no conflicts of interest in connection with this paper, and the material described is not under publication or consideration for publication elsewhere.

Thank you.

Sincerely,

Corresponding Author name: Dr. Udiyanto Tedjosongko

Dear Author,
Greetings for the day...

We are pleased to inform you that your manuscript (**Manuscript ref. no. WJARR-2022-0391**) entitled "**Salivary sIgA as A Predictor of Caries Risk in Stunting Children**" is approved for further publication process after initial editorial review.

In order to proceed for publication of your manuscript as fast as possible, follow the below steps

1) Provide Author's Declaration form (If not submitted earlier) and Author's name details. Your article cannot be published until the publisher has received the appropriate signed Author's Declaration form and filled Author's name details form (Download both forms from website. <https://wjarr.com/content/downloads>)

2) Make the payment of Article processing charges: within seven working days after receipt of this e-mail using as details given below

A) Online payment through RazorPay: Using debit cards, or credit cards or Razorpay log in credential.

Amount payable through RazorPay is Total USD 32.00 (USD Thirty two only)

[Article processing fee (USD 30.00) + Transaction charges (USD 2.00)]

Click on link and follow instructions: <https://rzp.io/NLH0xdL>

B) Online payment through PayPal: Using PayPal log in credential, debit cards, or credit cards.

Amount payable through PayPal is Total USD 32.00 (USD Thirty two only)

[Article processing fee (USD 30.00) + Transaction charges (USD 2.00)]

Click on below link and follow instructions: <https://wjarr.com/content/paypalrjp>

Author must e-mail copy of Payment details (Transaction ID) along with details involving Name of corresponding author, e-mail of corresponding author, manuscript number and Title of the manuscript to the editor of World Journal of Advanced Research and Reviews (WJARR) at editor@wjarr.com.

Please be aware that your manuscript can not be published until all above steps are followed.

If you need more information, feel free to contact us.

With Best Regards,
Managing Editor
World Journal of Advanced Research and Reviews (WJARR)

Dear Author,
Greetings for the day...

We are grateful for your association with us. Please find herewith attached final edited version (as a word file) of your manuscript (ref no. WJARR-2022-0391) entitled "**Salivary slgA as A Predictor of Caries Risk in Stunting Children**" which is accepted for publication in World Journal of Advanced Research and Reviews (WJARR).

Download Author proof copy of your manuscript: <https://wjarr.com/sites/default/files/Attached%20Files/WJARR-2022-0391%2...>

Download Author query form: <https://wjarr.com/content/downloads>

Special Note:

1. Provide the name(s) of authors as First Name (Given name)-Middle Name- Last name (Family name/Surname) for each author and check that all names are accurately spelled. It is important from Indexing purpose.
 2. Scientific names of plant/animal/microbes should be written in Italics and follow nomenclature rules like *Genus species*. Check this throughout the manuscript.
 3. Provide appropriate acknowledgments in the manuscript.
 4. Instead of writing superscript number while citing reference in text, references should be numbered (numbers in square brackets as "[1]" without superscript effect) in text and in the list in the order in which they appear first in the text.
-
5. While writing reference citation in the main text at the end of sentence, author has put full stop before reference number ".¹". It should be corrected by writing full stop after reference number in square bracket as "[1]". Check and correct throughout the manuscript.
 6. In the reference section, highlighted references are not provided in detail, author should write this reference appropriately and complete.
 7. In the reference section, use only English language for writing manuscript. Use Google translate and convert text from local language into English.
 8. Ensure that, all the references appearing in the text should be enlisted at the end in reference section and vice versa.
 9. References should be cited in the text, strictly as per author's guideline provided in the Journal's website. Similarly, references in reference section should be written as per reference format (Vancouver style) given in instruction to authors on journal web site.

Without this we will not able to process your manuscript further.

We hereby request you that,

1. Read the proof at least thrice, note the errors and make necessary corrections (in blue colored text) to make the manuscript error free.
2. Do not change the format of the word file, just check the spelling and other errors in the attached text part.
3. Use this proof for checking the typesetting, editing, completeness and correctness of the text, tables and figures.
4. Significant changes to the article will only be considered at this stage with permission from the Editor.
5. Make sure that you send final approved copy of article proof along with duly filled Author proof form within 3 days after receipt of this e-mail.
6. **Your manuscript will not be further processed for publication until and unless we receive your final approved article proof and Author query form.**
7. **It is responsibility to author to check each and every word and spelling including italic and normal formatting of specific names. No changes will be accepted after this. If any changes are expected after publication of manuscript, author will have to pay charges accordingly.**

We would appreciate to receive your corrected proof as a word file by e-mail within stipulated time period so that we can process your article quickly and efficiently.

Thank you for submitting your work to this journal.

If you need more information, please do not hesitate to contact us.

With Best Regards,
Managing Editor
World Journal of Advanced Research and Reviews (WJARR)

Salivary slgA as a predictor of caries risk in stunting children

Udijanto Tedjosasongko *, Aisyah Marwah and Ardianti Maartrina Dewi
Department of Pediatric Dentistry, Faculty of Dental Medicine, Universitas Airlangga, Surabaya, Indonesia.

World Journal of Advanced Research and Reviews, 2022, XX(XX), XXX-XXX

Publication history: Received on 29 March 2022; revised on 02 May 2022; accepted on 04 May 2022

Article DOI: xx

Abstract

Background: Stunting has a detrimental influence on the health and development of children and has a number of negative consequences, including an increase in mortality as a result of a loss in bodily immunity, which makes youngsters more susceptible to illness. Additionally, there are impairments in cognitive capacities, as well as learning and productivity in adulthood. Stunting prevalence is relatively high in Indonesia, at 30.8%, compared to the global prevalence of 22.2%. Stunting children tend to have protein energy malnutrition (PEM) condition, which can lead in salivary gland atrophy, decrease slgA levels, and disrupting the buffering system, cleansing, and antibacterial agents. It is able to increase the risk of dental caries.

The purpose of this review is to determine whether salivary slgA levels can be used to predict the risk of developing caries in stunted children.

Keywords: Stunting; slgA; *Streptococcus mutans*; Caries; Children
