COMMENTS for Authors:

EDITORIAL COMMENTS:

- Highlight all corrections/additions in red color font in revised manuscript.
- Please answer all the comments below point-by-point in an accompanying response letter to your revised submission and include your responses at appropriate paragraphs in the revised word file.
- Include all authors name, affiliation and email address in revised Word file as per format and style of Veterinary World. Please check latest article from www.veterinaryworld.org for format of this section.
- All reference no. in the text must be in continuous no. as per style of Veterinary World and amend the reference section accordingly if you have not done it.
- Please divide the introduction into 3 paragraphs if you have already not done. Introduction must be divided into 3 paragraphs i.e., 1. introduction 2. significance of the study and 3. aim of the study.
- Include authors' contributions (refer just below the conclusion section in latest article from www.veterinaryworld.org for format of this section) if you have not added.
- Include Acknowledgements along with source of fund for this study if you have not included.
- All journal names in references must be as per standard journal abbreviation.
- If you will not revise strictly as per suggestion then there will be chance of rejection. So, revise carefully. If you have any query then please email to Editor-in-Chief.

=> Reviewer # 1

- The article is interesting. But, a paragraph may be added in the introduction part regarding the safety of the extract of Golden Sea Cucumber though it is already used as food.
- The hyperglycaemia was characterized with blood glucose level >300 mg/dl. This statement requires a reliable reference or the authors must mention that how they have standardised it.

=> Reviewer # 2

This reviewer has the following concerns:

1. In the introduction section, the authors need to describe why this study was needed in first place. In other words- why it is important to study this disease and this model (diabetes mouse model)? Diabetes is a major health problem among human beings - how much percentage of the world population is affected and what is the incidence in Indonesia? Is there an effective treatment? How many good models exist to study this disease and how effective they are?

Similarly, the authors need to elaborate on how the findings in this paper will be useful to treat this disease. Indonesians consume this as a food and medicine- what all conditions can be treated?

2. Statistical results are unclear to this reviewer. Please elaborate on what does superscripts a, b, and c means in the table 1 and 2. Which groups are compared- are they all compared to controls? Statistics should be done or shown in the figures too.
