Manuscript Number.: HELIYON-D-19-02402  
Title: THE IMPACT OF ORAL HEALTH ON PHYSICAL FITNESS: A SYSTEMATIC REVIEW  
Journal: Heliyon

Dear Dr Bramantoro,

We have now received all of the reviewers' comments on your recent submission to Heliyon.

The reviewers have advised that your manuscript should become suitable for publication in our journal after appropriate revisions.

If you are able to address the reviewers' comments, which you can find below, I would like to invite you to revise and resubmit your manuscript. Please note that Heliyon focuses on technically correct science and you are only expected to include revisions that are necessary to ensure that the content and the conclusions of the research are technically correct.

We ask that you respond to each reviewer comment by either outlining how the criticism was addressed in the revised manuscript or by providing a rebuttal to the criticism. This should be carried out in a point-by-point fashion as illustrated here: <https://www.cell.com/heliyon/guide-for-authors#Revisions>

To allow the editors and reviewers to easily assess your revised manuscript, we also ask that you upload a version of your manuscript highlighting any revisions made. You may wish to use Microsoft Word's Track Changes tool or, for LaTeX files, the latexdiff Perl script (<https://ctan.org/pkg/latexdiff>).

To submit your revised manuscript, please log in as an author at <https://www.editorialmanager.com/heliyon/>, and navigate to the "Submissions Needing Revision" folder under the Author Main Menu.

I look forward to receiving your revised manuscript.

Kind regards,

Sushma Sonale

Associate Editor - Clinical Research

Heliyon

Editor and Reviewer comments:

Reviewer #1: No mention made about the effects of stress, age, environmental factors, rate of development of the country or the place of the subjects. Sourced paper has selection bias which is not considered.

Physical fitness tests cannot be used to gauge the physical fitness of all individuals because of personal limitations.

Dentulous patients can also have problems with balance due to inner ear problems.

Social status, use of refined and fat rich food, lifestyle diseases, awareness of exercise in the general population have not been considered.

Periodontal disease markers are many in number yet only clinical attachment loss, bleeding on probing and probing depth are mentioned.

Endodontic burden is reduced in a well treated and irrigated root canal. It cannot therefore be called a burden. The literature never suggests whether the teeth were properly endodontically treated or not. The assumption of bacteria still remaining in a root canal treated tooth cannot be made. If improperly treated, it will lead to further periapical infection which has not been considered in the literature review.

Activate Windows  
Go to Settings to activate Windows

Reviewer #2: Methods: SCOPUS, WEB OF SCIENCE, google scholar data SHOULD have been included.

Results: can be fine tuned

Interpretation: can be fine tuned

Other comments: need major revision in English and there are grammatical errors.

Title: THE **IMPACT OF ORAL HEALTH ON PHYSICAL FITNESS: A SYSTEMATIC REVIEW**

Journal: Heliyon

Dear Dr Bramantoro,

Thank you for submitting your manuscript to Heliyon.

I am pleased to inform you that your manuscript has been accepted for publication.

Your accepted manuscript will now be transferred to our production department. We will create a proof which you will be asked to check, and you will also be asked to complete a number of online forms required for publication. If we need additional information from you during the production process, we will contact you directly.

We appreciate you submitting your manuscript to Heliyon and hope you will consider us again for future submissions.

Kind regards,  
On Ching Lo  
Editorial Assistant  
Heliyon
