Reviewer A:

The Abstract must have an objective, methodology, results and conclusion. I haven't found all of these elements. The conclusion must have an answer to the objective, limitations of the study and contributions to future approaches to the theme. I haven't found all of these elements. Reviewer B:

Authors. I liked the article which is quite interesting. I suggest approval after making a few improvements:

- 1) We kindly ask you to write title, abstracts and key words in English, Portuguese and Spanish... You can use google translator that here we can adjust without difficult.
- 2) The methodology needs to be better detailed: what type of methodology is used? is it of a qualitative or quantitative nature? Which author provides methodological support for this type of research?
- 3) Tables need to be better explained or dialogued for the reader to take advantage of them.
- 4) In the final remarks, write a final paragraph in which you will say what the suggestions for future work are.

In addition, I wish the authors success. Cordially, the Reviewer.
