ACKNOWLEDGEMENTS

Writing this thesis is surely a great experience for me. I discover so many things about myself that I am capable of doing or doing. I had my lowest low and my highest high during the process but, in the end, I find myself grow more mature compare to where I started. It does sound a bit cheesy for some people, but it is true. From where I am now, I can gladly say that it is over and I cherish every moment I had gone through.

First of all, I would like to say my huge gratitude to Allah SWT, who never fails to light up my spirit when I was down.

This thesis will be never done without the help of my thesis advisor, Mr. Hariawan Adji, S.T., S.S., M.Kes. Thank you for your great aid and advice. Thank you for making me critical toward everything. I would also like to thank the rest of lecturers of Airlangga University for their guidance and knowledge for all these times.

Undoubtly, I would like to thank my parents who never forget to spirit me in doing this thesis. Also, I want to thank my brother who used to give much information about my topic of this.

There are still names to thank because without these guys I would not have great college years. Thank you to Hana, Resti, Leli, Nuke, Nia, and my friends in HMI. Thank you for your support. Sometimes I know can be such an annoying people.
