i Improved CiteScore methodology

CiteScore 2020 counts the citations received in 2017-2020 to articles, reviews, conference papers, book chapters and data papers published in 2017-2020, and divides this by the number of publications published in 2017-2020. [Learn more >](#)

CiteScore 2020 ▼

$$2.8 = \frac{1,037 \text{ Citations 2017 - 2020}}{369 \text{ Documents 2017 - 2020}}$$

Calculated on 05 May, 2021

CiteScoreTracker 2021 ⓘ

$$2.8 = \frac{1,303 \text{ Citations to date}}{473 \text{ Documents to date}}$$

Leite Cavalcanti Alessandro 11 Oct 2021

to me ▾

Dear Rizqiawan Andra ,

In order for your submission "Post-operative Complications of Impacted Mandibular Third Molar Extraction Related to Patient's Age and Surgical Difficulty Level: A Cross-Sectional Retrospective Study" to International Journal of Dentistry to proceed to the review process, there needs to be a revision.

Reason & Details:

The reviewer(s) have recommended consideration for publication, but also suggested some revisions to your manuscript. Therefore, I invite you to respond to the reviewer(s)' comments and revise your manuscript, in order for it to be able to be considered for acceptance. Please highlight all text changes using

The reviewer(s) have recommended consideration for publication, but also suggested some revisions to your manuscript. Therefore, I invite you to respond to the reviewer(s)' comments and revise your manuscript, in order for it to be able to be considered for acceptance. Please highlight all text changes using another font color.

Abstract

Use the unabbreviated version of the word in first use in the text (OMFS in present manuscript), then mention the abbreviation between parenthesis.

Materials and Method

How did researchers measure the² Edema? Did they use a plain ruler or 3D photos? The measurement method must be mentioned in this section. The measurement method of trismus is also missing.

Did researchers investigate the effect of total surgery time on edema?

Exclude the table labels from the material and method section.

Discussion

The authors can refer the edema measurement method and effect of the surgery time on post-operative complications from a similar manuscript that published by Soylu et al. (Emrah Soylu, Hüseyin Akçay, Gülfeşan Çanakci, Osman A. Etöz, Alper Alkan. Comparison of Pre-

Exclude the table labels from the material and method section.

Discussion

The authors can refer the edema measurement method and effect of the surgery time on post-operative complications from a similar manuscript that published by Soylu et al. (Emrah Soylu, Hüseyin Akçay, Gülfeşan Çanakci, Osman A. Etöz, Alper Alkan. Comparison of Pre-Operative Difficulty and Postoperative Morbidity in Third Molar Extraction. Ann Clin Anal Med 2019;10(5): 544-8).

References

It should be arranged according to the instructions of the journal.

Reviewer 2

- 1) Specify how many researchers collected the data.*
- 2) Were they previously trained through a pilot study?*
- 3) What is the data collection period (months and year)?*
- 4) What is the meaning of "incomplete medical record"? For example, has a percentage been established for the number of incomplete questions?*
- 5) What are the limitations of the study?*

For more information about what is required, please click the link below.
