Manuscript: EJD-2021-8-18 - (1677) - Decision-Making Criteria of Odontectomy Or Surgical Exposure In Impacted Maxillary Canine Based On Treatment Difficulty Index Modification

Date submitted: 2021-08-24

Dear Dr. Rizqiawan

Thank you very much for submitting the above manuscript to European Journal of Dentistry.

Your manuscript has now been evaluated by external reviewers and members of the editorial board. While we certainly find merit in your paper, a number of major points of criticism were raised and we therefore regret to inform you that your manuscript is not acceptable for publication in its present form. If you feel that you can adequately address the criticisms outlined in the reviewer reports below, we would be willing to reconsider a thoroughly revised version of your manuscript.

If you decide to resubmit your manuscript, please provide point-by-point answers to the reviewer criticisms in the text field provided during the online resubmission process and highlight any revisions made in your manuscript document.

We look forward to receiving the revised version within three (3) weeks and thank you, again, for submitting your manuscript to European Journal of Dentistry.

Reviewer report:

I would suggest the following modifications:

1. the introduction does not give a clear idea of the types of indices for the prognosis of impacted canine. It requires a short description of the prognostic index, treatment index, and the modifications are done.
2. It should be mentioned how the index was simplified.
3. The inclusion criteria are not clear.
4. The tables depicting the statistical test and the p values have not been added. Only demographic data is present.

Cross-referencing: We would like to emphasize that we attach great importance to cross-referencing recent papers on the same topic in the European Journal of Dentistry. Therefore, it would be highly appreciated if you would check the last 5 years of the European Journal of Dentistry and cite references relevant to your article.
