[Details](#)

Dear Idha

the articles just need to have a molecular, physiological or histological aspect to them. The protocol that you just proofed for MiMB is a great example of what we need. Also, the review you did previously for Adv Exp Med Biol was perfectly aimed

Please let me know if you would like to do one or both for this issue. Can you send me an approximate title (or titles if you want to do more than one). You are welcome to invite colleagues

best regards

Paul

Re: MiMB protocols

To: paul guest

6 May 2020 13.20

Dear Paul,

Thank you Paul. I hope you and your family also stay healthy.
I need your suggestion about the title of the review and the protocol.

Title of the review: The Challenge of Drug Penetration and Permeation Through The Skin

With the content as follows:

1. Introduction
2. Drug Penetration and Permeation Pathway
3. Factors that Influence Drug Penetration and Permeation into The Skin
4. Delivery System for Enhancement of Drug Penetration and Permeation

Title of the Protocol: Assessment of Topical and Transdermal Drug Penetration and Permeation Method on Rat Skin : Histomorphometric Analysis

What do you think ? Any suggestion for that ?

Thank you very much.

By the way, my colleague want to write the protocol method about antimalaria assay in vivo on mice. Is it okay ?

Best regards,

Idha

Re: MiMB protocols

To: idha kusumawati

6 May 2020 14.17

Dear Idha,

I think both titles and content are perfect. Just make it clear in both the abstracts and introductions that you will be describing natural product approaches

best wishes

Paul

Dear Paul,

Did you email before this?
I'm sorry if I can't find the email you sent earlier.

I'm also sorry that I didn't tell you about the progress of my article.
Many obstacles must be faced in connection with this pandemic.
We still difficult to do laboratory work because of restrictions. Apart from that, the university has targeted a lot of webinar activities so that it causes us to focus on holding them, we also have to change lectures and laboratory work into online activities.

Thank God, I can finish my article. Herewith, I send my article, but I'm afraid it's not too good. I need your suggestion for this article.

Best regards

Idha

Dear Idha,

don't worry. I figured there was something wrong with my E-mail messages. Maybe they were going to spam. Anyway, thank you for the protocol - it looks brilliant and has been accepted. I am just going through it and making a few small edits and formatting the references. I will send this back to you by tomorrow. Meanwhile can you complete the attached consent form and let me know in the text where to call out Fig. 4? This is missing from the text.

best regards

Paul

Re: Articles for MiMB

To: idha kusumawati

9 October 2020 17.47

Dear Idha,

here are two versions of your paper: one with track changes and a clean version

Can you please check through and then add in the possible missing items which I have indicated to the clean version (there are 3 or 4 materials and maybe two methods steps which I think should be added). Please highlight these new additions so I can easily find them.

Note that I emphasized the natural product to fit the theme of the book

many thanks once again for this excellent article.

Re: Articles for MiMB

To: idha kusumawati

28 October 2020 22.47

Dear Idha,

for the protocol can you make the following changes? Don't worry, it should be easy for you and it is still accepted. Some parts just need clearing up

many thanks

Paul

2.1 item 6, presumably this is what you're making in section 3 so no need to list here

2.1 item 9, can you give the detail of lipids and solutions. The reader needs to know what to purchase/prepare prior to starting section 3. Or do you mean the lipids that you're going to extract, in which case no need to list here.

3.3 step 1, what weight of extract and what volume of solvent?

3.3 step 4 what buffer and how much??

3.4 step 2, how do we get to a weight from section 3.3 where we end up with a buffer solution.

Can you describe what the histology is measuring? The abstract refers to 'using histological parameters' but there is no guidance as to what you are measuring. The abstract also talks about 'evaluating a liposome delivery system'. Can you make this clear in the method where this is? Finally, can you add a bit more on the description of the figures in section 3

A bit more is needed on the assessment of the effects on the skin.

many thanks. Again don't worry as I will have another look when you have had a go at these points above and I will help

best regards

Paul

19 November 2020 17:00

Dear Idha

just checking if the authorship listing is correct on your protocol

I have it as

Idha Kusumawati, Rohmania, Mega Ferdina Warsito, Eka Pramytha Hestianah

Is Rohmania correct (no surname)?

best wishes

Paul

PS do you think you will have that review in time?

SPRINGER NATURE

Dear Dr. Idha Kusumawati,

I am happy to inform you on behalf of Springer Nature that the proofs of your book chapter "**Assessment of Topical and Transdermal Penetration of Curcuma heyneana Rhizome Extract**Curcuma heyneana rhizome extract in Rat Skin: Histological Analysis" are now available.

We have introduced a new online correction system, which allows you to directly incorporate your corrections, thereby eliminating any possible misunderstandings arising from misinterpreted handwritten corrections. This ensures that publication of the book is not delayed by additional rounds of correction.

Please note that the only changes that can be made at this stage are limited to typographical mistakes and serious errors in content.

Please check the author/editor names very carefully to ensure correct spelling, correct sequence of given and family names, and that the given names and family names have been correctly designated (NB the family name is highlighted in blue). Please also provide an answer to any Author Queries raised during typesetting. Unanswered queries will lead to delays in publication.

To access your proofs, please click on the link below, or copy and paste it into your browser window:

[http://www.springer.com/978-1-0716-1557-7](#)

https://eproofing.springer.com/books_v3/index.php?token=qWlJvyQmOYjlLS0_bLqcgVOiLmYMC9NoKgBM3uPVUxjrN_tqXD_mGpzccRpa-VUa

If you are responsible for returning the proof correction, please return the corrected proofs by **11 May 2021**.

If you have any questions, please feel free to contact me.

We welcome your comments and suggestions. Your feedback helps us to improve the system.

Cordially,

L.Radha
