Review Article for Adv Exp Med Biol

To: matunami@hiroshima-u.ac.jp, idha-k@ff.unair.ac.id

29 November 2018 17:52

Dear Drs Kusumawati and Matsunami,

I am editing an issue for **Advances in Experimental Medicine and Biology (Adv Exp Med Biol)** entitled **Reviews on Biomarker Studies in Anti-Aging Research** and was hoping that you and/or your colleagues would be interested in submitting an article.

There are **no publication costs**, all articles appear on **PubMed** and you get a **free copy of the book**.

The **deadline is May 1, 2019** and you can propose anything you like that fits the theme. However, an article on **The anti-Aging Properties of C. Heyneana** would be ideal given the insights into the aging process.

I have attached the author instructions and an example review article.

Looking forward to hearing back from you

best regards

Paul

sample.pdf

Instructions for Authors

Review Article. Word count 3000 to 10000. Provides an authoritative, balanced, comprehensive, fully referenced and critical review of the literature.

Title Page

The title page should include:

A concise and informative title

The name(s) of the author(s)

The affiliation(s) and address(es) of the author(s)

The e-mail address of the corresponding author

A running title (~30 characters or less)

An abstract of 100 to 250 words.

Key words (4-8)

Text Formatting

Manuscripts should be submitted in Word.

Use a normal, plain font (e.g., 12-point Times Roman) for text.

Use tab stops or other commands for indents, not the space bar.

Use the table function to make tables.

Use the equation editor or MathType for equations.

Abbreviations

Abbreviations should be defined at first mention and used consistently thereafter.

Acknowledgments

Acknowledgments of people, grants, funds, etc. should be placed in a separate section after the text and before the references. The names of funding organizations should be written in full.

Reference list

The entries in the list should be numbered consecutively. When there are more than 6 authors, use "et al" after author number 6. There should be no period (full stop) at the end

Examples:

Journal article

Smith JJ, Jones DR, Xhang P (1999) The world of science. Am J Sci 36:234-245

Thomson AD, Jones DR, Xhang P, Xu P, Smith JJ, Williams R et al (2001) PLoSOne 10:4.
doi.org/10.1007/s001090000086

Book

Blenkinsopp A, Paxton P (1998) Symptoms in the pharmacy: a guide to the management of common illness. 3rd ed. Oxford: Blackwell Science. (ISBNs should be included if available)

Book chapter

Wyllie AH, Kerr JFR, Currie AR (1980) Cell death: the significance of apoptosis. In: Bourne GH, Danielli JF, Jeon KW, editors. International review of cytology. London: Academic. pp. 251-306. (ISBNs can be included if available)

Online document

Doe J (1999) Title of subordinate document. In: The dictionary of substances and their effects. Royal Society of Chemistry. <http://www.rsc.org/dose/title of subordinate document>. Accessed 15 Jan 1999

Always use the standard abbreviation of a journal's name according to the ISSN List of Title Word Abbreviations.

30 November 2018 19.11

Dear Dr. Paul C Guest,

Thank you for your invitation. Yes, you are right, I am interested in submitting a review of articles relating to my research on The Antiaging Properties of *C. heyneana*. Do I have to send an abstract or outline of the manuscript?

best regard,
Dr. Idha Kusumawati

To: idha kusumawati

30 November 2018 19.16

Dear Dr Idha Kusumawati

Thank you for your acceptance. I look forward to your manuscript. You don't need to send an abstract or outline but please send me your approximate title and author list within the next month or so.

Please let me know if you need anything else from me

best regards

Paul

Re: Review Article for Adv Exp Med Biol

To: idha kusumawati

13 February 2019 22:00

Dear Dr Kusumawati,

I am just checking to see how you are getting on with the review article?

Also, just letting you know that I am editing a book of protocols for **Methods in Molecular Biology** and thought one on the antiaging properties of *C. heyneana* would be perfect for a special issue called **Models for Maximising Healthspan: Protocols and Methods**. Would you be interested? These chapters are much easier to generate than reviews and again there is **no cost**, all articles **appear on PubMed**, and you will receive a **free copy of the final book**.

The deadline is Sept 30, 2019.

I have attached an example article and the instructions so you can see what I am talking about.

Looking forward to hearing from you

best regards

Paul

Re: Review Article for Adv Exp Med Biol

To: paul guest

15 February 2019 07.41

Dear Dr. Paul C Guest,

Thank you for your invitation again. I have read the sample article and you are correct this article is easier than writing a review.

But I want to ask a few things related to the writing. Can I write the method and the results of the histology test in my published article (antiaging properties of *C heyneana*)? Will it not be included in the category of self plagiarism?

best regards

Re: Review Article for Adv Exp Med Biol

To: idha kusumawati

15 February 2019 14.42

Dear Dr Kusumawati

yes you can use those but more detailed with the materials and methods in a **numbered step-wise fashion** (as in the example). As for the results these should appear in the methods section. Also, if you have a figure either change it slightly or convert it to a table. You could also change a table into a figure. The main emphasis should be on the materials (people, compounds, analytical tools), the methods (step-wise how to do the procedure itself, and the notes section (special insights and/or alternate suggestions).

Also, I will make sure it is not self plagiarism if you send me your published article along with your final submission and I will help to change this one if necessary so it is different.

I hope this helps

best regards

To: idha kusumawati

8 April 2019 23.06

Dear Idha

I have attached the consent form for the protocol chapter in Methods in Molecular Biology for you to use with this article. Also thank you for completing this way ahead of schedule.

The consent form I sent you a few days ago is for the review article that you are writing for Adv Exp Med Biol. Can you use that one for that article?

best regards

Paul

9 April 2019 16.50

Dear Idha,

I am just about finished with the edits to your paper and I am happy to tell you that it has been accepted for publication in the special issue of Methods in Molecular Biology - Models for Maximizing Healthspan: Protocols and Methods

Meanwhile, can you send me a PDF of your paper entitled:

[Anti-aging properties of Curcuma heyneana Valeton & Zipj: A scientific approach to its use in Javanese tradition.](#)

best regards

Paul

9 April 2019 17.01

Dear Idha

sorry to bother you again but can you let me know if there is a mistake with the legends to figures 6 and 7. Both seem to describe the same thing but the scale and the image are different.

many thanks

Paul

Re: Review Article for Adv Exp Med Biol
To: idha kusumawati

9 April 2019 20.09

Dear Idha,

ignore the previous messages as I found the paper and determined what the error was on Fig. 7.

First of all, thank you because this is an interesting and valuable contribution, and enjoyed reading it (and I learned something new).

I have been through it, made some formatting changes (mainly the references) and then carried out some editing. I also added a few parts here and there so please check these for accuracy. I think they are needed though to make the chapter more descriptive.

One thing - do you know the thickness of the sections used in the histological analyses? If so, please add this.

Please check my corrections carefully as I may have misunderstood something and mark all changes on this document with track changes or highlights.

Also, please sign the attached consent form which is the right one for this paper.

best regards

Paul

Dear Idha

here is the accepted version. You will also receive proofs that you can correct sometime around November and publication will hopefully be by the end of the year

Thank you for working on the review. I am really looking forward to it after your last interesting article. For the references part, can you please put these in the same format as in the attached article - or as close as possible?

best regards
