ACKNOWLEDGEMENT

I would like to express my biggest gratitude to Allah SWT for the chance and strength He gave to me so I can complete this thesis. I would also say thank you for all those who gave me the possibility to complete this thesis. Special thank I present to Mr. Nurhadi and Mr. Totok, as the teachers of hearing impaired students of SMALB-B Karya Mulia Surabaya, who gave a chance for me and my partner to conduct the research there. This thesis would never be accomplished without the help of my thesis advisor, Mrs. Masitha A.S.,M.Hum. Thank you for your guidance and great patience in guiding me through the process of writing my thesis. For my beloved Mom and Dad, my old brother, and my twins' brothers, thank you so much for never let me stand alone, always pray for me, and support me.

Due to the obstacles and temptations I had when I was writing my thesis, special thanks are also delivered to all friends in Information and Public Relations Centre of Universitas Airlangga, who always support me to finish my academic schedule very well. For all hearing impaired students who have been willing to be the participant of this research, thank you for remaining me to be more grateful of the things I have had. To my best partner, Ismia Rahmah, second time being partner in doing final task, you are still the best. For cunners, Handry Haryanto and Martina Putri, and all former colleagues from AJ 2011, Afi, Christya, Nita, Sasmita, Rafmil, Ilham, and others thanks for your help and support. Last but not least I would like to give my special thanks to Angga Panca Adianto whose patient, love, and support enabled me to complete this thesis.
