ACKNOWLEDGEMENT

There are many studies about term of address have been made and it will be never end because it will open the phenomena for continuing the studies due to the variety of language and other factors related.

This thesis attempts to introduce one of linguistic characteristics in Kalam Jamaah, a hybrid language spoken by Arab people in Kelurahan Ampel Surabaya. In this thesis the writer tries to describe the variety of Kalam Jamaah term of address in kinship and other factor related.

Many people have helped the writer since the early time until the finishing of the thesis. The writer would like to thank Dede Oetomo, PhD, Mrs Rochayah, PhD, and Drs Juriyanto for providing the information and share their ideas. In particular the writer owes a special debt to Drs Husein Shahab who has patiently advised, edited, and shared his ideas in the writing of this thesis.

Last but not least the writer would like to thank his friends especially Mochamad Zaini in Computer Department, Faculty of Industrial Technique ITS Surabaya for his assistance in computerizing process of this thesis, and Pandu Buwono, Hery, R Bagio, Anang Subagyo, Priyono, and Thomas Riadi for their support and information and also the families whose nights have been disturbed by the writer's questions and interviews.

The writer hopes this thesis will be useful to the readers to get clear understanding about the variety of term of address in kinship in hybrid language.
