ACKNOWLEDGEMENTS

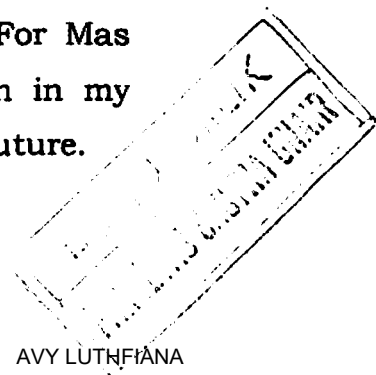

All praises and gratitudes be to Allah Subhanahuwata'ala, the most gracious, the most merciful for every favour He gives to me in pursuing His way. For Muhammad, the most beloved prophet, peace and blessing are always above him.

My deepest appreciation goes to Dra Sudijah Sudarmo, M.A. for guidance and patience during her busy time in the process of accomplishing this thesis. My words of thanks go to all the lecturers of the English Department especially to Mrs Sumarto D, M.Ed who gave an opportunity to touch the lofty knowledge. I always remember their good intentions.

I would like to express my thanks to Ayah, Ibu, Avon and Ucik for their loves and prayers. Throughout my life, they have been and still are ever ready to assist me in my various endeavours. For Mas Ferry, thank you very much for his encouragement, partnership, good humour and computer expertise. He is more than a dear brother who always gives light when I lose in the darkness. He is always in my heart now and forever.

To my uncle, Ir. Dwi Puguh Libriyatno, thank you for his irreplaceable help in collecting the data and also valuable information needed, and to the pharmacist assistants who have participated as respondents in the tests. I am truly aware that without them I couldn't do my best in this study. Hopefully this will also be useful for them.

I must say a special thank to I'in and also my roommate, Yeti. They are much appreciated as friend and tutor. For Mas Fanani, my senior, thank you for giving finishing touch in my work. I am hoping for other critics and suggestions in the future.

Finally, I must thank a number of people who have encouraged and helped in many ways for the completion of this thesis particularly the big family of Gubeng Airlangga II/33 and all my colleagues in the English Department Airlangga University.
