Dear sir/madam,

We intend to publish an article entitled "response evaluation on single common and uncommon EGFR mutation on first-generation EGFR-TKI therapy in NSCLC patients" in your esteemed journal as an original article.

On behalf of all contributors I will act and guarantor and will correspond with the journal from this point onward.

In this paper, we report on comparison of response evaluation in single common and uncommon EGFR mutation on first-generation EGFR-TKI. This is significant because only single mutations were included in this study so the response shown after TKI therapy was not confounded by the presence of other mutations in the dual/complex/compound mutations as in previous studies. The paper should be of interest to readers in the areas of pulmonology and oncologist physicians, residents and researchers in pulmonology and oncology specialties.

This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors.

The authors declared no potential conflict of interest with respect to the research, authorship, and/or publication of this article.

All authors have approved the manuscript and agree with its submission to the Indian Journal of Forensic Medicine and Toxicology.

We hereby transfer, assign, or otherwise convey all copyright ownership, including any and all rights incidental thereto, exclusively to the journal, in the event that such work is published by the journal.
Thank you.

Best Regard

Laksmi Wulandari
