Message body:  
Dr iswinarno doso saputro:  
We have reached a decision regarding your submission to Annals of Burns and Fire Disasters, "(ANN-1385) "Off Label" Drug Use in Pediatric Burns (Three years retrospective study)".  
Our decision is to : Resubmit the revised manuscript for reviewing  
your manuscript could be considered for publication in the journal pending major revision.  
26 patients included in the study: The inclusions criteria in this study were children and adolescents with burn injury aged less than 18 years old and received at least one medication during hospitalization  
Twenty four patients received of a mean  $2.87 \pm 1.89$  off-label prescribing medicines ranging from 1 to 6 – What about the remaining 2 patients? You mentioned later in the text: the overall off-label medicine use in pediatric burn injuries was 33%. Of 26 pediatric burn injuries. 24 patients

Twenty four patients received of a mean  $2.87 \pm 1.89$  off-label prescribing medicines ranging from 1 to 6 – What about the remaining 2 patients? You mentioned later in the text: the overall off-label medicine use in pediatric burn injuries was 33%. Of 26 pediatric burn injuries, 24 patients received off-label medicine prescriptions. Therefore you should have included in the study 24 patients only not 26 Thus all your statistics must be revised

The overall off-label medicine use in pediatric burn injuries was 33%. Of 26 pediatric burn injuries, 24 patients received off-label medicine prescriptions. It means the rate of off-label use in this study was 92.30%. ??????. You should exclude from the study the 2 children that did not receive off label medications or you should change your inclusion criteria

Metamizole, or dipyrone: Banned in the US and much of Western Europe because it can cause serious or fatal blood damage called agranulocytosis - a disease which decreases the body's ability to produce white blood cells for fighting infection. This has been mentioned in the text however you concluded that Metamizole is only used when analgesic or other antipyretics are not successful, or if the patient is intolerant or hypersensitivity to other analgesics or antipyretics !!!!! why it is then "The most therapeutic medicines that written off-label in our study were analgesics and metamizole was the highest among off-label analgesics" ??????

Paragraph about analgesics in pediatric patients must be revised and recommendations about use of Metamizole and dosages should be deleted

Very difficult to read and understand what you mean  
Text needs extensive linguistic editing

In case you need to have the language in your manuscript edited by a native-English speaking language editor who is also a scientific expert, the help of an editing service is recommended. Use of the editing service is neither a requirement nor a guarantee of acceptance for publication. However, improving the English-language quality of a manuscript will make it easier to understand during peer review, meaning that your manuscript can be judged on its scientific merit.

You are requested to revise your manuscript accordingly and resubmit it within 4 weeks. We make every effort to publish accepted manuscripts in a timely fashion, so please submit your revisions at your earliest convenience.

To submit your revised manuscript you should log in to the page of your initial submission. You go then to the Review page and Upload the Author Version (under Editor Decision).

When submitting your revised manuscript, you must include a cover letter that addresses each point and how your manuscript was changed as a result. Please track also your changes either using Microsoft Word or highlight them in red font in the revised manuscript, so that our editors and reviewers can

When submitting your revised manuscript, you must include a cover letter that addresses each point and how your manuscript was changed as a result. Please track also your changes either using Microsoft Word or highlight them in red font in the revised manuscript, so that our editors and reviewers can easily find your alterations.

If you would be so kind, let us know whether you will be able to make the suggested revisions by replying to this e-mail.

Should you require an extension of the 4 weeks deadline, you must notify the Editorial Secretary in writing confirming that you have accepted to revise your manuscript and specifying the time you need for the revision. In case the editorial office does not receive your revised manuscript within the set deadline, it will be considered as rejected. You may still resubmit your manuscript, however, it will be treated as a new submission.

I look forward to hearing from you and working with you during the publication process. Thank you once again for your submission to "Annals of Burns and Fire Disasters".

Please note that "Annals of Burns and Fire Disasters" is a full double blind peer-reviewed journal and is listed on PubMed and Scopus. If you have any questions, please feel free to contact our Editorial Office at: [mbcpa@medbc.com](mailto:mbcpa@medbc.com)

Dr iswinarno doso saputro:

We have reached a decision regarding your submission to Annals of Burns and Fire Disasters, "(ANN-1385) "Off Label" Drug Use in Pediatric Burns (Three years retrospective study)".

Our decision is to: Accept the revised manuscript for publication

Please note that the publication process of your manuscript will now be initiated.

In our efforts to provide the highest publication quality, the manuscript will now be subjected to language copyediting, typesetting, and reference validation. To proceed with the text editing process there is a charge of €100. For manuscripts submitted by authors from high income countries, as of June 1st 2018, the charge is €350 (International Monetary Fund Classification). The fee to receive 50 reprints of published manuscripts is €100. In case colored figures are attached to the manuscript, an additional fee may be applicable.

Text: Dr iswinarno doso saputro: We have reached a decision regarding your submission to Annals of Burns and Fire Disasters, "(ANN-1385) "Off Label" Drug Use in Pediatric Burns (Three years retrospective study)". Our decision is to : Resubmit the revised manuscript for reviewing

Comments: Poorly written and disorganized, Abstract not clear, needs extensive text editing, Table about demographic data is irrelevant

Definition: Off-label use is the use of pharmaceutical drugs for an unapproved indication or in an unapproved age group, dosage, or route of administration

Clarification: Do you mean by dosage form route of administration? You should say: off-label for age (not in age), etc...

Dr iswinamo doso saputro:

We have now copyedited your submission "(ANN-1385) "Off Label" Drug Use in Pediatric Burns (Three years retrospective study)" for Annals of Burns and Fire Disasters. To review the proposed changes and respond to Author Queries, please follow these steps:

1. Log into the journal using URL below with your username and password (use Forgot link if needed).
2. Click on the file at 1. Initial Copyedit File to download and open copyedited version.
3. Review the copyediting, making changes using Track Changes in Word, and answer queries.
4. Save file to desktop and upload it in 2. Author Copyedit.
5. Click the email icon under COMPLETE and send email to the editor.

This is the last opportunity that you have to make substantial changes. You will be asked at a later stage to proofread the galleys, but at that point only minor typographical and layout errors can be corrected.
