Dear Mr. Putra,

NOTE: This e-mail is sent to you as one of the contributing authors. If you are not corresponding author, please co-ordinate with the author designated by your group as the corresponding author for this manuscript

Status of the manuscript titled THE WOUND HEALING EFFECT OF ALLOGENEIC FREEZE- DRIED PLATELET- RICH PLASMA (PRP) IN A FULL THICKNESS WOUND ANIMAL MODEL' submitted by Mr. oki Putra has been changed and a copy of the mail is as;

Dear Mr. Putra,

Journal of Reports in Pharmaceutical Sciences has received your manuscript entitled "THE WOUND HEALING EFFECT OF ALLOGENEIC FREEZE- DRIED PLATELET- RICH PLASMA (PRP) IN A FULL THICKNESS WOUND ANIMAL MODEL" for consi deration for publication. The reference number for this manuscript is "jrtps_77_19". Kindly quote this in correspondence related to this manuscript.
Please note that the instructions provided by the journal have not been followed. Detailed remarks on this are available from our site <http://www.journalonweb.com/jrtps>.

You are requested to make the necessary changes in the manuscript within five days to start the review process.

We thank you for submitting your valuable research work to the Journal of Reports in Pharmaceutical Sciences.

Yours sincerely,

[jrtps]:Article not as per instruc X +

Dear Mr. Putra,

Journal of Reports in Pharmaceutical Sciences has received your manuscript entitled "THE WOUND HEALING EFFECT OF ALLOGENEIC FREEZE- DRIED PLATELET- RICH PLASMA (PRP) IN A FULL THICKNESS WOUND ANIMAL MODEL" for consideration for publication. The reference number for this manuscript is "jrptps_77_19". Kindly quote this in correspondence related to this manuscript.

The manuscript is being reviewed for possible publication with the understanding that it is being submitted to one journal at a time and have not been published, simultaneously submitted, or already accepted for publication elsewhere either as a whole or in part. Online submission of this article implies that the corresponding author has the written consent from all the contributors to act as cor responding author.

You are requested to send the signed copyright/contributor form within two weeks. The form can be uploaded as an scanned image from your area. The decision about the manuscript will be conveyed only on receipt of the form. High resolution images are required at the time of acceptance, you should be notified separately for the same, if images uploaded by you are not of printable quality.

The Editors will review the submitted manuscript initially. If found suitable, it will follow a double-blinded peer review. We aim to finish this review process within a short time frame, at the end of which a decision on the suitability or otherwise of the manuscript will be conveyed to you via this system. During this process you are free to check the progress of the manuscript through various phases from our online manuscript processing site <http://www.journalonweb.com/jrptps>.

The journal allow s free access (Open Access) to its contents and permits authors to self-archive final accepted version of the articles on any OAI-compliant

Dear Mr. Putra

With reference to your manuscript entitled 'THE WOUND HEALING EFFECT OF ALLOGENEIC FREEZE- DRIED PLATELET- RICH PLASMA (PRP) IN A FULL THICKNESS WOUND ANIMAL MODEL', please review the comments of the referees from our site <https://www.journalonweb.com/jrptps>. The manuscript would be reconsidered after requisite modifications as per the comments and instructions provided by the journal.

If you wish to continue with the publication process, kindly make the changes according to the comments and upload the revised manuscript from the site along with the point to point clarifications to the comments indicating clearly where in the manuscript the changes have been carried out. Do check the FAQ re lated to replying to the comments and uploading a file. The contributors' form/images should be sent separately to the Administrative Office of the journal.

The journal allows four weeks for the revision of the manuscript. If we do not hear from you within this period, we will consider it your non-desire to continue the article with us. Please also note that submission of revised article does not guarantee its final acceptance by the journal.

We thank you for submitting your valuable research work to Journal of Reports in Pharmaceutical Sciences.

With warm personal regards,

Editorial Team

For Authors

The introduction part, despite the fact that when freeze PRP is used, the number of platelets decrease substantially in comparison to the normal one. The merits of this project should be clarified more.

In the result part, the ketamine dose for anesthesia should be revised and it should have also been injected with xylazine.

21 of 30

The size of wounds have only been considered significant in the result part while the absence of histological parameters would lead to a bias of the assessment, in that the assessor may unintentionally ignore other factors, including the thickness of the epithelium, collagen fibers and so on.

The discussion part should be revised. Avoid repetition in the introduction part and focus more on the subject at hand with reference to the results obtained.

21 of 30

The discussion part should be revised. Avoid repetition in the introduction part and focus more on the subject at hand with reference to the results obtained.

In the conclusion part, the manuscript is considerably similar to the article entitled, "Effect of platelet-rich plasma on the healing of cutaneous defects exposed to acute to chronic wounds: a clinico-histopathologic study in rabbits."

Omid Ostvar and et al. diagnostic pathology. 2015.
