Dear Muhtarum

CORRELATION BETWEEN CD44 + CANCER STEM CELL EXPRESSION AND HISTOPATHOLOGY TYPE OF NASOPHARYNGEAL CARCINOMA

Yusuf M, Indra I and Juniati SH

Thank you for your submission to F1000Research. We have noted a few issues with your manuscript (below) – once these are addressed we will be pleased to accept your article for publication.

FILE LINKED TO: HUB_CD44_dg_PA_translate_MY-#2.docx – final check it is the correct one

Content: We endorse the STROBE guidelines for reporting **research articles**; we suggest that you ensure the article adheres to the checklist and add any details that are missing. The comments in the manuscript provide some queries relating to the checklist, but these are not exhaustive.

Content: Heavy copyediting has been performed in order to improve the flow and readability of your article; please make sure the meaning has been maintained. We strongly recommend thorough professional copyedit to be done for this review.

Data availability: Our publication model requires that we always ask the author to provide the raw data that support their findings. We believe that it is essential that others can see the raw data to be able to replicate your study and re-analyse and/or reuse the data (with appropriate attribution).

We ask that authors submit their underlying/extended data to an online repository. More information can be found on [our data guidelines page](#). When submitting data to an online repository, please ensure you create a DOI, which will be stated and cited in the Data availability section of the manuscript. Please include the name of the repository and the DOI in the Data availability section, along with the license the data is held under (please make sure that you choose a license when submitting your data to a repository – we would strongly suggest a CC0 license).

If you are submitting data to Open Science Framework, please register your project to ensure that a record of this project will remain persistent and unchangeable (an open-ended registration is usually the most appropriate). Once you have registered your project, please create a DOI for this registration by clicking the pencil icon next to 'Registration DOI'. This DOI will be stated and cited in the Data availability section of the manuscript.

Acknowledgements: Please confirm that you have obtained permission from the people you would like to acknowledge to be named in the manuscript.

Co-author email address: The email address for ***<author name>*** bounced (***<bouncing email address>***). Please could you provide an alternative email address for ***<author name>*** so that we can contact them about the submission.

Reviewers: As you know, F1000Research operates an author-driven publication model. This means that you will be responsible for suggesting suitable reviewers, whom we invite on your behalf, giving you an opportunity to ensure that appropriate experts review your article. Our transparent peer review process means that the peer review reports, together with the reviewers' names, will be published alongside your article.

To avoid delay to the publication process, we need you to provide us with at least five potential reviewers who meet our reviewer criteria before we can publish your article - please be aware that it is likely we will need to request further reviewer suggestions after publication. Please go to your [Suggest Reviewers](#) page, where you will find a useful tool to help you find reviewers; use this page to track the progress of the peer review process for your article. You can access this page directly via the article's record under My Research >> Submissions. See also our [reviewer criteria and tips for finding reviewers](#).

Please remember that suggested reviewers should have appropriate level of experience and the right expertise to judge your article; they must be able to provide an unbiased report (e.g. they must not be recent collaborators or colleagues in your institute). All reviewer suggestions are checked by the editorial team and will be rejected if they do not meet our criteria.

Payment: As F1000Research is open access, we will require payment of the Article Processing Charge (APC) to be able to complete the processing of your submission. The APC is \$1350.00 after any discounts you are eligible for have been applied.

Please provide us with the details of the individual/organization taking responsibility for paying the fee as soon as possible. Please sign in with the credentials you used to submit the article or you will not be able to access this page. Our Accounts department will be in touch regarding payment.

We have also lightly copyedited your article - please [download the document](#) and check you are happy with the amendments and **then address the queries detailed above using track changes in Word. Please return your revised manuscript to the e-mail address above.** Please note that this is your final opportunity to make any changes to the content of your manuscript. Once the typeset PDF of your manuscript has been created, we will send you a final PDF proof for checking prior to publication.

Best wishes,

Sahar
The Editorial Team, F1000Research

Dear Muhtarum,

Article ID: 53643

Article title: Correlation between CD44+ cancer stem cell expression and histopathological types of nasopharyngeal carcinoma

Thank you for your email regarding the APC payment for the article above.

I can see our billing team is processing the invoice now. Once you receive the invoice, all payment information is included on the second page. You can make payment for your invoice by bank transfer or credit card.

If you have any further questions, please do not hesitate to contact us.

Regards,
Evelyn Wong

Dear Muhtarum,

I'm pleased to let you know that your article: "Correlation between CD44+ cancer stem cell expression and histopathological types of nasopharyngeal carcinoma" has just been [published on F1000Research](#).

The Peer Review Process

We are now inviting the reviewers you have suggested. As part of their reports, reviewers are asked to provide a recommendation of 'Approved', 'Approved with Reservations' or 'Not Approved', and their report will be published alongside the article with their full name and affiliation. You will be able to respond to any published reports with a comment and/or by publishing revisions as a new version of your article – we will send you instructions on how to proceed when you begin to receive reports.

It is important that authors do not contact the reviewers directly, as this could result in invalidating their report.

Please note that we will ask you for additional reviewer suggestions if the invited reviewers decline. In order to avoid any delays with the peer review of your article, please continue to check your [Suggest Reviewers](#) page for updates and respond to any email requests as soon as you can.

Linking Your Data

Now that your article has been published and assigned a DOI ([10.12688/f1000research.53643.1](https://doi.org/10.12688/f1000research.53643.1)) we would strongly recommend that you include this DOI in the metadata of any published dataset associated with this article. If you would like assistance with this, please [contact our editorial team](#).

Increasing Discoverability

Now that your article has been published, why not take advantage of the tools we provide to help maximize your article's reach and share your article using the Email and Share options on the article page.

Your article will be listed in ePMC shortly as a preprint, and then updated once it has passed peer review.

Regards

Zena Nyakoojo
Senior Managing Editor, F1000Research

Press releasing articles: Please avoid promoting articles in the media until the article has passed the [open peer review process](#). Promotion on social media is encouraged once the article has been published; please ensure the full citation is included, as this contains the peer review status. F1000Research should be cited as the source of these articles with a link to the article.

Dear Muhtarum,

Correlation between CD44+ cancer stem cell expression and histopathological types of nasopharyngeal carcinoma
Yusuf M, Indra I, Juniati SH and Afriani Dewi YWe have just published a peer review report for your article on F1000Research, which you can read [here](#).

If you wish to respond to the reviewer, please go to the link above and click 'Respond to this report' below the report. When responding to a peer review report, please try and make sure you are logged into the account that you originally used for the submission of this article, otherwise we cannot identify your response as being from an author. Please allow up to one working day for your comments to appear. If you 'Track' the article, you will automatically be alerted to any other reports or comments made.

NB: Your article will pass peer review and be indexed in PubMed, PMC, Scopus, Embase and other indexing sites, if you receive either two 'Approved' statuses, or two 'Approved with Reservations' statuses and one 'Approved' status from the reviewers.

In order to ensure that peer review proceeds quickly and you get at least one more report, we recommend that you suggest additional reviewers. Please visit [Suggest Reviewers](#), where you will find a useful tool to help you find reviewers; you can also access this page via the article's record under My Research >> Submissions. See also our [reviewer criteria and tips for finding reviewers](#).

We would recommend waiting for additional peer review reports before starting on any article revisions.

Best regards,

Helena

Dear Muhtarum,

Correlation between CD44+ cancer stem cell expression and histopathological types of nasopharyngeal carcinoma
Yusuf M, Indra I, Juniati SH and Afriani Dewi Y

We have published another peer review report for your article in F1000Research at <https://f1000research.com/articles/10-678/v1#referee-response-90635>.

You have now received 2 peer review reports. Some of your reviewers had reservations and therefore your article has not yet passed peer review, which prevents it being indexed in bibliographic databases. (*Once an article receives two 'Approved' statuses, or two 'Approved with Reservations' statuses and one 'Approved' status, it will be considered to have passed peer review.*)

Please let us know how you'd like to proceed:

1) You can revise your article and publish a new version, together with a response to the reviewers. We will then contact the reviewers again for comments on your revision and an updated approval status.

For information on how to submit a new version, please visit [Article Guidelines \(new versions\)](#). Please bear in mind that new submissions need to be created and submitted using the submitting author's account.

2) Alternatively, if you wish to continue with the peer review and try to receive further reviewers opinions before you revise, please continue to suggest additional reviewers, via your [Suggest Reviewers](#) page, where you will find a useful tool to help you find reviewers; you can also access this page via the article's record under My Research >> Submissions.

It is your decision which option you wish to pursue. If we do not hear otherwise, we assume that you are revising and look forward to hearing from you when you are ready with your submission.

If you wish to respond directly to the reviewer by adding a comment to their report (now, or at a later stage), please click the 'Respond to this report' button below the report. When responding to a peer review report, please try and make sure you are logged into the account that you originally used for the submission of this article, otherwise we cannot identify your response as being from an author. Please allow up to one working day for your comment to appear (comments explaining changes in the revised version of your article are usually published at the same time as the revised version).

Best regards,

Helena

Dear Muhtarum,

I'm pleased to let you know that your article: "Correlation between CD44+ cancer stem cell expression and histopathological types of nasopharyngeal carcinoma" has just been [published on F1000Research](#).

The Peer Review Process

If peer review reports have previously been published on your article, we are currently in the process of re-contacting these reviewers to ask if they are available to re-review your revised article. Peer reviewers are given the opportunity to update their previously assigned Report Status and provide any additional feedback they may have. We will be in touch to let you know if and when any updated peer review reports for your article are published. If your article is still in need of additional reports, please provide additional reviewer suggestions via the [Suggest Reviewers](#) page; this page can also be accessed via the article's record at [My Research >> Submissions](#).

It is important that authors do not contact the reviewers directly, as this could result in invalidating their peer review reports.

Please note that we will ask you for additional suggestions if your original reviewers decline. In order to avoid any delays with the peer review of your article, please continue to check your [Suggest Reviewers](#) page for updates and respond to any email requests as soon as you can.

Increasing Discoverability

Now that this new version of your article has been published, you can maximize its reach by using the Email and Share options on the article page.

The ePMC record for this article has been updated to reflect the new version, and if a previous version has already passed peer review it will also be updated with the relevant indexers.

Regards

Zena Nyakoojo
Senior Managing Editor, F1000Research

Press releasing articles: Please avoid promoting articles in the media until the article has passed the [open peer review process](#). Promotion on social media is encouraged once the article has been published; please ensure the full citation is included, as this contains the peer review status. Dear Muhtarum,

Correlation between CD44+ cancer stem cell expression and histopathological types of nasopharyngeal carcinoma
Yusuf M, Indra I, Juniati SH and Afriani Dewi Y

I'm pleased to be able to let you know that Mohd Razif Mohamad Yunus has reviewed version 2 of your article and has changed their previous status from **Approved with Reservations** to **Approved**. You can read their comments [here](#).

As your article has now received the required approval from the reviewers to be indexed, it should appear on PubMed, PMC, Scopus, Embase and other indexing sites within a few weeks.

Although your article has now passed peer review, you can still revise or update it at any point now or in the future. For information on how to submit a new version, please visit [Article Guidelines \(new versions\)](#). Please bear in mind that new submissions need to be created and submitted using the submitting author's account.

If you wish to respond directly to the reviewer by adding a comment to their report (now, or at a later stage), please click the 'Respond to this report' button below the peer review report. When responding to a peer review report, please try and make sure you are logged into the account that you originally used for the submission of this article, otherwise we cannot identify your response as being from an author. Please allow up to one working day for your comment to appear (comments explaining changes in the revised version of your article are usually published at the same time as the revised article).

Best regards,

Helena
The Editorial Team, F1000Research
