Dear eduardus bimo aksono h

Your manuscript entitled "Phylogenetic analysis of Feline Infectious Peritonitis Virus (FIPV), Feline Enteric Coronavirus (FCoV), and Severe Acute Respiratory Syndrome Coronavirus-2 (SARSCoV2) of Cats in Surabaya" (Ms.Nr. VETWORLD-2022-08-456) was reviewed by reviewers of the Veterinary World. As initial decision, your manuscript was found interesting but some revisions have to be made before it can reach a publishable value. Please refer comments given at bottom.

You should send your revised manuscript via the online system of ScopeMed on <https://ejmanager.com/my/vetworld/>.

Sincerely yours,

Editor-Veterinary World

COMMENTS for Authors:

EDITORIAL COMMENTS:

- Highlight all corrections/additions in red color font in revised manuscript.
- Please answer all the comments below point-by-point in an accompanying response letter to your revised submission and include your responses at appropriate paragraphs in the revised word file.
- Include all authors name, affiliation, ORCID and email address in revised Word file as per format and style of Veterinary World. Please check latest article from www.veterinaryworld.org for format of this section.
- All reference no. in the text must be in continuous no. as per style of Veterinary World and amend the reference section accordingly if you have not done it.
- Please divide the introduction into 3 paragraphs if you have already not done. Introduction must be divided into 3 paragraphs i.e., 1. introduction 2. significance of the study and 3. aim of the study.
- Include authors' contributions (refer just below the conclusion section in latest article from www.veterinaryworld.org for format of this section) if you have not added.
- Include Acknowledgements along with source of fund for this study if you have not included.
- All journal names in references must be as per standard journal abbreviation.
- If you will not revise strictly as per suggestion then there will be chance of rejection. So, revise carefully. If you have any query then please email to Editor-in-Chief.

=> Reviewer # 1

Authors described the Phylogenetic analysis of FIPV, FCoV and SARS-CoV 2 of Cats in Surabaya. FIP is an important disease in domestic and non-domestic felids. The origin of virulent feline coronavirus/ feline infectious peritonitis virus is remained to be elucidated. However, the manuscript is not well written, organization of manuscript and data interpretation should be improved. So, this manuscript is not suitable for publish in Veterinary World with current version.

Major comments:

1. I don't know what the relationship between this study and SARS-CoV ?
2. The samples were collected from 10 cat showing clinical signs of FCoV and FIP, however, only one cat positive for FCoV PCR. FIP cat MUST be FCoV positive!
3. Line 86-89, the primer pair was specifically-designed to detect FIPV, authors did not mention the target gene of FCoV or references?
4. Figure 1, authors had label 677 bp in the electrophoresis picture, however, line 7 was feces, you marked the band 677bp, but the band is between 500-600 bp.
5. The introduction is unclear, I still do not understand what is the purpose of the present study?
6. The interpretation of results is unclear.
7. The Discussion section is also unclear.
