CONTENTS

S.No.	Articles	Pages
1.	<p>The Role of Lactate Dehydrogenase (LDH) Compared to Arterial Blood Gases (ABG) in Diagnosing Pneumocystis Carinii Pneumonia (PCP) in HIV/AIDS Patients on Routine Antiretroviral Therapy. (IJRR_Vol.8_Issue.10_Oct2021/IJRR01.pdf) ShareThis</p> <p><i>Aulia Rahman, Tambar Kembaren, Endang Sembiring, Putri C Eyanoeer</i></p> <p>[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract01.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR01.pdf) [DOI: https://doi.org/10.52403/ijrr.20211001 (https://doi.org/10.52403/ijrr.20211001)]</p> <p>Research Area: Medical Science; Internal Medicine</p>	1-7
2.	<p>Deficiency Serum Vitamin 25 (OH) D Levels Increase Risk Factors of Poor Quality Sleep in Resident at Sanglah Hospital. (IJRR_Vol.8_Issue.10_Oct2021/IJRR02.pdf) ShareThis</p> <p><i>Cokorda Istri Dyah Sintarani, Desak Ketut Indrasari Utami, Anak Agung Ayu Putri Laksmidewi, Anak Agung Ayu Suryapraba Indradewi, I Gusti Ngurah Budiarsa</i></p> <p>[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract02.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR02.pdf) [DOI: https://doi.org/10.52403/ijrr.20211002 (https://doi.org/10.52403/ijrr.20211002)]</p> <p>Research Area: Medical Science; Neurology</p>	8-13
3.	<p>Comparison of Sleep Quality in Pre-HAART and On HAART HIV Patients. (IJRR_Vol.8_Issue.10_Oct2021/IJRR03.pdf) ShareThis</p> <p><i>Felisitas Farica Sutantoyo, Paulus Sugianto, Wardah Rahmatul Islamiyah</i></p> <p>[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract03.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR03.pdf) [DOI: https://doi.org/10.52403/ijrr.20211003 (https://doi.org/10.52403/ijrr.20211003)]</p> <p>Research Area: Medical Science; Neurology</p>	14-20
4.	<p>Acute Disseminated Encephalomyelitis (ADEM) In Adult Women, Is It Unprecedented By Infection History?: A Case Report. (IJRR_Vol.8_Issue.10_Oct2021/IJRR04.pdf) ShareThis</p> <p><i>Kenia Izzawa, Putri Irsalina, Yudha Haryono</i></p> <p>[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract04.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR04.pdf) [DOI: https://doi.org/10.52403/ijrr.20211004 (https://doi.org/10.52403/ijrr.20211004)]</p> <p>Research Area: Medical Science; Neurology</p>	21-27

5. Bilateral Sensorineural Hearing Loss and Septic Arthritis in Streptococcus suis Meningitis Patient: 28-32
A Case Report. (IJRR_Vol.8_Issue.10_Oct2021/IJRR05.pdf) [ShareThis](#)
Astari Arum Cendani Goller, Rindha Dwi Sihanto, Anak Agung Ayu Putri Laksmidewi, Anak Agung Ayu Suryapraba Indradewi
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract05.html) [PDF Full Text]
(IJRR_Vol.8_Issue.10_Oct2021/IJRR05.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211005> (<https://doi.org/10.52403/ijrr.20211005>)]
Research Area: Medical Science; Neurology
-
6. Cross Sectional Study of Zinc, Copper and Magnesium Levels in Preeclampsia and Normal 33-36
Pregnancy. (IJRR_Vol.8_Issue.10_Oct2021/IJRR06.pdf) [ShareThis](#)
Balaji B R, K N Pujari
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract06.html) [PDF Full Text]
(IJRR_Vol.8_Issue.10_Oct2021/IJRR06.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211006> (<https://doi.org/10.52403/ijrr.20211006>)]
Research Area: Medical Science; Biochemistry
-
7. Human Capital Plan for Business Startups “Innovation of Subang Honey Pineapple Beverage”. 45-50
(IJRR_Vol.8_Issue.10_Oct2021/IJRR08.pdf) [ShareThis](#)
Dita Fryandini, Rhian Indradewa, Tantri YanuarRahmat Syah, Ketut Sunaryanto
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract08.html) [PDF Full Text]
(IJRR_Vol.8_Issue.10_Oct2021/IJRR08.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211008> (<https://doi.org/10.52403/ijrr.20211008>)]
Research Area: Business Management
-
8. Analysis of the Effect of Macroeconomic Variables on Happiness in Indonesia. 51-57
(IJRR_Vol.8_Issue.10_Oct2021/IJRR09.pdf) [ShareThis](#)
Septarina Christin Br Ginting, Sya'ad Afifuddin, Rahmanta
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract09.html) [PDF Full Text]
(IJRR_Vol.8_Issue.10_Oct2021/IJRR09.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211009> (<https://doi.org/10.52403/ijrr.20211009>)]
Research Area: Business Management
-
9. Forms and Risk Factors of Domestic Violence among Married Secondary School Teachers in 58-67
Anambra State. (IJRR_Vol.8_Issue.10_Oct2021/IJRR010.pdf) [ShareThis](#)
A.I. Ogbalu, Iwuji, Ngozi Frances, Nnaemezie, Nkiru Onyinyechukwu
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract010.html) [PDF Full Text]
(IJRR_Vol.8_Issue.10_Oct2021/IJRR010.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211010> (<https://doi.org/10.52403/ijrr.20211010>)]
Research Area: Education
-
10. Identification of Historical Heritage in Metro City Lampung as Learning Resources of Local 68-76
History. (IJRR_Vol.8_Issue.10_Oct2021/IJRR011.pdf) [ShareThis](#)
Sumiyatun, Umi Hartati
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract011.html) [PDF Full Text]
(IJRR_Vol.8_Issue.10_Oct2021/IJRR011.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211011> (<https://doi.org/10.52403/ijrr.20211011>)]
Research Area: Education

11. Nutritional Status and Body Image Satisfaction among Adolescent Girls. 77-82
(IJRR_Vol.8_Issue.10_Oct2021/IJRR012.pdf) [ShareThis](#)
Anju Kayathri S, Aiswarya Mohan, Indujamol M
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract012.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR012.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211012> (<https://doi.org/10.52403/ijrr.20211012>)]
Research Area: Nursing
-
12. Immunotherapy for Recurrent Pregnancy Loss: A Review. 83-92
(IJRR_Vol.8_Issue.10_Oct2021/IJRR013.pdf) [ShareThis](#)
Paprikar Manoj, Paprikar Monika
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract013.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR013.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211013> (<https://doi.org/10.52403/ijrr.20211013>)]
Research Area: Medical Science; Obstetrics & Gynaecology
-
13. Formulation and Evaluation of Floating Bioadhesive Tablet of Candesartan cilexetil Using 3² Factorial Designs. 93-104
(IJRR_Vol.8_Issue.10_Oct2021/IJRR014.pdf) [ShareThis](#)
Asish Dev, Nihar Lohagaonkar, Mansi Deshmukh
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract014.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR014.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211014> (<https://doi.org/10.52403/ijrr.20211014>)]
Research Area: Pharmacy
-
14. The Effect of Repeat Tax Amnesty and Tax Penalty Policy on Taxpayer Compliance (An Experimental Study). 105-116
(IJRR_Vol.8_Issue.10_Oct2021/IJRR015.pdf) [ShareThis](#)
Ni Putu Riasning, Anak Agung Bagus Amlayasa, Luh Kade Datrini
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract015.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR015.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211015> (<https://doi.org/10.52403/ijrr.20211015>)]
Research Area: Accounting & Taxation
-
15. The Effectiveness of Discovery Learning on Thematic Learning on the Understanding of the Concept Social Science in Class IV Elementary School Students. 117-125
(IJRR_Vol.8_Issue.10_Oct2021/IJRR016.pdf) [ShareThis](#)
Riana Denik Ratiwi, Erni Suharini, Hamdan Tri Atmaja
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract016.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR016.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211016> (<https://doi.org/10.52403/ijrr.20211016>)]
Research Area: Education

16. Analysis of the Impact of Leadership Determination on Employee Performance at PT BTN (Persero), Tbk Medan Sharia Branch Office. (IJRR_Vol.8_Issue.10_Oct2021/IJRR017.pdf) 126-132
ShareThis
Novriadi M, Harmein Nasution, Yeni Absah
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract017.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR017.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211017> (<https://doi.org/10.52403/ijrr.20211017>)]
Research Area: Management
-
17. Analysis of Accessibility and Level of Knowledge of Farmers on the Use of ICT among Small Holder Rice Farmers in Southeast, Nigeria. (IJRR_Vol.8_Issue.10_Oct2021/IJRR018.pdf) 133-140
ShareThis
Gbughemobi B.O, Nkamigbo, D.C., Meludu, N.T.
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract018.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR018.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211018> (<https://doi.org/10.52403/ijrr.20211018>)]
Research Area: Agricultural Economics & Extension
-
18. Study on the Development of Community Based Tourism Coastal Areas (Case Study: Historical Beach in Batu Bara Regency). (IJRR_Vol.8_Issue.10_Oct2021/IJRR019.pdf) 141-153
ShareThis
Ivany Hidayat, Nurlisa Ginting, Hilma Tamiami Fachrudin
[ABSTRACT] (IJRR_Vol.8_Issue.10_Oct2021/IJRR-Abstract019.html) [PDF Full Text] (IJRR_Vol.8_Issue.10_Oct2021/IJRR019.pdf) [DOI: <https://doi.org/10.52403/ijrr.20211019> (<https://doi.org/10.52403/ijrr.20211019>)]
Research Area: Architecture Tourism
-
19. The Application of Mix Delphi-AHP Method in Identification and Prioritization Competencies Needed by National Tax Collector. (IJRR_Vol.8_Issue.10_Oct2021/IJRR020.pdf) 154-165
ShareThis
Ikhwan Muslim Nasution, Yeni Absah, Isfenti Sadalia

International Journal of Research and Review

Editorial Team

Editor

- Dr Shankar G. Editor, International Journal of Research and Review, Baroda, Gujarat; India. Email: editor.ijrr@gmail.com (mailto:editor.ijrr@gmail.com)
- Prof. (Dr.) Vinay K. Srivastava, Head, Dept. of Psychiatry, KD Medical College Hospital & Research Center, Mathura, UP.
- Dr N.S. Neki; Professor, Dept. of Medicine, Govt. Medical College, Amritsar, Punjab, India.
- Dr. John Lenon E. Agatep, Executive Director - ACLC, Macau Ltd., Philippines.

Editorial Team Members

- Dr. Manisha Jindal, Dean, School of Medical Sciences and Research, Sharda University, Greater Noida, India.
- Dr. Om Shankar Chaurasiya, Professor & Head, Department of Pediatrics, MLB Medical College, Jhansi, India.
- Dr. Seema Piyu Deo Mahant, Professor & Head of The Department (General Medicine), Govt. Medical College, Datia (M.P.), India
- Dr. Sonali Jain; Assistant Professor in Microbiology, Goldfield Institute of Medical Sciences, Faridabad, India.
- Dr. Fazal-Ur Rehman; Associate Professor, Dept. of Anatomy, Jawaharlal Nehru Medical College, AMU, Aligarh, India.
- Dr. Arunima Chaudhuri, Associate Professor, Department of Physiology, Rampurhat Government Medical College and Hospital, Rampurhat, West Bengal, India.
- Dr. P. Krushna Kishore, Associate Professor, Dept. of Biochemistry, College of Dental Sciences & Research Centre, Ahmedabad, Gujarat, India.
- Dr. Ashish Tyagi, Assistant Professor, Dept. of Forensic Medicine, S.H.K.M. Government Medical College, Nalhar, Nuh - 122107 (Haryana).
- Dr. Swarup P Kulkarni, Professor and HOD, Ashokrao Mane Ayurvedic Medical College and Hospital Vathar Tarf Vadgaon, Dist. Kolhapur, Maharashtra.
- Dr Lalitesh Kumar Thakur; Specialist- at Institute of Pesticide Formulation Technology, Ministry of Chemicals & Fertilizers, Govt.of India), Gurgaon.
- Dr Abubakar SaddiqMagaji; Dept. of Mathematical Sciences, Faculty of Science, Kaduna State University, Nigeria.
- Hamid Reza Mirkarimi; Department of Plant Breeding, Faculty of Agriculture, Science and Research Branch, Islamic Azad University, Tehran, Iran.
- Dr Angani Mary Talatu; Lecturer II, Department of Veterinary Medicine, College of Veterinary Medicine, Federal University of Agriculture, Makurdi.
- Dr V.G. Shobhana, PhD (Agri- Biotechnology), Madurai, Tamil Nadu, India.
- Dr. Silvy Mathew, Assistant Professor & Research Guide, Post Graduate Department of Botany, Vimala College(Autonomous), Thrissur-9, Kerala, India.
- Dr. Kanakam Elizabeth Thomas, Associate Professor, Dept. of Microbiology, Asan Memorial Dental College, Chengelpettu.
- Dr. Subhash Chanda; Associate Professor, AC College, Jalpaiguri, WB, India.
- Dr Dipak Kumar Hazra; Asst. Prof., Dept. of Agricultural Chemicals, Bidhan Chandra Krishi Vishwavidyalaya, Kalyani, Nadia, WB, India.
- Binu Thomas; Guest Faculty, PG Dept. of Botany, Deva Matha College, Kottayam, Kerala, India.
- Dr S. Ponmani, Assistant Professor (Environmental Sciences), Mother Teresa College of Agriculture (Affiliated to Tamil Nadu Agricultural University), Illuppur, Pudukkottai, TN, India.
- Dr Narendra Kumar Jatav, Lecturer & Head of Dept.; Department of Plant Pathology, PND Agricultural College, Gajsinghpur, District Sri Ganganagar, Rajasthan, India.
- Dr Subha Ganguly, Scientist (Food Microbiology) & Scientist In-charge, Department of Fish Processing Technology, Faculty of Fishery Sciences, West Bengal University of Animal and Fishery Sciences, Kolkata, India.
- Dr Abd Elmomiem Ahmed Elzain, Associate Professor in Physics, Department of Physics - Kassala University -

Sudan & Department of Physics - Qassim University, Saudi Arabia.

ABSTRACT

Background/aim: People with HIV are often reported to experience poor sleep quality. Factors that can cause poor sleep quality in HIV patients, including the use of ARV therapy. The pathophysiology of poor sleep quality in HIV patients is still unclear. Poor sleep quality is one of the complaints in the late stages of HIV infection, where it is suspected that HIV itself affects the biological center of sleep. This study was aimed to determine the comparison of sleep quality in HIV patients pre-HAART and with HAART more than 1 year.

Method: This study uses data collection methods in the form of interviews with samples which will later be presented in the form of analytical observational study. Consecutive data collection on HIV patients before and after ARV therapy who was outpatient at the VCT outpatient clinic Dr. Soetomo General Hospital from June-July 2021. Data analysis using SPSS Version 23 for windows

Results: A total of 40 subjects were divided into HIV pre-HAART and on HAART. From the statistical analysis using SPSS program significant with $p=0.004$ (OR 15.5 (95% CI (1.73-139.6))

Conclusion: HIV patients on HAART for more than 1 year are known to have increased 15.5 times the risk of poor sleep quality

Keywords: HIV, HAART, sleep quality

INTRODUCTION

People with HIV are often reported to experience poor sleep quality.[1] Factors that can cause poor sleep quality in HIV patients, including the use of ARV

therapy.[2] According to data from the World Health Organization (WHO) globally, it is estimated that the presentation of HIV sufferers in 2020 was estimated at 35.3 million people and 9.7 million of them had received ARV therapy. In Indonesia, according to data from the Central Statistics Agency (BPS) up to June 2021, the number of people living with HIV was around 108,600. The cumulative number according to the highest risk factors is heterosexual, homosexual, and the use of Intravenous Drug User (IVDU) with a total of 26,158 patients. Based on the age group the most ranged from the age of 20-29 years as many as 15,305 patients. The highest number was in DKI Jakarta with 24,807 patients, in East Java with 14,285 patients, and in Papua with 11,871 patients.[3]

Poor sleep quality in HIV sufferers is caused by conditions related to HIV itself and its systemic complications.[4] Poor sleep quality is often found in patients with advanced HIV disease due to the use of ARVs. A number of studies have reported factors that can lead to poor sleep quality in HIV patients. Initial investigations analyzing sleep architecture using polysomnography, focused on biological relationships, particularly the manifestations of HIV infection in the Central Nervous System (CNS) and changes in immune response.[5] In evaluation the use of polysomnography is not indicated in paradoxical insomnia or poor sleep quality sleep apnea.[6]

Factors that can cause poor sleep quality in HIV patients include the use of ARV therapy, an antiretroviral consisting of NRTI and NNRTI groups. The NRTI group consists of zidovudine (ZDV or AZT), lamivudine (3TC), stavudine (d4T), abacavir (ABC), tenofovir disoproxil fumarate (TDF), and emtricitabine (FTC). The NNRTI class includes nevirapine, delavirdine, and efavirenz. Didanosine and efavirenz can cause nightmares and depression.[2] EEG images in HIV patients taking efavirenz show a decrease in sleep efficiency with difficulty in starting sleep, an increase in the number of wakes during sleep, and a decrease in the duration of REM sleep.[7,8]

The most optimum time to start ARV therapy is CD4 cells between 200-350/mm³. ARV is recommended in patients with pulmonary TB with severe bacterial infection and CD4 < 350/mm³, and in pregnant women with clinical stage CD4 < 350/mm³. Several studies have shown poor sleep quality in HIV patients who have a CD4 count < 200 cells/mm³. [6,9]

Sleep quality was subjectively assessed based on clinical interviews with patients and their sleep partners. Completing a complete sleep diary/log is also useful for evaluating insomnia. Physical and laboratory examinations are also indicated. Polysomnography is a measurement of brain waves during sleep to determine the stages of sleep so that objective data is obtained about the stages and architecture of disturbed sleep.[10] Epidemiological studies of poor sleep quality generally use self-report measures to evaluate insomnia. The widespread use of the Pittsburgh Sleep Quality Index (PSQI) in various populations, allows for multiple comparison studies. The PSQI consists of 19 self-rated questions and 5 questions rated by a sleep partner or roommate (only self-rated questions are used in the rating scale). The PSQI contains 15 multiple-choice questions that ask about the frequency of sleep disturbances and subjective sleep quality and 4 questions that ask about typical

bedtime, wake time, sleep latency, and sleep duration. All questions are short and easy to understand and have been adapted so that they can be used by doctors or research assistants. PSQI produces seven values that correspond to the existing domain. Each score component ranges from 0 (no difficulty) to 3 (severe difficulty). The component values are summed to produce a global score (range 0-21). A global PSQI score >5 is considered a significant sleep disturbance. Cutoff values are not available for each component.[2,9] Based on this description, a study is proposed on the comparison of sleep quality in HIV patients PRE-HAART with patient on HAART

METHOD

This study uses data collection methods in the form of interviews with samples which will later be presented in the form of analytical observational study. Consecutive data collection on HIV patients before and after ARV therapy who was outpatient at the VCT outpatient clinic Dr. Soetomo General Hospital from June-July 2021. To assess sleep quality, the PSQI score which has been translated into Indonesian was used.

The questionnaire used to assess sleep quality with the PSQI consisted of 19 self-rate questions containing 15 multiple choices asking about the frequency of subjective poor sleep quality with 4 questions about sleep initiation time, wake time, latency and sleep duration. Each score component ranges from 0 (no difficulty) to 3 (severe difficulty). The component values are summed to produce a global score (range 0-21). A global PSQI score >5 is considered a significant poor sleep quality [9]

The inclusion criteria established in this study were: 1) HIV positive patients, 2) Patients aged 18 years, 3) Patients who had not received ARV therapy and who had been on ARV treatment for at least 1 year of routine ARV use 4) Cooperative patients and willing to be included in the study by signing a letter of consent after an

explanation (informed consent). The exclusion criteria for this study were:1) Patients with decreased consciousness,2)

Patients with aphasia (sensory or motor). Data analysis using SPSS Version 23 for windows

RESULT

Table 1: Characteristics of Subjects

Variable		Pre-HAART n(%)	On HAART n(%)
Age (years) mean (min-max)		36.4 (24-59)	38.2 (37-59)
Age (years)	≤ 30	7 (17.5)	3 (7.5)
	> 30	13 (32.5)	17 (42.5)
Gender	man	12 (30)	13 (32.5)
	female	8 (20)	7 (17.5)
Marital status	Married	11 (27.5)	9 (22.5)
	Not married	9 (22.5)	11 (27.5)
Level of education	Senior High School	12 (30)	8 (20)
	Academy/ collage	8 (20)	12 (30)
ARV regimen	TDF+3TC(FTC)+NVP	-	6 (15)
	TDF+3TC(FTC)+EFV	-	14 (35)
Job Status	Government Employers	6 (15)	4 (10)
	Private employer	5 (12.5)	8 (20)
	Entrepreneur	6 (15)	7 (17.5)
	Does not work	3 (7.5)	1 (2.5)
Quality sleep	Good	9 (22.5)	0
	Poor	11 (27.5)	20 (50)
CD4 Count	≤ 200	19 (47.5)	9 (22.5)
	> 200	1 (2.5)	11 (27.5)
CD4 Count mean (min-max)		73.05 (9-262)	158.4 (20-329)

AZT: Zidovudine FTC: emtricitabine or emtricitabine EFV: Efavirenz
 3TC: Lamivudine 150 mg NVP: Nevirapine

The study involved 40 patients with HIV subjects who met the eligibility criteria, grouped into groups with ARV therapy (20 subjects) and without ARV (20 subjects).

The sample characteristics assessed in this study included gender, age, marital status, level of education, ARV regimen in sample with ARV therapy, Job status, and duration of using ARV at Table 1.

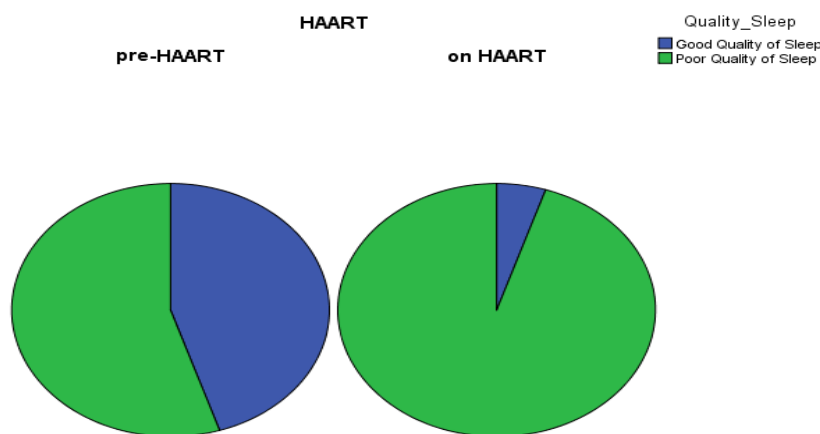

Figure 1: Comparison of sleep quality between pre-HAART and On-HAART HIV patients
 p= 0.004 (OR 15.5 (95% CI (1.73-139.6)))

The results of the comparison of sleep quality between HIV patients’ pre-HAART and On HAART are shown in Figure 1. where the results with the Mann Whitney test are known to be p = 0.004 (OR 15.5 (95% CI (1.73-139.6)) which means

that there is a significant difference sleep quality with ARV administration, with the risk of increasing poor sleep quality as much as 15.5 times. In this study, a comparison test of sleep quality with the overall variables included; gender, age,

marital status, level of education, ARV regimen, Job status, ARV use and CD 4 count in table 2, it is known that the results are statistically significant only ARV use

with p=0.004 as well as multivariate analysis to determine the factor of poor sleep quality and the results are only due to the use of ARVs (table 3).

Table 2: Comparison of sleep quality with all variables

Variable		Good Quality of Sleep n (%)	Poor Quality of Sleep n(%)	P*

DISCUSSION

Sleep has a function for homeostasis, energy conservation, brain restoration, increased immune function, and temperature regulation. The hypnotoxin theory explains that only in a state of sleep can the buildup of hypnotoxins in the body be detoxified. Adenosine, interleukins, tumor necrosing factors, prostaglandins, lipopolysaccharides and d (delta)-producing proteins play a role in mediating the homeostatic drive to sleep. During sleep, energy in the brain (ATP, glycogen, adenosine) will increase again because the use of energy and oxygen decreases by 15-20% compared to when awake. The restorative theory suggests that during sleep growth hormone is produced mainly during deep sleep.[11]

An abnormal sleep cycle is also known as poor sleep quality which is characterized by an imbalance between the Non Rapid Eye Movement (NREM) and Rapid Eye Movement (REM) phases. Types

of poor sleep quality include: insomnia, hypersomnia, parasomnias, and disturbances in the sleep-wake cycle. Insomnia is defined as an inadequate perception of the quantity or quality of sleep. Insomnia is diagnosed through anamnesis in the form of difficulty initiating sleep, often waking from sleep, difficulty falling asleep again after waking up at night, quickly waking up in the morning which can cause fatigue, impaired concentration, and impaired memory.[12] Hypersomnia is a state of remaining drowsy even though the amount of sleep is adequate. Parasomnias describe unwanted states that occur while sleeping.[13]

Poor sleep quality often occurs early in HIV disease, before HIV symptoms appear and continues throughout the course of the disease.[1,4] In a study of HIV seropositive patients in outpatient clinics, about 73% complained of poor sleep quality.[14] Sleep problems in HIV patients which showed a prevalence ranging from 43% to 100%. And evaluated 1,821 HIV patients and found that 32% had poor sleep quality.[14]

The pathophysiology of poor sleep quality in HIV patients is still unclear. Poor sleep quality is one of the complaints in the late stages of HIV infection, where it is suspected that HIV itself affects the biological center of sleep. In HIV infection

there are changes in the hypothalamic-pituitary-adrenal axis in the form of loss of circadian rhythm and changes in endogenous substances that have an important role in sleep regulation such as neurotransmitters, opiate peptides, hormones and cytokines.[6]

In other study that 84 of 115 (73%) outpatients with HIV experienced poor sleep quality. They need more than 1 hour to start sleeping and sleep duration is less than 2 hours, while good sleepers need less than 15 minutes to start sleeping and sleep duration is more than 2 hours ($p < 0.001$).[2] Drug users in HIV patients experienced an increase in poor sleep quality up to 68%, as well as a tendency to increase beta microglobulin levels.[9]

In this study, it was found that from the overall results of the data it was statistically significant that the use of ARVs > 1 year affected sleep quality after being compared with other factors. A number of studies have reported the factors that contribute to the onset of poor sleep quality in people with HIV and AIDS. The initial investigations were primarily laboratory-based, analyzing sleep architecture using polysomnography and with a focus on biological relationships, particularly manifestations of central nervous system (CNS) HIV infection and altered immune responses. This emphasis has shifted to epidemiological studies to evaluate insomnia and factors associated with insomnia. As a direct effect of HIV infection on sleep, several studies have also considered the effect of other variables, including ARV drugs, mental illness, use of sleeping pills and alcohol use. The relationship between sleep quality and CD4 cell count remains unclear. Insomnia is a frequently reported adverse effect in association with antiretroviral therapy. However, studies evaluating ARVs and zidovudine as a group have not shown a significant effect. The exception is efavirenz, which has been evaluated and found to be an independent predictor of insomnia.[2,5]

Sample in Europe as poor sleepers with a score PSQI >5 as cutoff. Similarly, a prevalence of 30% was reported in 1800 Japanese adults. This study shows that insomnia is common in the general population. It is well recognized that there is a link between physical illness and insomnia, and this has been shown in several community studies. PSQI has also been used in samples of patients who are sick. In one study of patients with breast cancer, 61% were categorized as poor sleepers. A further study of 89 hemodialysis patients found that 63 (71%) were poor sleepers. The question is whether the prevalence of insomnia in people with HIV is comparable to that in the general population or in people with other chronic diseases[15,16]

Although sleep disturbances are frequently reported in people with HIV and AIDS, only a few studies have systematically evaluated their prevalence. Only one study identified using the PSQI to classify as poor sleepers. In a cross-sectional survey, found that 84 of 115 (73%) outpatients with HIV infection had insomnia.[8] They needed more than 1 hour to sleep compared to less than 15 minutes in good sleepers ($p < 0.001$) and 2 hours less sleep ($p < 0.001$).[6] Two further studies reported mean global PSQI scores exceeding the cutoff for insomnia in the population with HIV, 9.0 (standard deviation 4.4) and 10.0 (standard deviation 5.0), but did not report the prevalence of poor sleepers. Insomnia alone was reported by two studies using direct questioning and they found prevalence of 29% and 56%, respectively. None of these studies used controls, so it is necessary to consider the effect of confounding variables. [17]

The limitation of this study is the short duration of the study. This study used subjects in certain populations in certain places; hence, this study's results cannot describe the same conditions in different populations and places. Further research is needed to improve this study's results using a larger sample size involving various types

of cancer and using cohort research methods.

CONCLUSION

This study showed a high proportion of poor sleep quality in HIV patients on HAART for more than a year with a 15.5 times increased risk compared to pre-HAART.

Competing Interests: No competing interests were disclosed.

Conflict of Interest: The authors declare no conflict of interest, financial or otherwise.

Acknowledgments: declared none.
