Respected Author,

Regarding the article "Acute toxicity assessment of Graptophyllum pictum L. Griff. leaves ethanolic extract and its nanoformulations: comparative study of phytosome and cyclodextrin inclusion complex" (MS ID 486), you mention Figure 1i and Figure 1ii regarding the DSC of phytosomal and CDI formulations. Looking into the platform, I couldn't find any supplementary Figures. Could you please update the manuscript with the above-mentioned DSC curves?

Waiting asap for the revised manuscript.

Best regards,
Farmacia Journal Editorial Board

Dear Farmacia Journal Editorial Board,

We have revised the manuscript. We delete the sentence because we already describe it in the previous sentence in the previous paragraph. Apologized for the incorrect labeling of the figure.

Hereby we sent the revised manuscript through email as We can not find the link to upload the file through the platform.

Thank you.

Best regards,

Idha Kusumawati

to me

Respected Author,

In this manuscript, the following sentence appears:

The DSC of phytosomal and CDI formulations showed an interaction between the GPLE and the excipients as the thermogram showed that both had one peak at 86.03°C (**Figure 2.i**) and 138.70°C (**Figure 2.ii**), respectively.

Figure 2 is about SEM of (A) GPLE-P dan (B) GPLE-CDIC.

Where is the match? Where are the DCS thermograms?????

Please correct the manuscript asap.

Best regards,

idha kusumawati <idha-k@ff.unair.ac.id>
