- 201 301 (Uttar Pradesh)

1. Assess the Knowledge, Utilization & Barrier of Non-Utilization Regarding Maternal Health Services.. 1
Sonu, Akoijam Mamata Devi, Anu Grover, Deepak
2. A Research Study on Medicolegal Autopsies Conducted at Mortuary of Government Medical College, Ongole, Andhra Pradesh from 1st January to 31st December 2020 7
Venati Jayashankar, Chaitanya. R, G.B. Raja Kumar
3. Dietary and Nutritional Strategy for the Prevention and Management of Hyperuricemia 11
A. Priyadharshini, Manali Sudhir, Anirudh Manikandan, Ahalya S.P
4. A Medico Legal Study of Fetal Deaths in and Around Guntur 16
A.Krishnajaneyulu, N. Devchand, Raja Sekhar Uppu, T.T.K.Reddy
5. Exploring the Depth- Influence by Female Sex Hormones Seen in the Periodontium..... 23
Aishwarya Dham, Deepa G Kamath
6. Forensic Dental Age Estimation Using Radicular Dentine Translucency in Indian (Himachal Pradesh) Population-A Digital Method..... 32
Akshay Sujith, Neeta Sharma, R Guru Prasad
7. A Novel Method to Estimate Height of an Individual with Facial Index 40
Arunashri, Lalitha C. , Venkateshu K.V.
8. Evaluation of Snake Bite Cases Admitted to Hospital in Tertiary Care 44
Avinash H. Waghmode, Pravir Bodkha, Suvarna N.Patil, A.J.Ajankar, Sonali Kotkar
9. Current Trends of Poisoning Cases Admitted at Tertiary Care Hospital 49
Avinash H. Waghmode, Prakash Mohite, Sudhir Ninave, Pravir Bodkha, Sonali Kotkar
10. Deleted 54
11. An Epidemiological Study of Snake Envenomation in a Tertiary Care Hospital of North India..... 60
Amit Kumar, Shweta Tanwar, Rajesh Chetiwal, Rajesh Patnaik Thonangi
12. Learning Styles: An Overview 66
Amita Sood, Jyoti Sarin

II

13. Knowledge, Attitude and Perception Regarding the Procedure of Autopsy in COVID-19 Cases among Doctors Doing Post Mortem Examination 72
Anil Mangeshkar, Ashok Najan, Seema Sutay
14. A Critical Appraisal of Ethical issues in E-Learning..... 78
Anjankar A J, Mohite P M, Waghmode A, Patond S, Ninave S
15. Do Nursing Students Have High Social Intelligence? Findings from Selected Nursing College, South India 82
Anju Philip.T, Sunitha P.P, Lakshmi S Babu, Vrinda R
16. An Observational Study of the Effect of Dexmedetomidine on Haemodynamic and Airway Responses During Extubation of Trachea Following Major Surgery Under General Anaesthesia..... 88
Anuja Agrawal, Riddhi Shah, Kirti Patel, Pooja Shah, Dinesh Chauhan
17. Determination of Sex by various Morphometric Traits of Clavicle in the Population of Central India (Bhopal region) 96
Anuradha Singh, Rajendra Baraw, Jayanthi Yadav
18. The Relationship between the Severity of Obstructive Sleep Apnea (OSA) and Tension-Type Headache Frequency 104
Aprilia, Herlina Suryawati, M.I. Widiastuti, Aris Catur Bintoro, EndangKustiowati, Jimmy Eko Budi Hartono
19. Need for Psychological Check-ups and Medical Treatment to the witnesses of Heinous Crimes 110
Archit Panwar, Komal Vig
20. Profile of Fatal Head Injury Cases Autopsied at District Government Hospital Mortuary 116
Ashokkumar Rajaput, Kumar H, Faisal Nasim Gilani, Eshwar S Goudar
21. Awareness of Non-communicable Diseases and their Risk Factors among Adolescents: A Comparative Questionnaire Study 123
Athira Bhaskaran, Juniya Thomas, Roselin Sumesh, Kevin Rodrigues, Shycil Mathew
22. Self-isolation of Healthcare Workers during COVID-19 Pandemic in a Tertiary Care Center – Association between their Sleep Quality, Anxiety Status and Social Capital 129
Avik Kumar Layek, Nilanjana Ghosh, Jagadish Biswas, Spandan Bhaduri

	<i>Binay Kumar, Avinash Kumar, Vinita Kumari, Ashok Rastogi, Nawal Kumar, Himanshi</i>	
29.	Maternal Health in View of COVID 19: Women’s Awareness, Attitude and Self Reported Behavior	175
	<i>Deepak, Akoijam Mamata Devi</i>	
30.	An Observational Study to Compare the Effects of Esmolol and Diltiazem in Attenuating the Haemodynamic Response to Laryngoscopy and Endotracheal Intubation.....	183
	<i>Dinesh Chauhan, Avani Vayeda, Jigisha Mehta</i>	
31.	A Case Report of Juvenile Intraoral Pleomorphic Adenoma.....	189
	<i>Gupta Radhika, Chandavarkar Vidyadevi, Sinha Abhishek, Mishra Mithilesh</i>	
32.	Comparative Evaluation of Disinfection on Elastomeric Impression Material using 2% Gluteraldehyde, Ultra Violet Radiation and Gaseous Ozone using Customised Disinfection Unit - An In-Vitro Study	192
	<i>Hetal Purohit, Sweta Kale Pisulkar, Seema Sathe Kambala, Gajendra Singh Rajpurohit, Surekha Dubey Godbole, Chinmayee Dahihandekar, Rohit Ashok Mistry</i>	
33.	Epidemiological Study of Cases of Death Due to Drowning at Mortuary of North Bengal Medical College Hospital.....	200
	<i>Jagadish Biswas, Vivek Kumar, Tenzing Zampel Bhutia, Prabir Kumar Deb, Mrinal Kanti Jha</i>	
34.	Study of Knowledge, Attitude and Practice among the Nursing Students Regarding COVID-19 Preparedness in a Rural Tertiary Care Center in Eastern India	205
	<i>Uttam Majumder, Jagadish Biswas, Avik Kumar Layek, Sabita Tamang</i>	
35.	A Study to Assess the Effectiveness of Lukewarm Water Footbath Therapy on Quality of Sleep among Elderly People Staying in Nadiad	213
	<i>Jasmin Prakashbhai Patel, Bhoomi Bhoopendrabhai Patel, Shruti Bharatbhai Patel, Pavitra Sanjaykumar Prajapati, Janki Kamleshbhai Patel, Bhavisha Rameshbhai Sonara, Nickson Das</i>	
36.	An Observational Study of Propofol Mct-Lct Versus Propofol Lct with Lidocaine Pretreatment for Pain During Induction in General Anaesthesia	219
	<i>Jatin Patel, Chandini D, Malini Mehta</i>	
37.	Round Cell Tumors - Classification & Overview	228
	<i>Kush Pathak, Prachi Nayak, Asha Karadwal, Sushruth Nayak, Satyajit Tekade</i>	
38.	Mucormycosis in Post Covid Patient - A Case Report	240
	<i>Kush Pathak, Asha Karadwal, Prachi Nayak, Sushruth Nayak</i>	
39.	Article Deleted	245

IV

40. Profile of Female Victims of Alleged Sexual Assault Cases Reported to Dr.B.R. Ambedkar Medical College, Bengaluru..... 251
Karthik SK, Mohana Velu J, Jayaprakash G
41. A Prospective Study of Ligature Mark in Deaths Due to Hanging..... 257
Karthik SK, Mohana Velu J, Jayaprakash G
42. Applications of Reverse Panoramic Radiography for Age and Gender Determination- A Radiographic Study 262
Karthikeya Patil, Mahima VG, Poornima Chandran, Srishti Tayal, Jaishankar HP
43. Age Estimation Using the Radiographic Visibility of the Periodontal Ligament in Mandibular Third Molars in Mysore Population- A Retrospective Study 269
Karthikeya Patil, Mahima VG, Poornima Chandran, Bharathi Penumatsa, Nagabhushana Doggalli, Sanjay CJ
44. Simulation Versus Traditional Method of Teaching on the Retention of Birthing Care 276
Jyoti AK Mamata Devi, Khushbu, Shalu
45. Effect of Meditation in Prevention of Suicidal Deaths 284
K. Ravimuni, K. Usha Rani
46. A Cross Sectional Study to Assess the Knowledge, Attitude and Practice on Personal Hygiene among School Children in Rural Primary School of Kheda District, Gujarat 290
Kailash Nagar, Jyot Darji, Shiney Parmar, Niral Patel, Niyati Patel
47. Relation between Duration of Diabetes and Cardiac Mortality in Post-Mortem Cases Coming to GMERS General Hospital, Himmatnagar 296
Kamesh Modi, Uttamkumar Solanki, Kavita Banker, Rajni Bhagora, Jagdeep Jadav
48. A Comparative Study between Effects of Ketamine and Fentanyl as Co-induction Agents with Propofol for I-Gel Insertion in Minor Surgical Procedures 301
Jayshri Desai, Jayati Jain, Priya Kishnani
49. An Observational Study to Compare Patient and Surgeon Satisfaction and Hemodynamic Changes Occurring in Spinal Anaesthesia Versus General Anaesthesia in Patients Undergoing Percutaneous Nephrolithotomy Surgery 309
Jatin Patel, Juhi Jain, Kalpesh Patil, Kirti Patel
50. Pattern of Suicidal Deaths in Females- A Cross Sectional Study in the Age Group of 12-24 Years 319
Kandagatla Krishnamurthy, S.M. Krishna Sagar, Abhijith Subedhar
51. The Hidden Smile- An Overview of the General and Oral Hygiene Status of Transgenders 324
Manikandan Shanmugam, Kurunji Kumaran Navaneethakrishnan, Bhaskar Venkatachalam, Rajasigamani Kandasamy, Krishna Prasanth Baalann
52. Article Deleted 330
53. Stature Estimation from Anthropometry of Foot in Adults of Border Areas of Punjab 335
Megha Rapotra, Jaswinder Kaur

54.	An Observational Study between Intrathecal Fentanyl and Butorphanol with Low Dose Bupivacaine to Facilitate Early Ambulation in Perineal Surgeries.....	341
	<i>Malini Mehta, Soumya Jha, Pooja Shah</i>	
55.	A Study to Evaluate the Effectiveness of Awareness Programme on Knowledge Regarding Disaster Preparedness For Common Natural Disasters among the Adults Residing at Selected Rural Areas of Dehradun, Uttarakhand.....	347
	<i>Manisha</i>	
56.	Knowledge and Awareness about Burning Mouth Syndrome among Dental Students.....	355
	<i>Manju J, Mutum Sangeeta Devi, Meena.J, Rahul B, Kavitha.M, Niveditha.B</i>	
57.	Article Deleted	361
58.	An Observational Study of Intravenous Granisetron Vs Oral Gabapentin in Preventing Postoperative Nausea and Vomiting after Middle Ear Surgery	367
	<i>Malini Mehta, Akshata Thakurdesai, Sujay Thakkar</i>	
59.	Imprints of miRNA- An Update	376
	<i>Priya N S, Ramakant Nayak, Vijayalakshmi K, Kishore Bhat</i>	
60.	A Prospective Observational Study Ondenographic Profile and Clinical Outcomes of Acute poisoning Cases in a Tertiary Care Hospital in Southern India.....	382
	<i>Priyadarshini Varadaraj, Aiswarya M Nair, Vaasanthi Rajendran, Lakshmi Marappa, Santhosh Kumar P, Senthil Narayanasamy</i>	
61.	An Autopsy based Study on the Relationship of Cystic Artery with Respect to Common Bile Duct, Common Hepatic Duct and Calot's Triangle in Light of Hepato-Biliary Surgery	390
	<i>Puloma Chakraborty, Sayak Sovan Dutta, Sandip Mukhopadhyay</i>	
62.	An Integrated Autopsy based Study on Variations in Origin of Right and Left Hepatic Arteries & Cystic Artery in Light of Hepato-Biliary Surgery	403
	<i>Puloma Chakraborty, Sayak Sovan Dutta, Sandip Mukhopadhyay</i>	
63.	Clinical Pattern, Morphology and Treatment Modality of Basal Cell Carcinoma of Head and Neck Region: Analysis of 10 Cases	411
	<i>Parveen Mendiratta, Vandana Mendiratta, Roopak Aggarwal, Shailendra Pal Singh</i>	
64.	A Study to Assess the Effectiveness of Protocol Regarding Infection Control in Labour Room in Terms of Knowledge Gain among B. Sc Nursing III Year Students of Govt. College of Nursing Indore	417
	<i>Pragati Das, C. Chouhan, Asha Ram</i>	
65.	Dental Amalgam- Anthropogenic Aspects	425
	<i>Pragya Pandey, Kirti Srivastava, Himanshu Reddy, Diksha Singh</i>	
66.	Morphometric Study of Dry Human Patella with Its Clinical Correlation	430
	<i>Pratima Baisakh, Lopamudra Nayak, B Shanta Kumari, Saurjya Ranjan Das</i>	

VI

67. Mortality among Children of below Five Years of Age in India due to Diarrhoeal Diseases and its impact on GDP436
Rohit Singh Tomar, Deepika Singh Tomar
68. Effectiveness of Planned Teaching Programme on Knowledge Regarding the Secondary Growth and Developmental Changes in Early Adolescent Period (10-14yrs).....442
Raveena, Sarika Yadav, Khushbu
69. Assessment of Knowledge, Attitude and Practices Regarding Breastfeeding among Mothers Having Children Below 1 Year.....448
Ramandeep Kaur, Manjit Kaur, Jyoti
70. Knowledge, Attitude and Practices of Dental Practitioners in Chennai Towards Management of Hazardous Dental Radiological Waste –A Cross Sectional Survey454
Ranjit Kumar, Uma Maheswari, Lubna Fathima, Jasmine Crena, Santo Grace, Suba.A
71. Article Deleted464
72. Review of Obstetrical Emergencies: Its Concept and Optimal Management.....474
Simarjeet Kaur, Poonam Sheoran, Jyoti Sarin
73. Oral Health Status and Oral Hygiene Practices among Children Having Parents with Different Levels of Dental Anxiety479
Shilpa Warhekar, Ashish Warhekar, Vandana Pandey Tripathi
74. Correlation of Sex & BMI with Fusion of Human Sternum in ‘Bengalee’ Population from Dead Bodies Sent for Autopsy in NRSMCH Morgue.....488
Sayak Sovan Dutta, Sandip Mukhopadhyay, Subhajit Adhikary
75. The Effect of Extended Parallel Process Model on Sexual Self-Control of Female Adolescents in Aliabad Kotoul in 2020495
Mahboubeh Tabarsa, Farzaneh Roshangaran, Shahla fakhreazizi, Elham Khaloobagheri, Nafise Hekmati Pour
76. A Study on Autopsy Findings of Different Types of Poisoning Cases at NRSMCH Morgue WHO Admitted and Expired at NRS Medical College Hospital, Kolkata500
Sandip Mukhopadhyay, Sayak Sovan Dutta, Apurba Biswas
77. A Descriptive Study to Assess the Level of Knowledge Regarding the First Aid Management among Undergraduate Nursing Students at Dinsha Patel College of Nursing of Nadiad City506
Sanjana Bhatia, Rashmi Limbachiya, Nikita Barot
78. Herbal therapy in Oral Submucous Fibrosis: A Short Review509
Sanjay C J, Shilpa Padar Shastry, Karthikeya Patil, Nagabhushana Doggalli, Naveen Kumar, Swathi Sharma
79. A Study to Assess the Effectiveness of Structured Teaching Program on Knowledge and Practice Regarding Adult Cardio Pulmonary Resuscitation among Road Traffic Police in Nadiad City514
Sapan S.Macwan, Virendra Jain

80. Rationale of “Potency Test” as Performed on Alleged Accused of Sexual Offences in Age Old Forensic Practice- A Study..... 520
Sayak Sovan Dutta, Sandip Mukhopadhyay, Joydeep Khan
81. Estimation of Age from the Fusion of Human Sternum in ‘Bengalee’ Population from Dead Bodies Sent for Autopsy in NRSMCH Morgue..... 527
Sandip Mukhopadhyay, Sayak Sovan Dutta, Subhajit Adhikary
82. A Post-Mortem Study of “Lifelines”: Common Belief Vs. Reality..... 538
Sandip Mukhopadhyay, Sayak Sovan Dutta, Shelly Samanta
83. Estimation of ‘Stature’ from Long Bones of the Lower Limb-A Cadaver based Study..... 544
Tangirala Rajesh, B.Nagendra Prasad, P.Umamaheswara Rao, M. Balaji Singh
84. A Study of Blood Alcohol Level in Victims of Fatal Road Traffic Accidents in Manipur, India..... 551
Tej Bahadur Chhetri, U B Ghaffar, Syed Meraj Ahmed
85. An Observational Study to Compare Epidural Tramadol and Epidural Fentanyl for Postoperative Analgesia in Lower Limb Orthopaedic Replacement Surgeries..... 557
Tejash H. Sharma, Vibhakar Vasudeva, Kalpesh Patil, Dinesh Chauhan
86. Magnitude of Unnatural Deaths amongst Autopsies Over a Period of 4 Years at a Tertiary Centre Catering to Both Urban and Rural Population 567
Udaya Shankar B S, Shivakumar B C, Sujatha P L, Tyagaraju M R
87. Knowledge Management and its role in Health Care Education 574
Uusha Patel, Deepika S Joshi
88. A Research Study on Medicolegal Autopsies Conducted at Mortuary of Government Medical College, Ongole, Andhra Pradesh From 1st January To 31st December 2020..... 582
Venati Jayashankar, Chaitanya. R, G.B. Raja Kumar
89. Pattern of Injuries in Railway Fatalities at Bowring and Lady Curzon Hospital, Bangalore 586
Vidusha Vijay, S. Venkata Raghava
90. Estimation of Stature from Foot Print Length among Students and Staff of S. Nijalingappa Medical College of Age Group 21-30 Years 590
Vinay Manjunath Raj, Kelvekar V H, Manjula R
91. A Study to Assess the Quality of Life of Under Graduate B.sc. Nursing Students of Dinsha Patel College of Nursing, Nadiad..... 595
Virendra Jain, Arpita Vaidya, Nickson Das, Sachi Christian, Pragnesh Patel
92. Demographic Studies of Autopsied Cases at North Bengal Medical College Hospital During the National Lockdown Period Due to COVID 19 Pandemic 599
Vivek Kumar, Jagadish Biswas, Tenzing Zampel Bhutia, Dibyakar Chhetri, Rumi Maitra, Prabir Kumar Deb
93. Importance of Forensic Science in Crime Investigation 604
Yogender Singh, Pratima Devi Ranga

315. Study the Physiological and Histological Effect of Pulmocodin on the Testis of Male Albino Rats..2070
Aya Mohammed Ali, Mukhtar Khamis Haba
316. Prevalence of Foreign Body in Ear, Nose, and Throat in Imam Khomeini hospital, Iran2076
Azam Fazlipour, Mahammad Hossein Toloei
317. Efficacy of Five Organic Acids Combination on T2- Mycotoxicosis in Rats2081
Ammar A. Fadhil, Suhair Hassan Alkutbi, Eman S. Nassir Msc.
318. Relationship between Periodontal Health and Adolescent Physical Performance Periodontal Health and Adolescent Physical Performance2095
Aulia Ramadhani, Aryo Dwipo Kusumo, Restu Nurhidayati, Nada Fajrina, Fathimah Hanan, Ayu Anggraini B, Faizal Khalis Ramadhani
319. Clinical Profile of Poisoning Cases in a Tertiary Care Hospital –A Retrospective Study.....2103
Badiadka KK, Pramod KL, Hashim A, Kishor Kumar B
320. Antiplatelet therapy in Coronary Artery Disease.....2111
Bakhromkhon Aniskhonovich Alyavi, Jamol Kamilovich Uzokov, OminaYusupqizi Mukhitdinova
321. Early Complications after Thyroid Surgery2116
Balsam Waleed Hussain Al-Askari
322. Effects of Indomethacin Administration on Some Biochemical and Brain Histological Changes in Male Rats2127
Ban Ismael Sedeeq, EntedharRifaat Sarhat, SihamAjmee Wadee, ThuraiaRifaat Sarhat, Kasim Sakran Abass
323. Assessment of Risk Factors, Health Related Quality of Life among Hypertensive Patients in Primary Health Care Center- Iraq-20202136
Ban Nadhum Abdul-Fatah, Yaseen Taha Sarhan
324. Development & Validation of Interpersonal Psychotherapy (IPT) Competency Tool for Student Nurses.....2141
Bandana Bisht, Harmeet Kaur Kang
325. Effectiveness of OSForensic in Digital Forensic Investigation to Curb cybercrime2149
Bandr Siraj Fakiha
326. Analysis of Powder Properties and Pharmacopeial Specifications of Bagasse Cellulose Isolated from *Saccharum Officinarum* L in Indonesia.....2154
Begum Fauziyah, Mohammad Yuwono, Isnaeni
327. The Role of Reactive Oxygen Species and Bacterial Infections in Male in Male Infertility in Al-Anbar Province / West of Iraq2164
Dhuha A. Abbas, Abbas O. Al.janabi Waleed N.
328. Deleted2170

329. COVID 19 and Health Systems' Economy in Western Balkan Societies2176
Ermir Shahini, Eugen Skuraj, Fatbardh Sallaku, Shpend Shahini, Fabiola Bali, Elti Shahini
330. Acquired Immunodeficiency Syndrome Patient with A Dengue Hemorrhagic Fever Co-Infection ...2183
Dedy Hadi Prawono, Bramantono, Usman Hadi
331. Assessment of the Burnout Level in Health Care Worker During COVID 192188
Mustafa Kareem Jawad, Dhiaa Abd Al-Rasoul Abd Al-Reda, Waleed Ali Armeah, Asmaa Jabbar Abdulhussein
332. Assessment of Nurses' Knowledge toward Neonatal Resuscitation.....2196
Zainab Abidzaid Abid AL-Hadrawy, Rusul Ali Khadim, Esraa Shaker
333. The Effectiveness of the Blended Education Strategy in Learning the Skills of Rolling and Suppression Football for Students2203
Abbas Abdulhamza Kadhem, Khalil Hamid Mohammed Ali, Ahmed Sekeb Gaeed
334. Study of Biological Indicators and Biochemical Changes Related to Gallstones Formation in Patients in Kirkuk City.....2210
Chrow Ahmed Khurshid, Amara Kamal Mohammed
335. Assessment of Nurses' Knowledge towards Infections of Peripheral Intravenous Cannula in Al-Basrah Teaching Hospital2216
Aliaa H. Ali, Ahmed T. Saud
336. The effect of a Program by using (Clinical exercise - Medication) for Osteoporosis Patients aged (40-50) Years2222
Esraa kathum Dakhil Al-Ghazali, Muna Talib Thabet Albadry
337. Evaluation of Serum Level of Cystatin C and Fetuin A in Patients with Chronic Renal Failure.....2226
Marwa Nabeel Hameed, Khudhair A. Khudhair, Yasir I. abbas
338. Contribution of Some Special Physical Abilities and Biomechanical Indicators to the Accuracy of the Front Strike Performance of Junior Tennis.....2235
Zainab Shakir Hammood, Widad Kadhim Majeed
339. The Relative Contribution of the Flexibility for the Hip Joint, the Angle of the Knees, and the Muscular Strength for Arms of Performance of the Front and Back Rolling Skills, Opening on the Floor Movement Mat2241
Ibtihal Riyadh Omran, Intisar Kadhum Abdulkareem
340. The Effectiveness of Using a Generative Learning Strategy to Learning the Football Dribbling Skill for Youth2247
Mohsin Mohammed Hasan AL-ASadi, Kareem Nazm Judi
341. Study the Effect of Hypercholesterolemic Diet on the Histological Changes of the Kidneys in Local Male Rabbit *Oryctolagus cuniculus*2253
Batool A. Hussein, Kiaser Abdulsajjad M. Hussain, Intisar Hussain Ali

XXVI

342. The Effect of Pulmonary Ventilation Exercises and Some Respiratory Indicators in the Preparation for Olympic Lift and Achievement for Advanced Lifters 2258
Hayder Jabbar Abd
343. The Effect of (Mental - Skillful) Exercises According to (Surface - Deep) Cognitive Representation in Attentional Control and Side Pass Skill of Handball for Junior 2263
Ali Radhi Abdul Hussein, Mohammad Jasim Mohammad, Samer Youssef Mtaab
344. The Effect of (Mental - Skill) Exercises According to (Surface - Deep) Cognitive Representation to Learning Some Forms Shooting Skill of Handball for Juniors..... 2270
Ali Radhi Abdul Hussein, Samer Youssef Mtaab, Mohammad Jasim Mohammad
345. The Effect of Problem-Solving Strategy to Developing Some Physical Abilities and Individual Rapid Attack for Junior Players 2279
Hasan Fadhil Hamzah, Mohammed Rashid Najm
346. The Effect of an Educational Program Using Cognitive Techniques to Performance the Passing and Shooting Skills of Football..... 2292
Mustafa Jawad Mraidi, Hatham Hussein Abed
347. The Effect an Educational Program Using Cognitive Techniques to Developing Football Dribbling Skill for Students 2300
Mustafa Jawad Mraidi, Hatham Hussein Abed
348. Mindfulness and its Contribution to the Performance of the Frontal Pronation Skill on the Horizontal Bar of Gymnastics for Students 2307
Zaid Sami Yasir, Yassin Alowan Ismail, Osma Abdel Moneim Jawad
349. The Contribution of Self-Efficacy by Performing the Skill a Front Handspring on the Mat Floor Movement of Gymnastics for Students..... 2312
Zaid Sami Yasir, Osma Abdel Moneim Jawad, Yassin Alowan Ismail
350. The Effect of Comparative Training on the Achievement and Trajectory among Young Weightlifters..... 2318
Hayder Jabbar Abd
351. The Use of Different Weights and Resistances and their Effect on Bending the Muscles of the Lower Limbs and the Achievement of the Long Jump Contestants for Al Diwaniyah Clubs in Athletics 2325
Karim Abdul Hussein Al-Jaber, Basma Abdul Hussein Shandal
352. A Comparative Study: in Some Physical Traits between the Different Lines of Play in Quintet Football 2329
Basma Abdul Hussein Shandal
353. A Cross Sectional Study to Evaluate The Existence of Drop in “Core Body Temperature” of Afebrile Arabic Iraqi Citizens Who are Living Inside Iraq, Applied Study in Private Clinic in Baghdad – Iraq 2333
Ali Mohammed Fadhil, Yousif Jawad Kadom

354. Role of Inhibitory Check Point (CTLA-4) in Iraqi Women with Breast Cancer.....2337
Hamed Hussein Ali Al- Saadi, Hazima Mossa Al-Abassi, Mohammed Mahdi Jawad
355. The Effect of Intense Match-Speed Exercises on Some Special Physical Abilities and Skills of Volleyball Players2348
Marwa Hussein Hasan, Huda Badwi Shbeeb
356. Elevation of Some Biochemical and Immunological Parameters in Hemodialysis Patients Suffering from Hepatitis C Virus Infection in Babylon Province.....2354
Marwa Fadhil Alsaffar
357. Haplotyping of *Echinococcus granulosus* Isolates From Human, Sheep and Cattles Hydatid Cysts in Some Central Euphrates Provinces, Iraq.....2363
Nabaa Zahid Sabri Shani Al-Hasnawi, Ahmed Khudhair Al-Hamairy, Huda Jasim M. Altameme
358. The Effect of the Strategy the Learning Cycle of Higher than the Cognitive to Development the Sense-Motor Perception and Accuracy of the SMASH Service Skill of Volleyball for Students2370
Nuha Yousef Hashem, Muthana Abd Dahash, Mahmoud Nasser Radhi
359. Effect of Graphene Nanoparticles on some Organs of Reproductive System in Male Albino Mice...2381
Asawir Saadi AliAL-kazomy, Genan Adnan Al-Bairuty, Mohammed Mahdi Jawad
360. Comparison of some Physiological Parameters Determined by Timing Consumption of Breakfast Meal among Adult Women2394
Ghadeer Hamid AL-Ardhi, Noran Jameel Ibraheem, Adil Mohammed AL-Maamory, Ali Mohammed Abd- Alameer
361. Role of Magnetic Resonance Imaging Techniques and Protocols in Diagnosis and Staging of the Urinary Bladder Carcinoma in Comparison with Histopathological Findings.....2397
Raad owaid jassim, Haider Qasim Hamood, Hussein Hasan Nsaif
362. Technical Accuracy and Efficiency of Magnetic Resonance Imaging in Evaluation of Uterine Masses in Comparison with Ultrasound2406
Hind Moafak Abd-Aljabbar, Haider Qasim Hamood, Hussein Hasan Nsaif
363. Evaluation of Third Degree Football Referees' Health Behaviors at the Referees' Football Training Centre in Baghdad City2416
Mohammed Hamzah Mahdi, Mohammed F. Khalifa
364. The Relationship between some Immunological Criteria and Women with Recurrent Miscarriages.2423
Yahaya M. Jabber, Alaa Jawad Hassan, Hussein N. Abdullah
365. Isolation and Identification of Bacteria from Urinary Tract Infections2432
Noor Hamid Abbas Al- Marzoog , Heba Saleh Shaheed, Alaa Yousif Oudah
366. Effect the Information Processing Model According to the Error Scale to Learning and Accuracy the Performance of Blocking Skill of Volleyball For Juniors.....2437
Firas Kassop Rashd Dwayyeh, Muntadher Mohammed Ali, Mahmoud Nasser Radi Alkoofee

XXVIII

367. Study of Some Physiological and Histological Parameters of Albino Rats Administrated with a Herbal Obesity Slimmer Product 2446
Ikhlass A. Al-Hilaly, Meison Abdulbary, Sadeq Jaffer AlZubaidi, Ibraheem Mohammed
368. Effect of Tactical Performance Endurance Exercise on the Level of the Hormones ANP-BNP for Young Football Players 2455
Mukhald Bejai Attieh, Habeeb Ali Taher, Ahmed Murtda Abid AlHussain
369. Assessment of Nurse's Knowledge toward Common Mistakes in Blood Pressure Measurement at Baghdad Teaching Hospital 2464
Saad Abdul-Ridh Jissir
370. Effectiveness of Health Educational Program on Nurse's Practices toward Care of Neonates with Hypoglycemia at Neonatal Intensive Care Unit in Al-Nasiriya City 2474
Hussein Oraibi Hawi, Suad Hassoon Khudhair
371. Effectiveness of A Coping Style- related Instructional program on Self - Care of Patients with Diabetes Mellitus Type II at Endocrinology and Diabetes Center in Al-Basra City 2482
Rajaa Ibrahim Abed, Saja' Kareem Jassim
372. Effectiveness of an Educational Program on Nursing Staff Knowledge towards Priorities of Responsibilities at Emergency Unit in Imam Al-Hussein Medical City in Holly Karballah Governorate 2490
Mohammed B. Nadheer, Widad K. Mohammed
373. Civil Responsibility in the Medical Industry for Artificial Intelligence Applications: the Legal Rules of AI Responsibility 2498
Ammar Kareim Kadham Al-Bsherawy, Ali Abdul-Jabbar Rahim Al-Mashhadi
374. Creation of Cervical Cancer Risk Factor Score Card in order to Know the Risk Score for Cervical Cancer in Women of Reproductive Age by Conducting Self-Assessment 2508
A'im Matun Nadhiroh, Budi Santoso, Suhatno, Windhu Purnomo Heru Santoso Wahito Nugroho
375. The Impact of COVID 19 in Digital Currencies Focused in Western Balkan Societies 2516
Ermir Shahini, Eugen Skuraj, Fatbardh Sallaku, Shpend Shahini, Fabiola Bali, Ermira Kalaj, Elti Shahini
- The Study of Hemodialysis on the Change Rate of Serum Osteopontin, Sialic Acid, and Nitric Oxide Levels 2521
Entedhar R. Sarhat, Takea Shaker Ahmed, Mahde Salih Hamad, Rajaa S. Najim, ThuraiaRifaat Sarhat, Kasim Sakran Abass
376. Biochemical Study on the Hypoglycemic Effects of Extracted Phenolic Compounds from Grape Seeds in Streptozotocin -Induced Diabetic Rats 2529
Entedhar Rifaat Sarhat, Madlen Qassm Abbas, Gadeer Hatem Aljader, Anwar Rifaat Sarhat, Thuraia Rifaat Sarhat, Kasim Sakran Abass
377. Isolation and Identification of Shigella Sonnei from Children with Diarrhea and Detection of the Most Important Virulence Factors 2536
Hayfaa Rajab Alwan, Mohammed Nadhir Maarroof

378. The Development and Psychometric Properties of Geriatric Existential Anxiety Scale2544
Hemin Saadati, Bahman Bahmani
379. Study of Some Histopathological and Immunological Analysis in Patients with Chronic Tonsillitis 2553
Hetaf Shallal Farhan, Ahmed Sami Farhan
380. Study Effect of Water Fenugreek Extraction to In Vitro Oocytes Maturation in Local Iraqi Ewe2559
Imad Majeed Almeeni, Saad Akram Hatif, Souhayla O. Hussain, Sadeq Jaafer Zalzal, Ahmed Muhammed Mahdi
381. Dihydrotestosterone and Free/Total Prostatic Specific Antigen Ratio in Diagnosis and Prognosis of Prostatic Disease 2564
Lara Balasim Al-Dahy, Basil O. Mohammed, Saad Dakhil F. Daraji, Mazin M. Farhan
382. The Role of oxLDL in Intrauterine Growth Restriction and Its Relationship with Thiol Homeostasis2571
Layla Ali Shareef, Omeed Akbar Ali, Firas Shawqi Abdulrazzaq, Mehmet Akif Bozdayi, Rasha Raheem A. Alkarkoushi, Hasan Ulusol, Seyithan Taysi
383. Effect of Sonchus oleracea Extract on Some Virulence Factor of Klebsiella pneumonia Which Isolated from Urinary Tract Infection in Ramadi Hospital 2578
Najeeb Mohammed Hussein, Rasool Ahmed Khalil, Ghashq Abdul Qadir Haqi Khali, Donia Kreem Mohammed Hamed
384. Effect of Linum usitatissimum on Profile Lipid, total Protein, Albumin, Globulin, and Liver Enzyme Parameters in Femalemice 2586
Noor Mahdi Fathil
385. CBCT-3D Anthropometric Measurement of Mandibular Bone to Sex Determination in Surabaya Indonesia : a Pilot Study 2591
Riki Kristanto, Eha Renwi Astuti, Daniel Haryono Utomo, Mieke Sylvia Margaretha Amiatun Ruth
386. Altered Serum Marker of Adipokines Profile in Breast Cancer Women.....2598
Shaimaa Essa Ahmed, Entedhar R. Sarhat, Neda Awni, ThuraiaRifaat Sarhat, Kasim Sakran Abass
387. The Impact of OCA2 (rs1800407) and HERC2 (rs12913832) Gene Polymorphisms on Iris Color in a Sample of Iraqi People 2605
Tabarek Mundher Noaman, Abdul Kareem A. Alkazaz
388. A Study of Polycyclic Aromatic Hydrocarbons (PAH) Effect on Polymorphisms gstm1 gene on Thi-Qar Refinery Oil Workers2611
Taleb K. Odah
389. The Effect of Safety Management Practices Through Safety Knowledge Towards Safety Performance on Workers of Pt. Masmindo Dwi Area.....2616
Ummu Kamilah, Syamsiar S. Russeng, Masyitha Muis, Yahya Thamrin, Masni, Fridawati Rivai, Rizky Maharja
390. Comparative Study of the Effect of Lipo-6-Black and Caffeine on the Fertility of Male Albino Rats.....2624
Yasameen Shaker Mahmood, Mukhtar Khamis Haba

XXX

391. Molecular and Immunological Study of Rotaviral Infection among Children in Anbar Governorate 2630
Zainab Ahmed Ali, Noor N. Al-Hayani, Mohammed M. Moshrif
392. The Effect of Saliva Officinalis L (Sage Tea) on Biochemical and Pathological Changes
Improvement in Adult Male Rats Induced by a High Fat Diet.....2636
Hawraa H. Naji, Eman Jawad Jabber, Adnan M Jasim
393. Active Aging, Health Literacy, and Quality of Life among Elderly in the Northeast of Thailand.....2645
Petcherut Sirisuwan, Surachai Phimha, Pannee Banchonhattakit
394. The Adverse Effect of Air Pollution with Polycyclic Aromatic hydrocarbon (PAH) on 8-OXO-
DG and gene expression (HOGG1) in Midland Refineries Company-Daura Refinery Workers2651
Raghad H Al-Ani, Estabraq AR. Al-Wasiti
395. Correlation of Tumor Necrosis Factor-Alpha, High Sensitivity C-Reactive Protein, and Disease
Activity Score 28 (DAS28) in Rheumatoid Arthritis Patients2657
Buchari Buchari, Cut Murzalina, Nirwana Lazuardi Sary
396. Vitamin B12 Deficiency and Psychiatric Manifestations-A Consise Review2664
Roshan Kumar Jha, Deepika Kanyal, Ritu Devi, Lata Kanyal Butola
397. Association between Physical Characteristics and Locomotive Syndrome in Elderly in Surabaya,
Indonesia2668
Benni Azhari, Imam Subadi, Patricia Maria Kurniawati
398. Clinical Characteristics of COVID-19 in Patients: A Meta-Analysis.....2672
Bestun Ibrahim Hama Rahim, Muhammed Babakir-Mina
399. Lead in Painting Workers at Indonesia Land Transportation Manufacture Company2677
Benny Dwi Prasetyo, Endang Dwiyanti
400. Using Sleman's Verbal Autopsy Health and Demographic Surveillance Data to Distinguish Ways
of Death.....2685
Beta Ahlam Gizela, Idha Arfianti Wiraagni, Suhartini, Nurholis Majid Public
401. Deleted2693
402. Comparison of High-Intensity Interval Training and Moderate-Intensity Continuous Training on
VO2max and Response Reaction Time in Basketball Referees2700
Breklen Risal Ary Wibowo, Deandra Maharani Widiatmaja, Sakina, Abdurachman, Purwo Sri Rejeki
403. The Response of Human Resources and Health Workers in the Surgical Operating Room Due to
the COVID-19 Pandemic2709
Cipta Pramana, Kardoyo Kardoyo
404. Effect of Moderate-Intensity Acute Physical Activity on Decreasing Cortisol Levels in Obese
Female2716
Cornelius Coli, RizkaEka Prasetya, GadisMeinar Sari , Purwo Sri Rejeki

405. The Dynamics of Macrophage Function in Reparation of Natural Immune System in Tuberculosis Disease 2724
Christina Destri, Jusak Nugraha, Muhammad Amin, Djoko Agus Purwanto
406. Prevalence of Gestational Hypertension and Pregnancy Outcome 2733
Bhat AV, Kharde SN
407. Effectivity of Essential Oil Diffuser Blend Aromatherapy for Decrease Morning Sickness in The First Trimester of Pregnancy in Wonokromo Surabaya 2740
Fritria Dwi Anggraini, Fauziyatun Nisa', Siska Nurul Abidah
408. Radiographic Evaluation of Dental Age in Adults Using Digital Orthopantomograph 2746
Bhavika Sachin Vhatkar, Mandavi Shailesh Waghmare, Naveen Kumar Shetty, Siddharth Acharya, Kapil Sharad Gavand
409. GATA 3 Reactivity in Adenoid Cystic Carcinoma and Pleomorphic Adenoma of Salivary Glands.. 2752
Ali Zaki NAJI, Ammar Eesa Mahdi
410. The Effect of Golden Sea Cucumber (*StichopusHermanii*) Extract on the Healing Process of the White Rat (*Rattus Norvegicus*) Indicated by Oral Ulcer– A Literature Review 2759
Dio Rafid Prakoso , Diah Purwaningsari, Sihning E.J.Tehupuring , Wachjudi Kurnia
411. Determinants of Tobacco Use among Adolescents and Young Adults in Indonesia: An Analysis of IFLS-5 Data 2765
Diyana Effendi, Arief Priyo Nugroho, Zainul Khaqiqi Nantabah, Agung Dwi Laksono, Lestari Handayani
412. The Effect of Iron Nanoparticles (FeNPs) on Some Biological and Hematological Parameters in Albino Rats 2774
Dilsher. A. Mohammed, Omar A. M. Al-Habib
413. Optimizing Role and Synergy of Indonesian National Police for Handling Prevention of Covid-19 Spread: A Case Study in Human Resource Development Perspective 2783
Dimas Agung Trisliatanto, Anis Byarwati, Sri Iswati, Arif Rahman Nurdianto, Fery Setiawan, Heribertus Agustinus Bilo Tena, Hendro Puspito
414. Effect of Cacao on Plasma F2-Isoprostane Level, CD34 and ICAM-1 Expression of Coronary Arteries in Cigarette Smoking Exposed Rats 2791
Dina Helianti, Soetjipto, Widjiati, I Ketut Suidiana
415. Determination of Antioxidant Compounds, Antibacterial Activity and Minerals Content of Broccoli 2799
Dhuha M.A.AL-Altaie, Zuhair Radhi Addai
416. The Role of Aloe vera and *Centella asiatica* to the Improvement of Skin Barrier Function in Indonesian Batik Workers 2805
Damayanti, Menul Ayu Umborowati, Sylvia Anggraeni, Cita Rosita Sigit Prakoeswa

XXXII

417. A Study to Assess the Effectiveness of Planned Teaching Programme on Prevention of Selected Life Style Diseases in Terms of Knowledge and Attitude among Male Adults at Selected PHC of Kheda District2812
Darshana B. Suthar, Kailash Nagar
418. Study on Heart Measurements of the People between the age 20-40 Years Present to the Teaching Hospital Colombo North – Post mortem Study2816
De Silva RLSK, Kitulwatte IDG, Priyanath DC, Gunathilake MMAC, Senanayake TAAW, Kumari MKJK
419. The Need for Specialist Doctors in the Development of Type B General Hospital at Regional Level.....2829
Desy Martha Panjaitan, Widyana Beta Arthanti, Mokhamad Khoirul Huda
420. Individual-Level Factors Associated with Quality of Life among TB Patients2836
Dhian Satya Rachmawati, Nursalam Nursalam, Rachmat Hargono, Mochammad Amin, Nyoman Anita Damayanti
421. Associations between P53, Transforming Growth Factor Beta-1, and Interleukin-10 Serum Levels with Advanced Liver Disease and Hepatitis B Virus Infection2842

Risk Factor of Preeclampsia in a Secondary Indonesian Hospital: A Case-Control Study

Lady Aqnes Kurniawati¹, Muhammad Ilham Aldika Akbar², Budi Utomo³, Aditiawarman²

¹Student, Faculty of Medicine, Universitas Airlangga, Surabaya, Indonesia, ²Lecturer, Department of Obstetry and Gynecology, Faculty of Medicine, Universitas Airlangga, Surabaya, Indonesia, ³Lecturer, Department of Public Health-Preventive Medicine, Faculty of Medicine, Universitas Airlangga, Surabaya, Indonesia

Abstract

Background: Preeclampsia is a form of hypertension in pregnancy that leads to morbidity and mortality. Although the etiology remains unclear, there are some risk factors that are suspected to be associated with the development of preeclampsia. **Objective:** To find out the risk factors associated with the incidence of preeclampsia in Airlangga University Hospital. **Method:** This study conducted an analytical-observational study with the hospitalized unmatched based case-control approach. 165 pregnant women were included. Data were analyzed in univariate, bivariate, and multivariate regression logistic and performed using statistical package for the social science (SPSS), $p < 0.05$ was considered statistically significant. **Results:** Pregnant women with preeclampsia were about 18 to 44 years old, with the average BMI is 31.19 kg/m². There are significant relation between family history of hypertension ($p = 0.000$), maternal age ($p = 0.004$), BMI ($p = 0.000$), pregnancy interval ($p = 0.009$), and chronic hypertension ($p = 0.007$) with the incidence of preeclampsia. In the multivariate analysis using logistic regression, family history of hypertension was the most dominant factor with OR: 3.374 and 95% CI: 1.454 – 7.830 compared to other factors such as maternal age (OR: 2.885; 95% CI: 1.311 – 6.347; $p: 0.008$), and BMI (OR: 2.590; 95% CI: 1.525 – 4.400; $p: 0.000$). **Conclusion:** Family history of hypertension, maternal age, BMI, pregnancy interval, and chronic hypertension have a significant relationship with the incidence of preeclampsia. In multivariate analysis, family history of hypertension is the most dominant risk factor among others.

Keywords: Risk factor, Preeclampsia, Hypertension in pregnancy

Introduction

Preeclampsia is a form of hypertension in pregnancy that has a high impact on morbidity and mortality. Based on WHO¹, the criteria for preeclampsia is characterized by persistent hypertension with diastolic pressure ≥ 90 mmHg accompanied by substantial proteinuria (>0.3 g/24 hours). Preeclampsia that is not handled properly can develop into eclampsia and cause maternal death. The maternal mortality rate in the world is very high, there are around 810 deaths in women due to

complications of pregnancy or childbirth around the world every day². Preeclampsia is one of the three factors that dominate the causes of maternal mortality in Indonesia with an increasing proportion³. The prevalence of preeclampsia in each region is different and preeclampsia is a worldwide concern due to its morbidity and mortality.

Preeclampsia is hypertension with a new-onset at or after 20 weeks with one or more symptoms such as proteinuria, acute kidney injury, liver complication, neurological complications, hematological complication, and uteroplacental dysfunction⁴. Preeclampsia is also characterized by placental dysfunction and endothelial activation and coagulation as a maternal response to systemic inflammation⁵. The pathogenesis of

Email: muhammad-i-a-a@fk.unair.ac.id

preeclampsia is still not fully explained, several theories explain the occurrence of preeclampsia, but the placenta is considered to play an important role in preeclampsia. Ischemic placenta caused by incomplete spiral artery remodeling and the release of antiangiogenic factors to maternal circulation are suspected as the cause of preeclampsia⁶. Besides, several risk factors can trigger preeclampsia. By knowing risk factors from an early stage, efforts can be made to prevent and treat them more quickly to reduce mortality and morbidity due to preeclampsia. This can improve the quality of life for maternal and infants and reduce maternal mortality. Risk factors from a place to another can be different because of differences in human characteristics that can be affected by geography, culture, and lifestyle. Therefore, this study aimed to determine the risk factors that are typical or often occur in Indonesian women associated with the incidence of preeclampsia.

Method

This study conducted an analytical-observational study with the hospitalized unmatched based case-control approach. 165 pregnant women with and without preeclampsia who delivered and had the medical record in Airlangga University hospital from August 2017 to December 2018 were included. Sampling was carried out by purposive random sampling technique and 55 was obtained as the minimum sample size calculated using Lemeshow formula for case-control study, with $P_1 = 0.52$, $P_2 = 0.19^7$, then added 30%. By a ratio of 1:2, the number of case and control samples were 55 and 110, respectively. The instrument of the research used secondary data in the form of a medical record. Data were analyzed in univariate, bivariate, and multivariate regression logistic. Univariate analysis was performed

to analyze the character of each variable. Bivariate analysis, utilized Chi Square test and for the ineligible variable utilized Fisher’s exact test were to find out the relationship of each risk factor to preeclampsia. Furthermore, multivariate regression logistic was performed to connect several independent variables to dichotomous dependent variable.

All Statistics were performed using a statistical package for the social science (SPSS) and $p < 0.05$ was considered statistically significant.

Results

In this research, pregnant women with preeclampsia were about 18 to 44 years old, with a mean age of 31 years. Meanwhile, the age of pregnant women without preeclampsia were about 17 to 40 years old, with an average age of 28 years. Pregnant women with preeclampsia had an average body mass index (BMI) of 31.19 kg/m² and 27.66 kg/m² in pregnant women without preeclampsia.

Maternal Previous History

The previous history related to previous maternal pregnancies, such as a history of intra-uterine growth restriction (IUGR), previous stillbirth, previous placental abruption, and a history of preeclampsia can only be assessed in pregnant women with nonprimigravidas (multigravidas). From 110 control groups, there were 67 multigravida pregnant women (69.91%). Meanwhile, in the case group, 38 (69.09%) out of 55 were multigravida pregnancies. Whereas, the previous history related to family history of hypertension can be assessed in all available samples.

Table 1. Results and Analysis of Maternal Previous History with Preeclampsia Incidence

Variable	Category	Without preeclampsia n (%)	Preeclampsia n (%)	p value
Family history of hypertension	No	90 (81.82)	31 (56.36)	0.000*
	Yes	20 (18.18)	24 (43.64)	
History of preeclampsia	No	65 (97.01)	36 (94.74)	0.619
	Yes	2 (2.99)	2 (5.26)	
IUGR History	No	66 (98.51)	37 (97.37)	1.000
	Yes	1 (1.49)	1 (2.63)	

*showing significance level of $p < 0.05$

Maternal Characteristic

Maternal characteristics assessed in the form of maternal age, nulliparous, primigravida, BMI, assisted reproductive technology (ART), pregnancy interval, and new partners are presented in the following table.

Table 2. Result and Analysis of Maternal Characteristic with Preeclampsia Incidence

Variable	Category	Without preeclampsia n (%)	Preeclampsia n (%)	p value
Maternal Age	<20 years	6 (5.45)	3 (5.45)	0.004*
	20 – 35 years	87 (79.09)	31 (56.36)	
	>35 years	17 (15.45)	21 (38.18)	
Nulipara	yes	46 (41.82)	17 (30.91)	0.174
	No	64 (58.18)	38 (69.09)	
Primigravida	yes	43 (39.09)	17 (30.91)	0.303
	no	67 (60.91)	38 (69.09)	
IMT	18.5 – 24.9	39 (35.45)	4 (7.27)	0.000*
	25.0 – 29.9	37 (33.64)	17 (30.91)	
	≥ 30	34 (30.91)	34 (61.82)	
Pregnancy interval	<2 years	12 (17.91)	1 (2.63)	0.009*
	2 – 4 years	23 (34.33)	8 (21.05)	
	>4 years	32 (47.76)	29 (76.32)	
New partner	no	62 (91.18)	33 (86.84)	0.518
	yes	6 (8.82)	5 (13.16)	

*showing significance level $p < 0.05$

Analysis result in table 2 showed that in maternal's characteristic, there was a significant relationship between maternal age, BMI, and pregnancy interval with the incidence of preeclampsia. Besides, all pregnant

women with and without preeclampsia in this research had their pregnancies without assisted reproductive technology (ART).

Maternal Comorbid Disease

The frequency distribution of comorbid diseases and the relation with preeclampsia were presented in Table 3 below.

Table 3. Result and Analysis of Maternal Comorbid Disease with Preeclampsia Incidence

Variable	Category	Without preeclampsia n (%)	Preeclampsia n (%)	p value
Chronic hypertension	no	107 (97.27)	47 (85.45)	0.007*
	yes	3 (2.73)	8 (14.55)	
Diabetes mellitus	no	109 (99.09)	52 (94.55)	0.108
	yes	1 (0.91)	3 (5.45)	
Infection	no	100 (90.91)	50 (90.91)	1.000
	yes	10 (9.09)	5 (9.09)	

* showing significance level of $p < 0,05$

The results of this analysis indicated that in comorbid diseases, there was a significant relationship between chronic hypertension and the incidence of preeclampsia. Meanwhile, diabetes mellitus and infection did not have a significant relation with the incidence of preeclampsia.

Fetal Factor

The number of fetuses that were conceived by pregnant women with preeclampsia and pregnant women without preeclampsia was single. Thus, there were no multiple pregnancies in all samples. Likewise, a hydatidiform molar pregnancy is not found in all pregnant women with preeclampsia and pregnant women without preeclampsia.

Multivariate Analysis

Multivariate analysis was performed using logistic regression by including variables that had a p value < 0.25 . Variables that had a p value < 0.25 consisted family history of hypertension ($p = 0.000$), maternal age ($p = 0.004$), nulliparous ($p = 0.174$), BMI ($p = 0.000$),

diabetes mellitus ($p = 0.108$) and chronic hypertension ($p = 0.007$). The pregnancy interval had a value of $p < 0.25$, but it was not included in the logistic regression because the pregnancy interval only involved samples that had been pregnant before. Thus, it did not apply to samples with first pregnancies.

The logistic regression results showed that the iteration history table in block 0 or before the independent variable was included in the model $N = 165$, the value of -2 log-likelihood was obtained: 210.050. Degree of freedom (DF) = $N - 1 = 165 - 1 = 164$. Chi-square (X^2) table on DF 164 with probability 0.05 = 194.8825. The value of -2 log-likelihood (210.050) $> X^2$ table (194.8825). Thus, it rejected H_0 . It showed that the model before the independent variable included did not fit with the data. The -2 log-likelihood value after the independent variable is entered (in the iteration history table block 1) 168.018 and the X^2 table value on DF 158 is 188.3317. The value of -2 log-likelihood $< X^2$ table, then H_0 2q accepted. It indicated that the model after

inserting the independent variable, is fitted with the data. The results of the omnibus test showed a significance of 0.000 (<0.05). Thus, it rejected H0. It indicated that the addition of the independent variable was fit with the data. The Cox & Snell R Square value of 0.225 and Nagelkerke R Square of 0.312 showed the ability of the independent variable to explain the dependent variable of 0.312 or 31.2%. The Hosmer and Lemeshow Test obtained a

significance value of 0.175 (>0.05), which indicated that there was no significant difference between the model and its observation value. Therefore, the model can be accepted. This test was a goodness of fit test (GoF) to determine whether the model formed is correct or not. Independent variables that have a significant value >0.05 were excluded from the table. Thus, table 4 is formed.

Table 4. Logistic Regression Result

	pvalue	OR	95% C.I. forOR	
			Lower	Upper
Family history of hypertension	0.005	3.374	1.454	7.830
Maternal age	0.008	2.885	1.311	6.347
IMT	0.000	2.590	1.525	4.400

Discussion

The Relation of Previous History and Preeclampsia Incidence

This study showed a significant relationship between family history of hypertension with the incidence of preeclampsia (p = 0.000). This was in line with the previous studies^{8,9}. Shamsi et al.¹⁰ suggested that a family history of hypertension was an important risk factor. Preeclampsia in female families had a strong association with an increased risk of preeclampsia at early and intermediate onset. In contrast, male families have only a weak relation with intermediate and late onset preeclampsia¹¹. A family history of hypertension is an inexpensive and easy sign to obtain, thus, asking for a family history of hypertension can be used as an inexpensive and feasible screening tool to monitor preeclampsia in early pregnancy, a family history of hypertension reflects that genetic factors can predispose to an increase in risk factors for preeclampsia¹⁰. Maternal genes play a more important role than paternal genes, especially at early onset, this occur because, during pregnancy male contribution is limited to fetal gene expression that is obtained from the paternally, while in

women, it affects pregnancy, both through the genotype and the fetal genes it inherits¹¹.

The analysis test results showed no significant relationship between the history of IUGR and the incidence of preeclampsia (p value = 1.000). This was in line with what Bartsch et al.¹² in a systematic review and meta-analysis that the relative risk for each risk factor is significantly greater than 1.0 except for historical IUGR. Health services for pregnant women, which were more easily accessed through the nearest public health center or other services, could increase maternal awareness of their pregnancy. Thus, fetal development is controlled.

History of preeclampsia did not significantly relate to the incidence of preeclampsia (p value = 0.619). The history of preeclampsia in previous pregnancies was very dependent on pregnant women’s memory because this data wastaken at the time of subsequent pregnancies. The results of this research were different from previous studies^{8,13}. Boyd et al.¹¹ revealed that the association was stronger for preeclampsia at early onset. Although preeclampsia history in this research did not have a significant relationship, in a sample of cases with a history of preeclampsia, preeclampsia could

return without a family history of hypertension, without chronic hypertension, or other comorbid diseases.

The Relation of Maternal Characteristic and Preeclampsia Incidence

In this study, maternal age has a significant relation with preeclampsia incidence ($p=0.004$). This research was in accordance with what Tessema et al.⁹ stated that the development of preeclampsia increased in pregnancies with older maternal age of 35 years or over have a 4.5 times higher risk than those aged 25-29 years. Meanwhile, those aged 30-34 years were 3.3 times higher than those aged 25-29 years. Another research stated that the pooled unadjusted relative risk (RR) for maternal age over 35 years was 1.2 and for maternal age over 40 years was 1.5. It indicated an increase in risk with increasing age¹². This can occur due to physiological changes in blood vessels¹³. As women get older, women tend to have cardiovascular problems that are closely related to aging of the uterine vessels and stiffness of the arteries, in addition, hemodynamic adaptation during pregnancy becomes more difficult⁹. Decreased physiological function and increased potential for disease increase the chances of problems during pregnancy, including the occurrence of preeclampsia.

The analysis showed that BMI also significantly related to the incidence of preeclampsia ($p = 0.000$). This result was in line with previous research¹³. Aliyu et al.¹⁴ revealed that obesity increased the risk of preeclampsia and eclampsia in all women in the research and adolescents with obesity have the highest risk due to a combination of young age and obesity (AOR: 3.79; 95% CI: 3.15 - 4.55). This result was also in line with what Pare et al.⁸ stated that overweight or obesity is an essential risk factor in their cohort study and is a major contributor to the incidence of preeclampsia and severe preeclampsia. This can be due to an increase in BMI associated with a tendency to develop hypertension, insulin resistance, diabetes mellitus, and affect chronic inflammatory conditions¹⁵. Two-thirds of obese people are estimated to have insulin resistance, and obesity is also a risk of cardiovascular disease and type 2 diabetes mellitus¹³. Obesity is a modifiable and avoidable risk factor to prevent preeclampsia and other disorders.

Pregnancy interval had a significant relation with the incidence of preeclampsia ($p = 0.009$). These results were in line with research conducted by Hercus et al.¹⁶ that an increase in the pregnancy interval had a significant relationship to the incidence of preeclampsia with an OR of 1.39 at a 3-year interval ($p = 0.042$) and OR 2.05 at a 4-year interval ($p = 0.002$) and being an independent risk factor in multigravidas. This could be due to decreased modifying/stretching ability of the proximal spiral arteries due to previous pregnancies with increasing pregnancy intervals¹⁶. Another explanation stated that the pregnancy interval more than 10 years since the last time giving birth causes the number of paternal specific antigen Treg cells to decrease, thereby increasing the risk of preeclampsia in pregnancy¹⁵.

Nulliparous and primigravida had no significant relation to preeclampsia incidence ($p = 0.174$ for nulliparous and $p=0.303$ for primigravidas). In this study sample, the number of pregnant women with nulliparous and primigravida was less than those who were not. This study was in line with previous studies^{8,17}. Likewise, with the research of Shamsi et al.¹⁰, the number of nulliparous women was less and not much different from the number of non-nulliparous women, and statistically showed that parity had no significant relation with the incidence of preeclampsia ($p = 0.915$). However, this result was different from the study conducted by Khader et al.¹³. They revealed that preeclampsia incidence was higher in primigravidas, and the risk of preeclampsia was 2.3 times higher in the first pregnancy compared to the second pregnancy onwards. This might occur due to immunological mechanisms, such as in subsequent pregnancies protected against paternal antigens. Although there was no significant relationship in this research, preeclampsia could occur in mothers with nulliparous and primigravida at a non-risk age and in the absence of comorbid diseases.

This study indicated that new partners did not significantly relate to the incidence of preeclampsia ($p = 0.518$). Research conducted by Hercus et al.¹⁶ revealed that women who had preeclampsia in previous pregnancies had an increased risk of subsequent pregnancies with both new and permanent partners. Yet, pregnancies with new partners for women with previous

normal pregnancies had a significantly risk of developing preeclampsia (OR : 2.27; $p = 0.015$). This may occur due to the low period of exposure to preconception semen because tolerance will be formed in long exposure with the same partner⁹. These results were not found in this research, and it could be because the data about the new partner obtained from the patient's medical record showed that the written husband was different from the previous pregnancy. This research also assumed that the pregnancy occurred with a partner as reported in the medical record.

The Relation of Comorbid Disease and Preeclampsia Incidence

The results of this study indicated that chronic hypertension had a significant relation with the incidence of preeclampsia ($p = 0.007$). This result was in line with the research of Pare et al.⁸who revealed that chronic hypertension affected the incidence of preeclampsia (AOR: 2.72; 95% CI: 1.78 - 4.13; $p < 0.01$). Khader et al.¹³stated that high blood pressure significantly increases preeclampsia risk (OR: 11.9). Tessema et al.⁹also found that chronic hypertension had a relation with the incidence of preeclampsia (AOR: 4.3; 95% CI: 1.33 - 13.9). Chronic hypertension in preeclamptic women could increase the risk of pregnancy-associated stroke (PAS) (OR: 3.2; 95% CI: 1.8 - 5.5)¹⁸. This might occur due to the presence of cardiovascular blood vessel problems since before pregnancy. Thus, the elasticity of the blood vessels decreases and becomes a predisposing factor for preeclampsia.

Data analysis results showed that diabetes mellitus did not have a significant relation with the incidence of preeclampsia ($p = 0.108$). This might be because the presence or absence of diabetes was asked after the mother had pregnancy, while before pregnancy the mother's ignorance of glucose levels could occur if there was no previous blood glucose examination. This study's results were in line with those of Nursal et al.¹⁷stated that there was no significant relationship between a history of diabetes mellitus and the incidence of preeclampsia ($p = 1.000$). However, this result was different from previous research stating that pre-gestational diabetes was related to the incidence of preeclampsia^{8,10}. Middleton et al.¹⁹stated that pregnant

women with diabetes in the group with a loose glucose target (GDP 6.7 - 8.9 mmol/L) found more women with preeclampsia than the moderate target group (GDP 5.6 - 6.7 mmol / L) and tight (GDP ≤ 5.6 mmol/L).

The infection did not have a significant relation with the incidence of preeclampsia ($p = 1.000$). In this research, the absence of a significant relation could be due to the various types of infection. Based on previous studies, not all types of infections significantly affected the incidence of preeclampsia. From five pregnant women in the sample of cases who suffered from infection, only one mother (20%) had bacterial vaginosis, two mothers (40%) had hepatitis B infection, one mother (20%) had acute respiratory infections, and one other mother (20%) had not known the type of infection. Meanwhile, in the control sample, out of 10 mothers who experienced infection, there were two types of infection, hepatitis B infection (90%) and *S. pneumoniae* infection (10%). In chronic hepatitis B infection, Huang et al.²⁰revealed that in Asian women, this infection can reduce the risk of preeclampsia because it had a negative significant relation (OR: 0.77, 95% CI: 0.65 - 0.90; $p = 0.002$), this is due to disruption immune response or increased immune tolerance caused by hepatitis B virus infection. Minassian et al.²¹found that other infections such as the respiratory tract were also not related with preeclampsia (AOR: 0.91; 0.72 - 1.16), in contrast with urinary tract infections (AOR: 1.22; 1.03) - 1.45). In another research, Miller et al.¹⁸revealed that infection can increase the risk of developing PAS in preeclamptic women.

The Relation of Fetal Factor and Preeclamptic Incident

In this research, all pregnancies were singleton pregnancies. Thus, the relation with the incidence of preeclampsia was not known. The result of this research was in line to the previous study²². They stated that all respondents had single pregnancies. When compared with single pregnancies, multiple pregnancies can increase the risk of preeclampsia by 2.36 times, and preeclampsia will occur in 30% of pregnancies²². This result was different from the previous research that multiple pregnancy had a significant relation with the incidence of preeclampsia^{8,13}. The incidence of preeclampsia increased in multiple pregnancies not due

to incompatibility of maternal HLA with the fetus, but because of fetal antigens twice as many as in single pregnancies¹⁵.

In this research, there was no pregnancy with hydatid mole. This was presumably because the samples in the research were pregnant women who delivered, while in the hydatidiform molar pregnancy the fetus was absent/ unable to survive, thus, there was no birth. Hydatidiform moles developed from pregnancy tissue were divided into two types: complete hydatidiform moles and partial hydatidiform moles. The total hydatidiform mole was a type that often occurred and there was no fetus, while in the partial hydatidiform mole, there was a defective or non-viable formation²³. Min et al.²⁴ in their study, argued that compared to the normal placenta in early pregnancy, the hydatidiform mole produced more vascular endothelial growth factor (VEGF), increased angiogenic factors VEGF could lead to the development of preeclampsia with very early onset.

Multivariate Analysis

Multivariate analysis using logistic regression showed that family history of hypertension (OR: 3.374; 95% CI: 1.454 – 7.830; p: 0.005), maternal age (OR: 2.885; 95% CI: 1.311 – 6.347; p: 0.008), and BMI (OR: 2.590; 95% CI: 1.525 – 4.400; p: 0.000), were independent variables that significantly affected the dependent variable. Family history of hypertension was the most dominant factor among other independent variables, with a p value of 0.005 and an OR value of 3.374, which means that pregnant women who had a family history of hypertension had a risk of developing preeclampsia 3.374 times compared to pregnant women without a family history of hypertension.

Conclusion

Family history of hypertension, maternal age, BMI, pregnancy interval, and chronic hypertension have a significant relation to preeclampsia incidence. In multivariate analysis, family history of hypertension is the most dominant risk factor among others.

Further study is needed to conduct regarding risk factors for preeclampsia, especially those related to emotional, social, and cultural conditions, so that risk

factors can be obtained holistically.

Conflict of Interest: The authors declare that there is no conflict of interest.

Ethical Clearance: This study had been approved by the research ethics committee of Airlangga University Hospital with the number 159 / KEP / 2019.

Funding Source: Self-funding.

Acknowledgments: The authors would like to thank the authorities of the Faculty of Medicine, Universitas Airlangga and Airlangga University Hospital for facilitating and allowing this study to be completed.
