You will be unable to make your revisions on the originally submitted version of the manuscript. Instead, revise your manuscript using a word processing program and save it on your computer. Please also highlight the changes to your manuscript within the document by using the track changes mode in MS Word or by using bold or colored text.

Once the revised manuscript is prepared, you can upload it and submit it through your Author Center.

When submitting your revised manuscript, you will be able to respond to the comments made by the reviewer(s) in the space provided. You can use this space to document any changes you make to the original manuscript. In order to expedite the processing of the revised manuscript, please be as specific as possible in your response to the reviewer(s).

IMPORTANT: Your original files are available to you when you upload your revised manuscript. Please delete any redundant files before completing the submission.

Because we are trying to facilitate timely publication of manuscripts submitted to the Malaysian Journal of Medicine & Health Sciences, your revised manuscript should be submitted by 03-Aug-2021. If it is not possible for you to submit your revision by this date, we may have to consider your paper as a new submission.

Once again, thank you for submitting your manuscript to the Malaysian Journal of Medicine & Health Sciences and I look forward to receiving your revision.

Sincerely,
Dr. Normala Ibrahim

See my comments in the highlight text :

1. in the figure, which one of the A and B ?
2. incorporate to be one left (A) and right figure (B)
3. Insert the mean of SD in the figure
4. in the introduction, your statement is significant, what're the differences between the previous study and yours that you have concluded it.
5. in the methods, mention the ethical clearance number on human
6. how to analyze the data ?
7. why you take the sample in 6-12 years old ?
8. in the result, how to know this value ? statistic or your assumption. if your study was difference, why used $p > 0.05$?
9. any typo between comma and period between numeric and others
10. in the result you said "was not very significant". what's it means ?
11. in the conclusion, you said "n girls was faster than in boys." how to conclude it ? did you use the statistical software for analysis ?
