Title: Study on Dosage Range Evaluation Opioid Analgesic for Breakthrough Pain in Cancer Patients: a Retrospective study

Dear Dr. Rahmadi,

Thank you very much for submitting the above article to Annals of Palliative Medicine. Your submission has been assessed by reviewers and discussed by the editorial team. We have found your manuscript potentially acceptable for publication. However, the manuscript will require major revision based on the reviewers' comments, which is attached.

In order to expedite the processing of the revised manuscript, please be as specific as possible in your response to the reviewer(s). The revised manuscript (keep the track changes) and your reply to the comments will be forwarded to the referees for re-review. Please give your response to the comments point-by-point as shown in the following format. At the END of each reply/response from you, please DO describe how you responded to the reviewer comment in the text, e.g., "we added some data ...(see Page xx, line xx)" or "we have modified our text as advised (see Page xx, line xx)".

Revise your manuscript using a word processing program. Please provide a marked file either by using the "Track Changes" function of your word processing program or by using a different color of text to show the changes.

At this moment, the line-up of authorship should not be changed, according to our policy. Stealthy modification of author names will cause rejection of your paper. If you request the need to modify the authorship with sufficient reasons, please let us know in your cover letter. AS SUCH, ANNALS OF PALLIATIVE MEDICINE RESERVES THE RIGHT TO BEGIN THE REVIEW PROCESS ANEW.

Your kind acknowledgement of receiving this email would be greatly appreciated. It is suggested that you return the revision back to us within 3 weeks. Please note that your manuscript may be rejected automatically if we do not hear from you within 3 weeks.

Dear Dr. Rahmadi,

Thank you so much for your mail and we have updated the pdf. The article will be published (**ahead of print**) online soon. Please note that no further alterations should be made from now on. We will formally inform you when it is published.

The symbol ^ refers to the ORCID number as shown at the bottom of the title page.

In addition, the shared information between affiliations 4 and 5 ("Dr. Soetomo Hospital, Surabaya, East Java, Indonesia") has been omitted in affiliation 4 according to the journal's publication norm. Thanks for understanding.

We highly appreciate your great contribution to **Annals of Palliative Medicine** and look forward to your continued support to **APM**.

1. Please follow the attached “Submission Checklist for Authors” and revise your paper if needed. Here are some additional points:

- a. The article should follow STROBE Checklist for reporting standards. We attached an article explaining the reason of such a reporting guideline. We also attached a template for your reference.
- b. “Data Sharing Statement” is a statement made by authors to confirm their willingness of sharing raw data/patient information related to the article with others. We attached a template for your reference.
- c. We are using the checklist to double-check your manuscript, place “Y” on blank space if you confirm your manuscript has followed the requirement. Place “N/A” if not applicable. If further explanation is needed on a certain item, you can copy the Item and write explanations down below.

2. Language Editing

The wordings of the main text and/or figures/tables should be checked by a native English-speaking expert who is majoring in your field. The use of medical writing service (eg, AME Editing Service, <http://editing.amegroups.cn/#editing>) or an assisting

ANNALS OF PALLIATIVE MEDICINE

language checker should be acknowledged. We do not publish any ghost-written manuscripts.

We have listed some grammatical issues for your reference:

1. There are verbs which should be in the present tense (discussing facts or current trends) but are written in the wrong tense.
2. There are incomplete verbs or verbs forms.
3. Gerund forms to nominalize nouns are being used, when other noun forms would be more appropriate (e.g. “prescription” no “prescribing”)
4. To discuss ranges between times, use en dash “–” (with no preposition) or “between x and y” or “from x and y”)
