Your manuscript, MJMHS-2022-0347, entitled "The Effects Of Hyperbaric Oxygen Therapy In Improvement Of Tnf-A, Hsp 70, Enos, Vegf, Collagen 3, And Il 6 Protein Expression In Wound Healing" has been unsubmited to the Malaysian Journal of Medicine & Health Sciences. It may either have been unsubmited at your request or because you did not complete all necessary parts of the submission.

1) The Originality Report for above-referenced manuscript is now ready - please see attached. When the need for academic integrity is paramount, editorial members at Malaysian Journal of Medicine and Health Sciences read the Originality Report sentence-by-sentence for improper citations and make recommendations accordingly. Please revise and edit your manuscript with reference to the Originality Report. In it, you will notice a few portions, in terms of poor quoting, paraphrasing, and summarizing, were highlighted in different colors to indicate primary sources. All sources must be credited. Please rephrase the highlighted portions to be more in your own voice as they resemble fragments from previously published materials.

As we receive a large number of manuscripts each week, it is impossible for us to check every single citation error. We ask your help to read through the Originality Report again for similar citation errors and make all necessary changes. Please visit <https://libguides.murdoch.edu.au/Vancouver/text>, http://aacc.tums.ac.ir/public/Vancouver_style_guide.pdf, and <https://guides.lib.monash.edu/citing-referencing/vancouver-intext> on how to make quotations. For direct quotations, authors must use double quotation marks to enclose the direct text and also must provide the page number that the direct text was taken from.

For example:

"The increasing availability and growth rate of biomedical information, also known as 'big data', provides an opportunity for future personalized medicine programs that will significantly improve patient care" (1 p. 433).

as one author has put it "the darkest days were still ahead" (1 p. 23).

"...has been proven demonstrably false" (4 p. 23).
