#### Reviewer(s)' Comments to Author:

##### Comments to the Author

Thank you for giving me the opportunity to review the manuscript.

Overall, the manuscript shows good writing, however, I found a few sentences are a bit confusing i.e.:

Page 5 line 11-12:

The fact that there is no difference of the SWN score among people under different antipsychotics treatment were detected in this study.

Page 3 line 28 - 29

.....patient who have insight??

Suggest to re-write.

Found some words missing an article (i.e. the, a)

Regarding the content, I wonder if the severity of patients will affect the results? as shown in Table 1, 38 patients had 3 or more therapy. The authors can added to the discussion to address this issue.

The authors mentioned a small sample as one of the study's limitation. How many sample size should be involved in this type of study about translation and adaptation in the cultural study for this questionnaire? are the authors expect a different result from this current study?

Reviewer: 2

##### Comments to the Author

The authors had made a very good job to conduct this study and write this manuscript. Very few comments to be considered:

1. Please state the owner permission to make translation and adaptation in Indonesian Language
2. page 3 line 43 should be in past tense
3. page 3 line 51 should be the worst and the "best"
4. page 5 line 26 last sentence "main text paragraph?"

##### Editor's Comment to author:

- Based on the result of similaity check your article has 58% similarity index (file attached), which is above the requirement of the journal (30%). We suggest you to rewrite/paraphrase some sentences to fulfill this requirement.
- Please be sure to correct any grammatical errors or tyrographical errors in the manuscript
