Reviewer(s)' Comments to Author:

Reviewer: 1

Comments to the Author

The review would have a high impact on the study of pharmacy practice, especially in rapidly developing Southeast Asia countries. The conclusion should be improved on how come the author ends up with the last statement "Action research on pharmacist intervention in DM is recommended".

Reviewer: 2

Comments to the Author

The review could be an interesting starting point where pharmacists in Asia should start to move in fighting diabetes. The author has written a different side of studies in practical areas. This manuscript is recommended to be accepted for publication.
