

Paper submission External

eighty mardiyen kurniawati <eighty-m-k@fk.unair.ac.id> to Stepan

Feb 21, 2022, 8:59 PM

Dear Editor

I am Eighty Mardiyen Kurniawati from the Faculty of Medicine, Airlangga University. We would like to submit our manuscript for publication in the New Armenian Medical Journal. Our paper is entitled 'Risk Factors for Postpartum Hemorrhage caused by Uterine Atony'. Thank you, we look forward to hearing from you soon.

Best regards
Eighty M.K

Dear Dr. Eighty Mardiyen.

We have made some corrections to present the article sent by you according to our requirements. However, we can correct some of the comments with your help, which are presented in the article (see attached file). In order not to delay the design of the journal, we ask you to send this version of the article edited by you within two days.

We will try to place your article in the second or third issue of this year.
Please acknowledge receipt of this letter.

Sincerely Stepan

to me

Dear Dr. **Eighty Mardiyani**.

In many ways, you have corrected our comments incorrectly. We have corrected all the shortcomings in the text. You misunderstood how to present sources in the list of references. It is necessary to correct only those sources that were previously published not in English. For example, they were published in Indonesian:

How to place a literary source in the list of references, if the article is not published in English.

Write the names and initials of the authors in English.
The title of the article translated into English should be enclosed in square brackets.
After the title in square brackets in English, write the language in which the article was published [Published in Indonesian]
After that, write the necessary parameters, volume, year of publication, page number

For example: Yankovska LV, Snezhytska VO, Povoroziuk VV, Woodman SD [Choice of antibacterial therapy during community-acquired pneumonia] [Published in Indonesian]. It. Med. J. 2011;19(8):481-483.

Please acknowledge receipt of this letter.

Dear Stepan
Editorial Team

I apologize, we would like confirmation regarding this revision. We have revised the results of comment 1 about using commas in decimal numbers, writing units but in this paper we do not find our revision. Is our revision in that case an error or should we not include it in the latest version of revision? And do we only need to revise the bibliography section? Thank you for your answer.

Best regards
Eighty M.K

Dear Dr. **Eighty Mardiyani**,

We appreciate your efficiency. Indeed, you correctly noticed our changes. You were told "In all decimals, put a period instead of a comma" as it is customary in English-speaking (American) countries.

For example:

3.5 – by English standards, this means three thousand five hundred, and by European standards it means three whole five tenths.

Dear Dr. **Eighty Mardiyani**,

We appreciate your efficiency. Indeed, you correctly noticed our changes. You were told "In all decimals, put a period instead of a comma" as it is customary in English-speaking (American) countries.

For example:

3.5 – by English standards, this means three thousand five hundred, and by European standards it means three whole five tenths.

3.5 in American means three point five, and by European standards means three thousand five hundred.

To help you, we have corrected all decimal fractions according to English standards.

In addition, when making references in the text from the list of references, you have omitted the initials of these authors. This has also been corrected by us.

In the list of literary sources, some sources were presented incorrectly, which we also tried to correct.

Please edit the latest version of your article and in this list of references edit only those articles that were published in non-English publications. If I have made any mistakes, I ask you to correct them as well.

Attached to this letter is the last version of your article, edited by me.

With respect
Stepan

Dear Dr. Mardiyani Kurniawati.

Thank you for your cooperation.

The article is already ready for publication in accordance with the requirements of our journal. The article is included in the list of the second issue of this year.

We send the article to our reviewers. Perhaps they may have some questions that we can resolve together.

Sincerely, Stepan

Dear authors!

The editors of The New Armenian Journal, a medical periodical, would like to express their gratitude to you for your cooperation in compiling this issue. Electronic version of "The New Armenian Medical Journal" Vol. 16 (2022) No 1 with your articles is already available on the official website of YSMU (http://ysmu.am/en/journal_list_the_new_armenian_medical_journal/).

We also inform you that the journal has been granted DOI indexing, due to which the release of the issue has been delayed. The DOI for each article is presented on the title page.

We also send an electronic version of the journal (see attached file).

The printed version of the magazine will be ready in 20 days.

We look forward to your further fruitful participation in our journal.

Sincerely,

Editorial
